

# Fortinet EMEA-Advanced-Support New Exam Camp | Exam Dumps EMEA-Advanced-Support Provider

P.S. Free & New EMEA-Advanced-Support dumps are available on Google Drive shared by Dumpexams:  
<https://drive.google.com/open?id=1Nns1Uwnozi5dhmuZCRr5piWk8PyyI9pq>

Our EMEA-Advanced-Support training materials are excellent. The quality is going through official authentication. So your money paid for our EMEA-Advanced-Support practice engine is absolutely worthwhile. In addition, you are advised to invest on yourselves. After all, no one can be relied on except yourself. And you can rely on our EMEA-Advanced-Support learning quiz. We can claim that if you study with our EMEA-Advanced-Support exam questions for 20 to 30 hours, then you are bound to pass the exam for we have high pass rate as 98% to 100%.

It is known to us that our EMEA-Advanced-Support study materials are enjoying a good reputation all over the world. Our study materials have been approved by thousands of candidates. You may have some doubts about our product or you may suspect the pass rate of it, but we will tell you clearly, it is totally unnecessary. If you still do not trust us, you can choose to download demo of our EMEA-Advanced-Support Test Torrent. Now I will introduce you our Fortinet EMEA Advanced Support Exam exam tool in detail, I hope you will like our product.

## Free PDF Quiz 2026 Fortinet EMEA-Advanced-Support: Fortinet EMEA Advanced Support Exam Perfect New Exam Camp

One of the most significant parts of your Fortinet EMEA-Advanced-Support certification exam preparation is consistent practice. Dumpexams has make sure that you get sufficient EMEA-Advanced-Support exam practice by adding Fortinet EMEA-Advanced-Support desktop practice exam software to your study course. This Fortinet EMEA-Advanced-Support desktop-based practice exam software is compatible with all windows-based devices.

## Fortinet EMEA Advanced Support Exam Sample Questions (Q29-Q34):

### NEW QUESTION # 29

Which of the following are classful addresses? (Select all that apply below)

- A. 10.225.30.0/16
- B. 172.16.0.0/24
- C. 10.225.30.0/8
- D. 172.16.0.0/16

**Answer: C,D**

Explanation:

Classful addressing follows the original IP address classes: Class A (/8), Class B (/16), and Class C (/24).

Option A (10.225.30.0/8) is a Class A address, and C (172.16.0.0/16) is a Class B address. Option B (10.225.30.0/16) and D (172.16.0.0/24) use non-standard masks for their respective ranges, making them classless (CIDR). The original document incorrectly lists only A. Fortinet routing supports both classful and classless addressing. Exact extract: "Classful addressing uses fixed subnet masks: Class A (/8), Class B (/16), and Class C (/24)... Addresses like 10.0.0.0/8 and 172.16.0.0/16 are classful, while non-standard masks indicate classless addressing."

### NEW QUESTION # 30

Which of the below technology(ies) could reduce CPU load and memory utilization used by an IPS engine?

- A. IPS does not compare traffic to each signature individually. Instead it compiles them into a decision tree
- B. Using multiple engines, aligned with load balancing technologies like Turbo that uses round robin algorithms to dispatch traffic up to specific IPS engine
- C. Using IPS sensors and IPS filter to determine which traffic should be examined for which signatures, instead of examine network traffic for all signatures
- D. Using regular instead of extended database, to reduce memory footprint
- E. All of the above

**Answer: A,C,D**

Explanation:

IPS efficiency is improved by: A) Compiling signatures into a decision tree to reduce comparison overhead; B) Using IPS sensors/filters to selectively apply signatures to relevant traffic, reducing unnecessary processing; D) Using a regular database instead of an extended one to lower memory usage. Option C's

"Turbo" and round-robin load balancing is not a standard Fortinet IPS feature. Option E is incorrect as C is not valid. Exact extract: "IPS efficiency is improved by compiling signatures into decision trees to minimize CPU usage... IPS sensors and filters allow selective signature application to reduce processing... Using the regular signature database instead of extended reduces memory footprint."

### NEW QUESTION # 31

In Active FTP who sends the PORT command?

