By focusing on how to help you more effectively, we encourage exam candidates to buy our 1Y0-204 study braindumps with high passing rate up to 98 to 100 percent all these years. Our experts designed three versions for you rather than simply congregate points of questions into 1Y0-204 real questions. Efforts conducted in an effort to relieve you of any losses or stress. So our activities are not just about profitable transactions to occur but enable exam candidates win this exam with the least time and get the most useful contents. We develop many reliable customers with our high quality 1Y0-204 Prep Guide. When they need the similar exam materials and they place the second even the third order because they are inclining to our 1Y0-204 study braindumps in preference to almost any other.

Citrix Virtual Apps and Desktops 7 Administration Sample Questions (Q44-Q49):

NEW QUESTION # 44

A Citrix Administrator complains that between the two rewrite policies bound to the vserver, only one policy, whichever has lower priority, works. The other policy is never used.

Click the 'Exhibit' button to view the screenshot of the relevant policy binding.

What is the cause of the issue?

- A. The Invoke label is NOT configured.

- B. The Policy expression of the no_chunk_pol is 'true' and 'NOT HTTP.REQ.IS_VALID'.
- C. The Priority of the no_chunk_pol is a higher numeric value than 100.
- D. GotoExpression value for Policy RP_remove_srv_header is configured as 'END'.

Answer: B

NEW QUESTION # 45

Scenario: A Citrix Administrator configured Citrix ADC with multiple admin partitions, with different resources running one each. The administrator receives an SNMP alert stating 'a Load Balanced Virtual Server is down'. When the administrator checks the Citrix ADC, the resource on the partition that was usually managed is NOT there.

Now, the administrator has to check each partition to find the load balanced virtual server that is down.

What can the administrator do to add the partition information to the SNMP traps to avoid this from happening in the future?

- A. Add the partition information to the SNMP traps.
- B. Change SNMP trap options.
- C. Configure additional SNMP trap listeners.
- D. Configure the SNMP Manager to send the partition information.

Answer: A

NEW QUESTION # 46

Scenario: A Citrix Administrator is configuring the Citrix Workspace app to allow users to access their applications and desktops. Users should NOT be able to migrate their application sessions between devices throughout the work day.

The administrator needs to modify the Citrix Workspace Control settings _____ to prevent users from migrating their sessions between devices. (Choose the correct option to complete the sentence.)

- A. in the StoreFront console
- B. in the Citrix Workspace app
- C. in the Site configuration within Citrix Studio
- D. through a Group Policy object

Answer: A

Explanation:

The Citrix Workspace Control settings can be modified in the StoreFront console to enable or disable the automatic reconnection of applications and desktops as users move between devices. This feature is not available in Citrix Studio, Group Policy, or Citrix Workspace app.

NEW QUESTION # 47

Scenario: A Citrix Administrator maintains a Citrix Virtual Apps and Desktops Site where mandatory profiles are being used for all users. Users need to maintain the different printer property settings that are available for their HDX sessions. The administrator has enabled the HDX Printer properties retention policy for the Site.

Which setting could the administrator use for this environment?

- A. Held in profile only if NOT saved on client
- B. Saved on the client device only
- C. Retained in user profile only
- D. Do NOT retain printer properties

Answer: C

Explanation:

The HDX Printer properties retention policy has four possible settings:

Held in profile only if NOT saved on client: This is the default setting. The printer properties are held in the user profile only if they have not been saved on the user device. Do NOT retain printer properties: The printer properties are not retained at all. The user must configure them for each session.

Saved on the client device only: The printer properties are saved on the user device only. The user profile does not store them.

Retained in user profile only: The printer properties are retained in the user profile only. The user device does not store them.

In this scenario, the administrator wants the users to maintain the different printer property settings for their HDX sessions. Since the users are using mandatory profiles, which are read-only and do not save any changes, the administrator should use the Retained in user profile only setting. This way, the printer properties are stored in the user profile and applied to the HDX sessions. The user device does not need to save them. This setting is suitable for environments where mandatory profiles are being used.

NEW QUESTION # 48

Which scenario will cause automatic high availability (HA) synchronization to fail?

- A. Manually forced synchronization
- **B. Different build versions**
- C. A configuration change to the primary Citrix ADC
- D. A force failover

Answer: B

NEW QUESTION # 49

.....

The earlier you get 1Y0-204 exam certification, the more helpful for you to have better development in IT industry. Maybe you have heard that the important 1Y0-204 exam will take more time or training fee, because you haven't use our 1Y0-204 exam software provided by our Easy4Engine. The complex collection and analysis of 1Y0-204 Exam Materials have been finished by our professional team for you. You just need to effectively review and pass 1Y0-204 exam successfully.
