Salesforce Certified Platform Development Lifecycle and Deployment Architect Sample Questions (Q50-Q55):

NEW QUESTION # 50

An architect is working on a Universal Containers (UC) project, and due to security concerns, the UC security team cannot provide

the Architect with production access. Instead, a central release management team will be responsible for performing production deployments for all development teams.

How should an architect leverage the Metadata API to ensure any metadata components necessary to deploy the project's functionality are properly communicated to the release management team?

- A. Communicate the unlocked package version to the release management team.
- B. Provide the release management team a copy of the audit trail from the sandbox you wish
- C. Create a change set in each sandbox and download the package.xml file for the release
- D. Provide a spreadsheet of all components and utilize the metadata API's readMetadata()

Answer: A

NEW QUESTION # 51

Universal Containers has multiple minor and major releases in a year. Minor releases have sample configuration changes, while major releases involve a large number of complex code components. What is the deployment tool should an architect recommend for both types of releases?

- A. Change sets for both minor releases and major releases.
- B. Change sets for minor releases and Force.com IDE for major releases.
- C. Force.com IDE for minor releases and metadata API for major releases.
- D. Change sets for minor releases and metadata API for major releases.

Answer: D

NEW QUESTION # 52

Universal Containers (UC) is developing a new Customer Community. Requirements for the Community are not fully defined. UC is planning on using an Agile methodology for this work and has promised delivery of the complete system in three months. What are two risks associated with this approach? Choose 2 answers

- A. Agile does not allow for changes to requirements, so customers might not like the resulting solution
- B. Given the lack of requirements and the three-month timeline commitment, the project may not be feasible
- C. The functionality that can be delivered in 3 months is unknown, and may not meet the needs of the business
- D. Agile is not an appropriate development methodology for Customer Community implementations

Answer: B,C

NEW QUESTION # 53

Universal Containers has multiple project teams integrating Salesforce to various systems. Integration Architects are complaining about the various integration patterns used by the teams and lack a common understanding of the integration landscape. What should an architect recommend to address the challenges?

- A. Recommend an outbound message design pattern to be used for all teams.
- B. Recommend a fire-and-forget design pattern to be used for all teams.
- C. Create design standards focused on integration and provide training to all teams
- D. Implement a data governance policy and publish the documentation to all teams.

Answer: C

NEW QUESTION # 54

Which two statements are accurate about why Mock objects are needed when writing test classes? Choose 2 answers

- A. Mock can also be used on the classes that extend the batchable interface to bypass the batch jobs.
- B. Using a Mock allows the test class to bypass the dependencies of other objects, methods, state, or behaviors. Therefore, the developer has total control of his own code.
- C. A Mock is needed whenever the code makes an HTTP callout.

- D. Some methods are invoking long running processes, using Mock is a shortcut of bypassing the long executions.

Answer: B,C
