Latest Snowflake ADA-C01 Test Voucher & ADA-C01 Latest Study Notes

What's more, part of that BraindumpsPass ADA-C01 dumps now are free: https://drive.google.com/open?id=1qeSm8AMwXHVzX4gu2o_xWC-z2kbBoUbp

The Snowflake ADA-C01 certification exam always gives a tough time to their candidates. So you have to plan well and prepare yourself as per the recommended Snowflake ADA-C01 exam study material. For the quick and complete ADA-C01 exam preparation the BraindumpsPass Snowflake ADA-C01 Practice Test questions are the ideal selection. With the BraindumpsPass Snowflake ADA-C01 PDF Questions and practice test software, you will get everything that you need to learn, prepare and pass the difficult ADA-C01 exam with good scores.

BraindumpsPass Snowflake ADA-C01 exam braindump has a high hit rate which is 100%. It can guarantee all candidates using our dumps will pass the exam. Of course, it is not indicate that you will succeed without any efforts. What you need to do, you must study all the questions in our BraindumpsPass dumps. Only in this way can you easily deal with the examination. How about it feels? When you prepare the exam, BraindumpsPass can help you save a lot of time. It is your guarantee to pass ADA-C01 Certification. Do you want to have the dumps? Hurry up to visit BraindumpsPass to purchase ADA-C01 exam materials. In addition, before you buy it, you can download the free demo which will help you to know more details.

ADA-C01 Latest Study Notes - ADA-C01 Test Guide

BraindumpsPass is determined to give hand to the candidates who want to pass their ADA-C01 exam smoothly and with ease by their first try. Our professional experts have compiled the most visual version: the PDF version of our ADA-C01 exam questions, which owns the advantage of convenient to be printed on the paper for it shows the entirety. In such a way, you can overcome your lack of confidence as well since you can have an overall look. The PDF version of our ADA-C01 Study Guide will provide you the easiest, the most flexible and leisure study experience to success.

Snowflake SnowPro Advanced Administrator Sample Questions (Q17-Q22):

NEW QUESTION # 17

Which commands can be performed by a user with the ORGADMIN role but not the ACCOUNTADMIN role? (Select TWO).

- A. SHOW REGIONS;
- B. GRANT ROLE ORGADMIN TO USER <username>;
- C. SELECT SYSTEM$GLOBAL_ACCOUNT_SET_PARAMETER (
  'ACCOUNT LOCATOR',
  'ENABLE ACCOUNT DATABASE_REPLICATION',
  'true'
  );
- D. SHOW ORGANIZATION ACCOUNTS;
- E. SHOW USERS;

Answer: C,D

Explanation:
According to the Snowflake documentation1, the ORGADMIN role is a special system role that is responsible for managing operations at the organization level, such as creating and viewing accounts, enabling database replication, and setting global account parameters. The ACCOUNTADMIN role is a system role that is responsible for managing operations at the account level, such as creating and managing users, roles, warehouses, databases, and shares. Therefore, the commands that can be performed by the ORGADMIN role but not the ACCOUNTADMIN role are:
* SHOW ORGANIZATION ACCOUNTS: This command lists all the accounts in the organization and their properties, such as region, edition, and status2. The ACCOUNTADMIN role can only show the current account and its properties using the SHOW ACCOUNTS command3.
* SELECT SYSTEM$GLOBAL_ACCOUNT_SET_PARAMETER: This function sets a global account parameter for an account in the organization, such as enabling account database replication4. The ACCOUNTADMIN role can only set local account parameters using the ALTER ACCOUNT command.
Option A is incorrect because the SHOW REGIONS command can be executed by any role, not just the ORGADMIN role.
Option B is incorrect because the SHOW USERS command can be executed by the ACCOUNTADMIN role, as well as any role that has been granted the MONITOR privilege on the account. Option D is incorrect because the GRANT ROLE ORGADMIN TO USER <username> command can be executed by the ACCOUNTADMIN role, as well as any role that has been granted the ORGADMIN role1.

NEW QUESTION # 18
An Administrator loads data into a staging table every day. Once loaded, users from several different departments perform transformations on the data and load it into different production tables.
How should the staging table be created and used to MINIMIZE storage costs and MAXIMIZE performance?

- A. Create it as a permanent table with a retention time of 0 days.
- B. Create it as an external table, which will not incur Time Travel costs.
- C. Create it as a transient table with a retention time of 0 days.
- D. Create it as a temporary table with a retention time of 0 days.

Answer: C

Explanation:
According to the Snowflake documentation1, a transient table is a type of table that does not support Time Travel or Fail-safe, which means that it does not incur any storage costs for maintaining historical versions of the data or backups for disaster recovery. A transient table can be dropped at any time, and the data is not recoverable. A transient table can also have a retention time of 0 days, which means that the data is deleted immediately after the table is dropped or truncated. Therefore, creating the staging table as a transient table with a retention time of 0 days can minimize the storage costs and maximize the performance, as the data is only loaded and transformed once, and then deleted after the production tables are populated. Option A is incorrect because creating the staging table as an external table, which references data files stored in a cloud storage location, can incur additional costs and complexity for data transfer and synchronization, and may not provide the best performance for data loading and transformation. Option C is incorrect because creating the staging table as a temporary table, which is automatically dropped when the session ends or the user logs out, can cause data loss or inconsistency if the session is interrupted or terminated before the production tables are populated. Option D is incorrect because creating the staging table as a permanent table, which supports Time Travel and Fail-safe, can incur additional storage costs for maintaining historical versions of the data and backups for disaster recovery, and may not provide the best performance for data loading and transformation.

