

New Fortinet FCSS_LED_AR-7.6 Test Braindumps - New FCSS_LED_AR-7.6 Braindumps

 PDF	
FCSS_LED_AR-7.6 Fortinet FCSS - LAN Edge 7.6 Architect Exam Summary	
Exam Name	Fortinet FCSS - LAN Edge 7.6 Architect
Exam Number	FCSS_LED_AR-7.6 LAN Edge Architect
Exam Price	\$200 USD
Duration	75 minutes
Number of Questions	40
Passing Score	Pass / Fail
Recommended Training	LAN Edge Architect
Exam Registration	PEARSON VUE
Sample Questions	Fortinet FCSS_LED_AR-7.6 Sample Questions
Practice Exam	Fortinet Certified Solution Specialist - Network Security Practice Test

Topics covered in the Fortinet LAN Edge Architect FCSS_LED_AR-7.6 Exam	
Section	Objectives
Authentication	<ul style="list-style-type: none">- Configure advanced user authentication and authorization scenarios using RADIUS and LDAP- Implement two-factor authentication using digital certificates- Configure syslog on FortiAuthenticator- Configure RADIUS single sign-on (SSO) on FortiAuthenticator
Central management	<ul style="list-style-type: none">- Manage FortiSwitch using FortiManager over FortiLink- Implement and deploy zero-touch provisioning- Configure VLANs, ports, and trunks on FortiSwitch- Configure FortiExtender and FortiAP
Zero-trust LAN access	<ul style="list-style-type: none">- Implement machine authentication, MAC Authentication Bypass (MAB), and NAC policies to secure wireless networks- Deploy a guest portal- Explain advanced solutions in LAN edge: FortiLink NAC, dynamic VLAN, and VLAN pooling

FCSS_LED_AR-7.6 LAN Edge Architect Sample Questions	2

Why don't you begin to act? The first step is to pass FCSS_LED_AR-7.6 exam. Time will wait for no one. Only if you pass the exam can you get a better promotion. And if you want to pass it more efficiently, we must be the best partner for you. Because we are professional FCSS_LED_AR-7.6 Questions torrent provider, we are worth trusting; because we make great efforts, we do better. Here are some reasons to choose us.

Fortinet FCSS_LED_AR-7.6 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Central Management: This section addresses managing FortiSwitch via FortiManager over FortiLink, implementing zero-touch provisioning, configuring VLANs, ports, and trunks, and setting up FortiExtender and FortiAP devices.
Topic 2	<ul style="list-style-type: none">• Zero-Trust LAN Access: This domain covers machine authentication, MAC Authentication Bypass, NAC policies for wireless security, guest portal deployment, and advanced solutions like FortiLink NAC, dynamic VLAN, and VLAN pooling.

Topic 3	<ul style="list-style-type: none"> • Authentication: This domain covers advanced user authentication using RADIUS and LDAP, two-factor authentication with digital certificates, and configuring syslog and RADIUS single sign-on on FortiAuthenticator.
Topic 4	<ul style="list-style-type: none"> • Monitoring and Troubleshooting: This section covers configuring quarantine mechanisms, managing FortiAIops, troubleshooting FortiGate communication with FortiSwitch and FortiAP, and using monitoring tools for wireless connectivity.

New FCSS_LED_AR-7.6 Braindumps - Online FCSS_LED_AR-7.6 Test

if you want to pass your FCSS_LED_AR-7.6 exam and get the certification in a short time, choosing the suitable FCSS_LED_AR-7.6 exam questions are very important for you. You must pay more attention to the study materials. In order to provide all customers with the suitable study materials, a lot of experts from our company designed the FCSS_LED_AR-7.6 Training Materials. We can promise that if you buy our products, it will be very easy for you to pass your FCSS_LED_AR-7.6 exam and get the certification.

Fortinet FCSS - LAN Edge 7.6 Architect Sample Questions (Q63-Q68):

NEW QUESTION # 63

Refer to the exhibit.

On FortiGate, a RADIUS server is configured to forward authentication requests to FortiAuthenticator, which acts as a RADIUS proxy. FortiAuthenticator then relays these authentication requests to a remote Windows AD server using LDAP.

While testing authentication using the CLI command `diagnose test authserver`, the administrator observed that authentication succeeded with PAP but failed when using MS-CHAPV2.

Which two solutions can the administrator implement to enable MS-CHAPv2 authentication? (Choose two.)

