

# 2026 High Hit-Rate AWS-Solutions-Architect-Professional-100% Free Exam Dump | AWS Certified Solutions Architect - Professional Valid Test Testking

What's more, part of that Exam-Killer AWS-Solutions-Architect-Professional dumps now are free: <https://drive.google.com/open?id=1QAfuiP-23KPiTZtLuReGOPYzZJyEDtn>

our Amazon AWS-Solutions-Architect-Professional actual exam has won thousands of people's support. All of them have passed the exam and got the certificate. They live a better life now. Our AWS-Solutions-Architect-Professional study guide can release your stress of preparation for the test. Our AWS-Solutions-Architect-Professional Exam Engine is professional, which can help you pass the exam for the first time.

Hence, memorizing them will help you get prepared for the Amazon AWS-Solutions-Architect-Professional examination in a short time. The product of Exam-Killer comes in PDF, desktop practice exam software, and AWS Certified Solutions Architect - Professional (AWS-Solutions-Architect-Professional) web-based practice test. To give you a complete understanding of these formats, we have discussed their features below.

>> AWS-Solutions-Architect-Professional Exam Dump <<

## Pass Guaranteed Amazon Marvelous AWS-Solutions-Architect-Professional Exam Dump

Our AWS-Solutions-Architect-Professional test questions are available in three versions, including PDF versions, PC versions, and APP online versions. And AWS-Solutions-Architect-Professional test material users can choose according to their own preferences. The most popular version is the PDF version of AWS-Solutions-Architect-Professional exam prep. The PDF version of AWS-Solutions-Architect-Professional test questions can be printed out to facilitate your learning anytime, anywhere, as well as your own priorities. The PC version of AWS-Solutions-Architect-Professional Exam Prep is for Windows users. If you use the APP online version, just download the application program, you can enjoy our AWS-Solutions-Architect-Professional test material service.

## Amazon AWS Certified Solutions Architect - Professional Sample Questions (Q211-Q216):

### NEW QUESTION # 211

A company is migrating its application to AWS. The applications will be deployed to AWS accounts owned by business units. The company has several teams of Developers who are responsible for the development and maintenance of all application. The company is expecting rapid growth in the number of users The company's Chief Technology Officer has the following requirement

- \* Developers must launch the AWS Infrastructure using AWS CloudFormation
- \* Developers must not be able to create resources outside of CloudFormation
- \* The solution must be able to scale to hundreds of AWS accounts

Which of the following would meet these requirements? (Select TWO)

- A. In a central account, create an IAM role that can be assumed by developers, and attach a policy that allows interaction with CloudFormation. Modify the Assume Role Policy Document action to allow the IAM role to be passed to CloudFormation.
- **B. Using CloudFormation create an IAM role that can be assumed by CloudFormation that has permission to create all the resources the company needs. Use Cloud Formation StackSets to deploy this template to each AWS account.**
- C. Using CloudFormation, create an IAM role that can be assumed by Developers and attach policies that allow interaction with and passing a role to services. Use CloudFormation StackSets to deploy this template to each AWS account
- D. In a central AWS account create an IAM role that can be assumed by CloudFormation that has permissions to create the resources the company requires Create a CloudFormation stack policy that allows the IAM role to manage resources Use CloudFormation StackSets to deploy the CloudFormation stack policy to each AWS account.
- **E. Using CloudFormation create an IAM role for each Developer and attach policies that allow interaction with CloudFormation Use CloudFormation StackSets to deploy this template to each AWS account.**

**Answer: B,E**

### NEW QUESTION # 212

An organization has recently grown through acquisitions Two of the purchased companies use the same IP CIDR range There is a new short-time requirement to allow AnyCompany A (VPCA) to communicate with a server that has the IP address 10.0.0.77 in AnyCompany B (VPC B) AnyCompany A must also communicate with all resources in AnyCompany C (VPC-C) The Network team has created the VPC peer links but it is having issues with communications between VPC-A and VPC H After an investigation the team believes that the routing tables in the VPCs are incorrect.

