

Precise PL-300 Exam Questions offer you high-efficient Study Materials - ITPassLeader

Power BI PL-300 Certification Exam Questions and Answers 100% Correct

There is a matrix using a standard date hierarchy. It is currently showing a range of years. How do you display just a specific year and that year's quarters? - ANSWER- Select 'Drill Down', and then the preferred data point, which will drill down into the specific year and its quarters.

What pane allows the user to set the order that visuals move between after pressing Tab? - ANSWER-Selection pane. It provides a list of all objects on the current page and allows the user to group and hide visuals as well as change the layer and tab order.

What Power Query feature removes spaces from the beginning and the end of any string in a column? - ANSWER-Trim (Under Transform > Format). This removes leading and trailing spaces from a string

When filtering a visual to values containing certain text, what wildcard represents zero to many characters? For example, I want to show all values starting with 'St' that include another 't' - ANSWER-Asterisks (Example: St*t')

What does Column Distribution in the Power Query editor show? - ANSWER-Unique and Distinct values

What are two ways to add a custom visual from the online Microsoft Store to a Power BI report? - ANSWER-Go to the Home tab, select More Visuals, and select "From AppSource" or go the Insert tab, select the dropdown containing all of the visuals, and select "Get more Visuals"

There is a dataset of Employee Data which includes the 'Department' and 'Salary' fields. To understand whether Department has an influence on Salary, what two actions need to be taken? There is a Key Influencers visual. - ANSWER-Drag Salary into the 'Analyze' section and Department into the 'Explain By' section. The field in the Analyze section is the numerical field that you are wanting to have explained. The field(s) in the "Explain by" are the fields you want to see have an influence.

What AI visual allows users to analyze data by drilling down into various fields? - ANSWER-Decomposition Tree. The measure that is to be broken down is placed into the Analyze section, and then how it is to be broken down is placed in the Explain By section. This allows users to drill-down into different related fields in their data model and learn how they all influence each other.

How are changes to an original column reflected in Duplicated and Referenced columns, respectively? - ANSWER-Duplicating a query means that the query as it

Life is beset with all different obstacles that are not easily overcome. For instance, PL-300 exams may be insurmountable barriers for the majority of population. However, with the help of our exam test, exams are no longer problems for you. The reason why our PL-300 training materials outweigh other study prep can be attributed to three aspects, namely free renewal in one year, immediate download after payment and simulation for the software version. Now that using our PL-300 practice materials have become an irresistible trend, why don't you accept PL-300 learning guide with pleasure?

Understanding Microsoft Power BI Data Analyst Certification Exam Topics

Microsoft Power BI Data Analyst Certification Exam Topics are below:

- Model the data (30-35%)
- Prepare the data (15-20%)
- Visualize and analyze the data (25-30%)
- Deploy and maintain assets (20-25%)

Microsoft PL-300 exam, also known as the Microsoft Power BI Data Analyst exam, is a certification exam designed for professionals who want to demonstrate their expertise in using Microsoft Power BI to create compelling data visualizations and

reports. PL-300 Exam is one of the most popular and recognized certification exams in the industry and is highly sought after by employers looking for skilled data analysts.

Microsoft PL-300 practice test has real Microsoft Power BI Data Analyst (PL-300) exam questions. You can change the difficulty of these questions, which will help you determine what areas appertain to more study before taking your Microsoft Power BI Data Analyst (PL-300) exam dumps. Here we listed some of the most important benefits you can get from using our Microsoft PL-300 practice questions.

Passing the Microsoft PL-300 exam can lead to various career opportunities, including data analyst, business analyst, data scientist, and data visualization specialist roles. Microsoft Power BI Data Analyst certification also demonstrates a candidate's proficiency in data analysis and visualization using Power BI, which can be beneficial for organizations that use Power BI for their data analysis and reporting needs. Overall, the Microsoft PL-300 Exam is a valuable certification for individuals who want to advance their career in the field of data analysis and visualization.

Microsoft Power BI Data Analyst Sample Questions (Q440-Q445):

NEW QUESTION # 440

You have a Fabric workspace named Workspace1 that contains two Power BI reports named Report1 and Report2.

You create a workspace app that contains both reports.

You need to ensure that the app meets the following requirements:

- Report1 must be visible to all the users in your organization.
- Report2 must be visible to only a security group named Group1.

What should you do next?

- A. Allow access to the hidden content of the app.
- **B. Create an audience and assign Group1 to the audience**
- C. Share Report1 with the built-in All users security group.
- D. Assign Group1 the Viewer role for Workspace1.

Answer: B

Explanation:

Limit your Apps, Maximize your Audiences

Audiences are a way for Power BI admins to keep a limited number of Workspaces/Apps, while adding multiple layers of permissions to the same reports. Organizing reports using this structure will avoid the need to create multiple versions of the same Workspace and will streamline report access provisioning.

Note: In Power BI, an audience refers to a group of users within a Power BI app who are assigned specific permissions and content visibility. This allows you to tailor the app experience for different user groups, such as employees, customers, or partners, by showing or hiding reports and dashboards.

NEW QUESTION # 441

You have a Power BI visual that uses indicators to show values that are out of range as shown in the following exhibit.

□

Answer:

Explanation:

see the explanation for the answer.

Explanation

Answer as selected

□

NEW QUESTION # 442

What should you create to meet the reporting requirements of the sales department?

- A. a measure that uses a formula of SUM (Sales [sales_id])
- B. a calculated column that uses a formula of SUM (Sales [sales_id])
- C. a calculated column that use a formula of COUNTA(sales [sales_id])
- **D. a measure that uses a formula of COUNTROWS (Sales)**

Answer: D

Explanation:

Explanation

The sales department requires reports that contain the number of sales transactions.

The COUNTROWS function counts the number of rows in the specified table, or in a table defined by an expression.

<https://docs.microsoft.com/en-us/dax/countrows-function-dax>

NEW QUESTION # 443

You plan to create a report that will display sales data from the last year for multiple regions. You need to restrict access to individual rows of the data on a per region-basis by using roles.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

Explanation

NEW QUESTION # 444

Hotspot Question

You plan to create the Power BI model shown in the exhibit.

The data has the following refresh requirements:

- Customer must be refreshed daily.
- Date must be refreshed once every three years.
- Sales must be refreshed in near real time.
- SalesAggregate must be refreshed once per week.

You need to select the storage modes for the tables. The solution must meet the following requirements:

- Minimize the load times of visuals.
- Ensure that the data is loaded to the model based on the refresh requirements.

Which storage mode should you select for each table? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: Dual

Customer should use the dual storage mode.

Dual: Tables with this setting can act as either cached or not cached, depending on the context of the query that's submitted to the Power BI dataset. In some cases, you fulfill queries from cached data. In other cases, you fulfill queries by executing an on-demand query to the data source.

Note: You set the Storage mode property to one of these three values: Import, DirectQuery, and Dual.

Box 2: Dual

You can set the dimension tables (Customer, Geography, and Date) to Dual to reduce the number of limited relationships in the dataset, and improve performance.

Box 3: DirectQuery

Sales should use the DirectQuery storage mode.

DirectQuery: Tables with this setting aren't cached. Queries that you submit to the Power BI dataset—for example, DAX queries—and

that return data from DirectQuery tables can be fulfilled only by executing on-demand queries to the data source. Queries that you submit to the data source use the query language for that data source, for example, SQL.

Box 4: Import

Import: Imported tables with this setting are cached. Queries submitted to the Power BI dataset that return data from Import tables can be fulfilled only from cached data.