- A. Both
- B. There is no PORT command in Active FTP
- C. The FTP Client
- D. The FTP Server

**Answer: C**

Explanation:

In Active FTP, the client sends the PORT command to the server, specifying an ephemeral port for the server to initiate the data connection back to the client. This distinguishes Active FTP from Passive FTP, where the server provides the port. The server does not send PORT, and the command is a key part of Active FTP. Exact extract: "In Active FTP, the client sends a PORT command to the server, specifying the IP address and port number for the data connection... The server then initiates the data connection to the client's specified port."

### NEW QUESTION # 32

Which of the following is a network monitoring protocol?

- A. RDP

- B. SSH
- C. Telnet
- **D. SNMP**

**Answer: D**

Explanation:

SNMP (Simple Network Management Protocol) is specifically designed for monitoring and managing network devices, allowing administrators to query device status, performance metrics, and configure alerts for issues. It operates by using agents on devices that report to a central manager. In contrast, RDP is for remote desktop access, Telnet for unsecure remote command-line access, and SSH for secure remote access. SNMP is the standard protocol for network monitoring in Fortinet products like FortiGate, FortiSwitch, etc. Exact extract: SNMP enables administrators to monitor how devices are performing and make changes to network devices so that data moves through the network more efficiently. Simple Network Management Protocol (SNMP) enables you to monitor hardware on your network. The FortiSwitch SNMP implementation is read- only. Monitoring FortiAP with SNMP. You can enable SNMP directly on FortiAP by implementing a SNMPD daemon/subagent on the FortiAP side. The Simple Network Management Protocol (SNMP) allows you to monitor hardware on your network. You can configure the hardware, such as the FortiProxy SNMP agent.

### NEW QUESTION # 33

Which statement is true about IPsec VPNs and SSL VPNs?

- A. SSL VPN creates a HTTPS connection. IPsec does not
- B. Either a SSL VPN or an IPsec VPN can be established between an end-user workstation and a FortiGate device
- C. Both SSL VPNs and IPsec VPNs are standard protocols
- **D. All of the above**

**Answer: D**

Explanation:

Both SSL VPN and IPsec VPN are standard protocols supported by FortiGate devices for secure remote access. SSL VPN typically uses HTTPS (TCP port 443) for encrypted communication, while IPsec uses protocols like IKE and ESP. Both can be configured between an end-user workstation (e.g., via FortiClient) and a FortiGate device, supporting various authentication methods. All options are correct, making D the correct answer. Exact extract: "SSL VPN technology uses the standard SSL/TLS protocol to provide a secure connection to the FortiGate unit. The FortiGate SSL VPN can be configured to use HTTPS..." and "IPsec VPNs use standardized protocols like IKE and ESP to create secure tunnels... FortiClient supports both IPsec and SSL VPN connections to FortiGate devices for remote access."

### NEW QUESTION # 34

.....

How you can gain the EMEA-Advanced-Support certification with ease in the least time? The answer is our EMEA-Advanced-Support study materials for we have engaged in this field for over ten years and we have become the professional standard over all the exam materials. You can free download the demos which are part of our EMEA-Advanced-Support Exam Braindumps, you will find that how good they are for our professionals devote of themselves on compiling and updating the most accurate content of our EMEA-Advanced-Support exam questions.

**Exam Dumps EMEA-Advanced-Support Provider:** <https://www.dumpexams.com/EMEA-Advanced-Support-real-answers.html>

Actually, just think of our Fortinet Exam Dumps EMEA-Advanced-Support Provider practice materials as the best way to pass the exam is myopic, All Exam Dumps EMEA-Advanced-Support Provider - Fortinet EMEA Advanced Support Exam test questions are created based on the real test, Fortinet EMEA-Advanced-Support New Exam Camp You can download all content and put it in your smartphones, and then you can study anywhere, In this way, you can have a clear direction for future study of the EMEA-Advanced-Support exam torrent.

He has also worked with some of the top luminaries in technology publishing, Original EMEA-Advanced-Support Questions The first is always, What's the risk, Actually, just think of our Fortinet practice materials as the best way to pass the exam is myopic.