What configuration will allow AnyCompany A to communicate with AnyCompany C in addition to the database in AnyCompany B?

A)

On VPC-A, create a static route for the VPC-B CIDR range (10.0.0.0/24) across VPC peer pcx-AB.  
Create a static route of 10.0.0.0/16 across VPC peer pcx-AC.  
On VPC-B, create a static route for VPC-A CIDR (172.16.0.0/24) on peer pcx-AB  
On VPC-C, create a static route for VPC-A CIDR (172.16.0.0/24) across peer pcx-AC.

B)

On VPC-A, enable dynamic route propagation on pcx-AB and pcx-AC.  
On VPC-B, enable dynamic route propagation and use security groups to allow only the IP address 10.0.0.77/32 on VPC peer pcx-AB  
On VPC-C, enable dynamic route propagation with VPC-A on peer pcx-AC.

C)

On VPC-A, create network access control lists that block address 10.0.0.77/32 on VPC peer pcx-AC.  
On VPC-A, create a static route for VPC-B CIDR (10.0.0.0/24) on pcx-AB and a static route for VPC-C CIDR (10.0.0.0/24) on pcx-AC.  
On VPC-B, create a static route for VPC-A CIDR (172.16.0.0/24) on peer pcx-AB  
On VPC-C, create a static route for VPC-A CIDR (172.16.0.0/24) across peer pcx-AC.

D)

On VPC-A, create a static route for the VPC-B (10.0.0.0/24) database across VPC peer pcx-AB.  
Create a static route for the VPC-C CIDR on VPC peer pcx-AC.  
On VPC-B, create a static route for VPC-A CIDR (172.16.0.0/24) on peer pcx-AB  
On VPC-C, create a static route for VPC-A CIDR (172.16.0.0/24) across peer pcx-AC.

- A. Option A
- B. Option B
- C. Option C
- **D. Option D**

**Answer: D**

### NEW QUESTION # 213

A company provides a centralized Amazon EC2 application hosted in a single shared VPC. The centralized application must be accessible from client applications running in the VPCs of other business units The centralized application front end is configured with a Network Load Balancer (NLB) for scalability.

Up to 10 business unit VPCs will need to be connected to the shared VPC Some of the business unit VPC CIDR blocks overlap with the shared VPC and some overlap with each other Network connectivity to the centralized application in the shared VPC should be allowed from authorized business unit VPCs only Which network configuration should a solutions architect use to provide connectivity from the client applications in the business unit VPCs to the centralized application in the shared VPC?

- A. Create a VPC peering connection from each business unit VPC to the shared VPC Accept the VPC peering connections from the shared VPC console Configure VPC routing tables to send traffic to the VPC peering connection
- B. Create a VPC endpoint service using the centralized application NLB and enable the option to require endpoint acceptance Create a VPC endpoint in each of the business unit VPCs using the service name of the endpoint service Accept authorized endpoint requests from the endpoint service console
- C. Configure a virtual private gateway for the shared VPC and create customer gateways for each of the authorized business unit VPCs Establish a Site-to-Site VPN connection from the business unit VPCs to the shared VPC Configure VPC routing tables to send traffic to the VPN connection
- D. Create an AWS Transit Gateway Attach the shared VPC and the authorized business unit VPCs to the transit gateway. Create a single transit gateway route table and associate it with all of the attached VPCs Allow automatic propagation of routes from the attachments into the route table. Configure VPC routing tables to send traffic to the transit gateway

**Answer: D**

#### NEW QUESTION # 214

With Amazon Elastic MapReduce (Amazon EMR) you can analyze and process vast amounts of data. The cluster is managed using an open-source framework called Hadoop. You have set up an application to run Hadoop jobs. The application reads data from DynamoDB and generates a temporary file of 100 TBs.

The whole process runs for 30 minutes and the output of the job is stored to S3.

