Salesforce Certified Service cloud consultant Sample Questions (Q212-Q217):

NEW QUESTION # 212

Cloud Kicks is migrating from an external knowledge base to Salesforce Knowledge. Currently, users can select from 8 top-level topics. Each topic has 250 subtopics, arranged into a hierarc that is 10 levels deep. What should a consultant recommend?

- A. Organize up to 200 categories in each category group.
- B. Consolidate into 3 or fewer category groups.
- **C. Reorganize Into a hierarchy with 6 or fewer levels.**
- D. Assign up to 10 data categories per category group to each article.

Answer: C

Explanation:

Explanation

Reorganizing into a hierarchy with 6 or fewer levels is a recommendation that the consultant should make to Cloud Kicks when migrating from an external knowledge base to Salesforce Knowledge. Salesforce Knowledge has a limit of 6 levels for data category hierarchies, which are used to organize and filter articles by topic or type. Data categories can help users find relevant articles based on their search criteria or case information. Cloud Kicks should restructure their existing topics and subtopics into data categories and data category groups that fit within the Salesforce Knowledge limits and best practices. NEW QUESTION # 213

Universal Containers is considering a Knowledge-Centered Support (KCS) implementation. Which three benefits can be expected from KCS adoption? Choose 3 answers

- A. Increased call routing accuracy
- **B. Reduced issue resolution time**
- **C. Reduced support channels**
- D. Increased call deflection
- **E. Optimized use of resources**

Answer: B,C,E

NEW QUESTION # 214

Ursa Major Solar sells highly technical products that require specific expertise for configuration changes and troubleshooting. A mobile workforce can be dispatched to support customers. Dispatching a worker comes at a high cost, and available appointment times are typically several weeks in the future.

What is the recommended method to improve the support experience while providing expert-level support?

- A. Omni-Channel Routing
- B. Field Service Scheduler
- C. Workforce Engagement Self Scheduling
- **D. Visual Remote Assistant**

Answer: D

Explanation:

Explanation

Visual Remote Assistant is a feature that allows you to provide real-time interactive video support to your customers using their mobile devices. You can see what your customers see through their camera, guide them with annotations and pointers, and troubleshoot issues remotely. This solution can improve the support experience while providing expert-level support, as it can reduce the need for dispatching field workers, save time and costs, and increase customer satisfaction. Verified References: [Visual Remote Assistant]

NEW QUESTION # 215

Universal Containers wants to help customers resolve issues by browsing Knowledge articles and submit a case if they need more information.

What should the consultant recommend to meet the requirements?

- A. Implement Case Assignment Rules.
- **B. Create a self-service Help Center.**
- C. Enable Chat in an Experience Cloud site.
- D. Allow Comments on Knowledge articles.

Answer: B

Explanation:

Explanation

Creating a self-service Help Center is a good way to help customers resolve issues by browsing Knowledge articles and submit a case if they need more information. A self-service Help Center is an Experience Cloud site that provides customers with access to Knowledge articles, case management, and other features.

Customers can search for articles that answer their questions, rate and comment on articles, and create cases if they need further assistance. Verified References: Create a Self-Service Help Center

NEW QUESTION # 216

Universal Containers is launching a full line of new products and Service Cloud should support the following requirements:

* Agents need to collaborate with other teams.

* The product development team needs to be alerted on high-priority cases for specific products.

Which solution will meet these requirements?

- **A. Use Process Builder for notifications and case teams to monitor cases.**
- B. Use escalation rules for notifications and case teams to monitor cases.
- C. Use escalation rules for notifications and account teams to monitor cases.
- D. Use Process Builder for notifications and account teams to monitor cases.

Answer: A