NEW QUESTION # 19

An Administrator has a warehouse which is intended to have a credit quota set for 3000 for each calendar year. The Administrator needs to create a resource monitor that will perform the following tasks:

1. At 80% usage notify the account Administrators.
2. At 100% usage suspend the warehouse and notify the account Administrators.
3. At 120% stop all running executions, suspend the warehouse, and notify the account Administrators.

Which SQL command will meet these requirements?

- A. create or replace resource monitor RM1 with credit_quota=3000
  frequency = yearly
  triggers on 80 percent do notify
  on 100 percent do suspend
  on 120 percent do suspend_immediate;
  alter warehouse WH1 set resource_monitor = RM1;
- B. create or replace resource monitor RM1 with credit_quota=3000
  start_timestamp = '2022-01-01 00:00 CET'
  triggers on 80 percent do notify
  on 100 percent do notify and suspend
  on 120 percent do notify and suspend_immediate;
  alter warehouse WH1 set resource monitor = RM1;
- C. create or replace resource monitor RM1 with credit_quota=3000
  frequency = yearly
  start_timestamp = '2022-01-01 00:00 CET'
  triggers on 80 percent do notify
  on 100 percent do suspend
  on 120 percent do suspend_immediate;
  alter warehouse WH1 set resource monitor = RM1;
- D. create or replace resource monitor RM1 with credit_quota=3000
  start_timestamp = '2022-01-01 00:00 CET'
  triggers on 80 percent do notify
  on 100 percent do suspend
  on 120 percent do suspend_immediate;
  alter warehouse WH1 set resource_monitor = RM1;

Answer: C

Explanation:

Option B is the correct SQL command to create a resource monitor that meets the requirements. It sets the credit quota to 3000, the frequency to yearly, the start timestamp to January 1, 2022, and the triggers to notify and suspend the warehouse at the specified thresholds. Option A is incorrect because it does not specify the frequency. Option C is incorrect because it does not specify the frequency and it uses notify and suspend instead of suspend and suspend_immediate. Option D is incorrect because it does not specify the start timestamp. For more information about resource monitors, see Working with Resource Monitors and CREATE RESOURCE MONITOR.

NEW QUESTION # 20

What are characteristics of data replication in Snowflake? (Select THREE).

- A. Users can have unlimited primary databases and they can be replicated to an unlimited number of accounts if all accounts are within the same organization.
- B. Users must be granted REPLICATIONADMIN privileges in order to enable replication.
- C. Databases created from shares can be replicated.
- D. To start replication run the ALTER DATABASE ... REFRESH command on the account where the secondary database resides.
- E. The ALTER DATABASE ... ENABLE REPLICATION TO ACCOUNTS command must be issued from the primary account.
- F. Replication can only occur within the same cloud provider.

Answer: A,C,E

Explanation:

Explanation

*Option A is correct because the ALTER DATABASE ... ENABLE REPLICATION TO ACCOUNTS command must be issued from the primary account that owns the database to be replicated1.

*Option B is incorrect because users must be granted REPLICATIONGRANTER privileges in order to enable replication1.

*Option C is incorrect because to start replication, the ALTER DATABASE ... REFRESH command must be run on the primary database, not the secondary database1.

*Option D is incorrect because replication can occur across different cloud providers, as well as across regions2.

*Option E is correct because databases created from shares can be replicated, as long as the share is active and the database is not dropped or altered1.

*Option F is correct because users can have unlimited primary databases and they can be replicated to an unlimited number of accounts if all accounts are within the same organization1.

NEW QUESTION # 21

For Snowflake network policies, what will occur when the account_level and user_level network policies are both defined?

- A. The account_level policy will override the user_level policy.
- B. The user_level policy will override the account_level policy.
- C. The user_level network policies will not be supported.
- D. A network policy error will be generated with no definitions provided.

Answer: B

Explanation:

According to the Network Policies documentation, a network policy can be applied to an account, a security integration, or a user. If there are network policies applied to more than one of these, the most specific network policy overrides more general network policies. The following summarizes the order of precedence:

* Account: Network policies applied to an account are the most general network policies. They are overridden by network policies applied to a security integration or user.

* Security Integration: Network policies applied to a security integration override network policies applied to the account, but are overridden by a network policy applied to a user.

* User: Network policies applied to a user are the most specific network policies. They override both accounts and security integrations.

Therefore, if both the account_level and user_level network policies are defined, the user_level policy will take effect and the account_level policy will be ignored. The other options are incorrect because:

* The account_level policy will not override the user_level policy, as explained above.

* The user_level network policies will be supported, as they are part of the network policy feature.

* A network policy error will not be generated, as there is no conflict between the account_level and user_level network policies.

NEW QUESTION # 22

......

Are you worried about you poor life now and again? Are you desired to gain a decent job in the near future? Do you dream of a better life? Do you want to own better treatment in the field? If your answer is yes, please prepare for the ADA-C01 exam. It is known to us that preparing for the exam carefully and getting the related certification are very important for all people to achieve their dreams in the near future. It is a generally accepted fact that the ADA-C01 Exam has attracted more and more attention and become widely acceptable in the past years.