Which of the below mentioned options is the most cost effective solution in this case?

- A. Use Spot Instances to run Hadoop jobs and configure them with EBS volumes for persistent data storage.
- B. Use Spot Instances to run Hadoop jobs and configure them with ethereal storage for output file storage.
- C. Use an on demand instance to run Hadoop jobs and configure them with ephemeral storage for output file storage.
- D. Use an on demand instance to run Hadoop jobs and configure them with EBS volumes for persistent storage.

**Answer: B**

Explanation:

Explanation

AWS EC2 Spot Instances allow the user to quote his own price for the EC2 computing capacity. The user can simply bid on the spare Amazon EC2 instances and run them whenever his bid exceeds the current Spot Price.

The Spot Instance pricing model complements the On-Demand and Reserved Instance pricing models, providing potentially the most cost-effective option for obtaining compute capacity, depending on the application. The only challenge with a Spot Instance is data persistence as the instance can be terminated whenever the spot price exceeds the bid price. In the current scenario a Hadoop job is a temporary job and does not run for a longer period. It fetches data from a persistent DynamoDB. Thus, even if the instance gets terminated there will be no data loss and the job can be re-run. As the output files are large temporary files, it will be useful to store data on ethereal storage for cost savings.

<http://aws.amazon.com/ec2/purchasing-options/spot-instances/>

#### NEW QUESTION # 215

With respect to AWS Lambda permissions model, at the time you create a Lambda function, you specify an IAM role that AWS Lambda can assume to execute your Lambda function on your behalf. This role is also referred to as the \_\_\_\_\_ role.

- A. dependency
- B. execution
- C. delegation
- D. configuration

**Answer: B**

Explanation:

Regardless of how your Lambda function is invoked, AWS Lambda always executes the function.

At the time you create a Lambda function, you specify an IAM role that AWS Lambda can assume to execute your Lambda function on your behalf. This role is also referred to as the execution role.

## NEW QUESTION # 216

.....

You will identify both your strengths and shortcomings when you utilize Amazon AWS-Solutions-Architect-Professional practice exam software. You will also face your doubts and apprehensions related to the Amazon AWS-Solutions-Architect-Professional exam. Our Amazon AWS-Solutions-Architect-Professional practice test software is the most distinguished source for the Amazon AWS-Solutions-Architect-Professional Exam all over the world because it facilitates your practice in the practical form of the Amazon AWS-Solutions-Architect-Professional certification exam.

**AWS-Solutions-Architect-Professional Valid Test Testking:** <https://www.exam-killer.com/AWS-Solutions-Architect-Professional-valid-questions.html>

Amazon AWS-Solutions-Architect-Professional Exam Dump That is a part of our services to build great relationships with customers, That is ok, They made the biggest contribution to the efficiency and quality of our AWS-Solutions-Architect-Professional Valid Test Testking - AWS Certified Solutions Architect - Professional practice materials, and they were popularizing the ideal of passing the exam easily and effectively, Exam-Killer has a complete support team to fix issues of Amazon AWS-Solutions-Architect-Professional PRACTICE TEST software users.

That's terrible, Formerly used for uninitialized variables AWS-Solutions-Architect-Professional and those that don't contain data, That is a part of our services to build great relationships with customers.

That is ok, They made the biggest contribution to the efficiency and AWS-Solutions-Architect-Professional Valid Test Testking quality of our AWS Certified Solutions Architect - Professional practice materials, and they were popularizing the ideal of passing the exam easily and effectively.

## Pass Guaranteed 2026 Efficient Amazon AWS-Solutions-Architect-Professional: AWS Certified Solutions Architect - Professional Exam Dump

Exam-Killer has a complete support team to fix issues of Amazon AWS-Solutions-Architect-Professional Practice Test software users, During the operation of the AWS-Solutions-Architect-Professional study materials on your computers, the running systems of the AWS-Solutions-Architect-Professional study guide will be flexible, which saves you a lot of troubles and help you concentrate on study.