- A. Change the FortiGate authentication method to CHAP instead of MS-CHAPv2.
- B. Enable RADIUS attribute filtering on FortiAuthenticator.
- C. Enable Windows Active Directory domain authentication on FortiAuthenticator.
- D. Configure FortiAuthenticator to use RADIUS instead of LDAP as the back-end authentication server

Answer: A,D

NEW QUESTION # 64

Which CLI command displays managed FortiSwitch status from FortiGate?

Response:

- A. `get switch-controller managed-switch`

- B. diagnose switch-controller get-conn-status
- C. show switch-controller global
- D. get system interface

Answer: A

NEW QUESTION # 65

Which CLI automation action on FortiGate is used to define automatic quarantine based on event logs?

Response:

- **A. config automation-stitch → set action-type quarantine-host**
- B. config user quarantine → set auto-log enable
- C. config system automation-action → set action quarantine
- D. config log setting → set quarantine enable

Answer: A

NEW QUESTION # 66

Which authentication method can be used on FortiAuthenticator to implement certificate-based authentication?

Response:

- **A. EAP-TLS**
- B. PAP
- C. LDAP authentication
- D. RADIUS only

Answer: A

NEW QUESTION # 67

Connectivity tests are being performed on a newly configured VLAN. The VLAN is configured on a FortiSwitch device that is managed by FortiGate. During testing, it is observed that devices within the VLAN can successfully ping FortiGate, and FortiGate can also ping these devices.

Inter-VLAN communication is working as expected. However, devices within the same VLAN are unable to communicate with each other.

What could be causing this issue?

- A. The FortiSwitch MAC address table is missing entries.
- B. The FortiGate ARP table is missing entries.
- C. The native VLAN configured on the ports is incorrect.
- **D. Access VLAN is enabled on the VLAN.**

Answer: D

Explanation:

Observed behavior:

- * Devices in the VLAN can ping FortiGate # gateway reachability OK.
- * FortiGate can ping devices in that VLAN # return path OK.
- * Inter-VLAN routing works # FortiGate's L3 and policies are fine.
- * Devices in the same VLAN cannot ping each other # problem is on the L2 switching plane, not L3.

On FortiSwitch (managed by FortiGate), there is a feature called Access VLAN (sometimes described in NAC /dynamic segmentation context):

- * When Access VLAN is enabled on a VLAN, the switch does not perform normal L2 forwarding between hosts in that VLAN.
- * Instead, all traffic from endpoints in that VLAN is forced upstream to FortiGate, as if every frame were destined for the gateway.
- * This is used for designs where you want all intra-VLAN traffic inspected by the firewall, implementing micro-segmentation.

Resulting behavior:

- * Host # FortiGate: works (frames are forwarded to FortiGate).
- * FortiGate # Host: works (routed back).
- * Host A # Host B (same VLAN):

- * Frame from A goes to FortiGate.
- * FortiGate sees source and destination in same subnet; depending on policy, it may drop or not have a policy allowing that traffic.
- * Even if allowed, certain designs still break pure L2 expectations.

In the exam scenario, the key point is:

If Access VLAN is enabled, local L2 communication within that VLAN is disabled, so hosts in the same VLAN cannot communicate directly.

That perfectly explains:

- * Same VLAN hosts can't ping each other
 - * But they can both reach FortiGate and beyond
- Why the other options are less likely / incorrect
- * B. FortiSwitch MAC address table is missing entries
 - * If MAC table were empty/bad, nothing in that VLAN would work properly, including pinging FortiGate.
 - * C. FortiGate ARP table is missing entries
 - * Then FortiGate couldn't ping the devices either; but it can.
 - * D. Native VLAN misconfigured on ports
 - * That would affect connectivity to FortiGate too, not only host-to-host.

NEW QUESTION # 68

.....

For candidates who are going to attend the exam, passing the exam is important. FCSS_LED_AR-7.6 exam torrent of us will help you pass the exam successfully. With experienced experts to compile, FCSS_LED_AR-7.6 exam dumps are high quality, and they also cover most knowledge points of the exam, therefore you master the key points of the exam. In addition, FCSS_LED_AR-7.6 Exam Dumps of us will help you pass the exam just one time, if you can't pass the exam during your first attempt, we will give you a full refund. We have online chat service stuff to answer all your questions about the FCSS_LED_AR-7.6 exam torrent, if you have any questions, just consult us.
