You surely desire the Portworx-Enterprise-Professional certification. So with a tool as good as our Portworx-Enterprise-Professional exam material, why not study and practice for just 20 to 30 hours and then pass the examination? With our great efforts, our Portworx-Enterprise-Professional study materials have been narrowed down and targeted to the examination. So you don't need to worry about wasting your time on useless Portworx-Enterprise-Professional Exam Materials information. We can ensure you a pass rate as high as 98% to 100%.

## Pure Storage Portworx-Enterprise-Professional Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• <b>Observability and Troubleshooting:</b> This section assesses the expertise of Support Engineers and System Administrators in monitoring storage deployments and troubleshooting issues. Candidates learn to use observability tools and techniques to maintain system health and resolve performance problems effectively.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• <b>Business Continuity:</b> This domain measures the skills of Disaster Recovery Planners and IT Continuity Managers in implementing backup, recovery, and failover strategies. It ensures candidates understand how to sustain business operations and data availability using Portworx features.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• <b>Deploy and Install:</b> This domain targets DevOps Engineers and Infrastructure Specialists and focuses on deploying and installing Portworx storage solutions. It includes configuring and setting up storage clusters to support containerized applications reliably and securely.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>• <b>Security:</b> This section focuses on Security Engineers and Compliance Officers responsible for enforcing security measures in container storage environments. Topics include managing encryption, access control, and compliance policies to protect stored data.</li></ul>
Topic 5	<ul style="list-style-type: none"><li>• <b>Operations and Administration:</b> This section of the exam measures the skills of Storage Administrators and Kubernetes Operators and covers managing cluster operations and administering container storage environments using Portworx. Candidates demonstrate the ability to efficiently manage and operate storage clusters in production environments.</li></ul>

## Pass-Sure Answers Portworx-Enterprise-Professional Real Questions | Portworx-Enterprise-Professional 100% Free Latest Exam Questions

So rest assured that with the Itbraindumps Pure Certified Portworx Enterprise Professional (PEP) Exam (Portworx-Enterprise-Professional) practice questions you will not only make the entire Pure Storage Portworx-Enterprise-Professional exam dumps preparation process and enable you to perform well in the final Pure Certified Portworx Enterprise Professional (PEP) Exam (Portworx-Enterprise-Professional) certification exam with good scores. To provide you with the updated Pure Certified Portworx Enterprise Professional (PEP) Exam (Portworx-Enterprise-Professional) exam questions the Itbraindumps offers three months updated Pure Certified Portworx Enterprise Professional (PEP) Exam (Portworx-Enterprise-Professional) exam dumps download facility. Now you can download our updated Portworx-Enterprise-Professional practice questions up to three months from the date of Itbraindumps Pure Certified Portworx Enterprise Professional (PEP) Exam (Portworx-Enterprise-Professional) exam purchase.

### Pure Storage Pure Certified Portworx Enterprise Professional (PEP) Exam Sample Questions (Q24-Q29):

#### NEW QUESTION # 24

What command can an administrator run to view Portworx alerts?

- A. Use Grafana to view alerts
- **B. `pxctl alerts show`**
- C. `pxctl cd list alerts`

**Answer: B**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

To view current alerts raised by Portworx within the cluster, the primary command is `pxctl alerts show`. This CLI command lists all active alerts with details such as severity, affected resources, and timestamps. It helps administrators quickly identify issues impacting cluster health, storage pools, volumes, or nodes. While Grafana is a powerful visualization tool often used alongside Prometheus for monitoring, it requires additional setup and does not directly replace the immediate, real-time alert query functionality of `pxctl`. The `pxctl cd list alerts` is not a valid command. Portworx documentation emphasizes `pxctl alerts show` as the go-to tool for alert inspection during operational checks and troubleshooting, offering a concise and focused alert view integrated with Portworx's internal alerting system **【Pure Storage Portworx Alerting Guide source】**.

#### NEW QUESTION # 25

What Portworx swap requirement exists on a Portworx-enabled Linux host?

- **A. Swap should be disabled.**
- B. Portworx does not have a requirement for swap to be enabled or disabled.
- C. Swap should be enabled.

**Answer: A**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Portworx requires swap to be disabled on Linux hosts where it runs. Disabling swap is necessary because swap usage can cause unpredictable latency and performance degradation for storage operations. Portworx relies on consistent and predictable I/O performance for managing block devices and volumes, which is incompatible with the potential delays caused by swapping memory pages to disk. Additionally, many Kubernetes environments recommend disabling swap to meet Kubernetes scheduler requirements, aligning with Portworx's needs. Portworx installation and system requirements documentation explicitly state that swap should be disabled on nodes running Portworx to ensure cluster stability, optimal performance, and predictable behavior of storage operations **【Pure Storage Portworx System Requirements source】**.

#### NEW QUESTION # 26

A cluster administrator wants to define an Autopilot rule for Portworx.  
What are the 4 main parts of an Autopilot rule?

- A. Enforcement, Match Expressions, Topology Key and Weight
- **B. Selector, Namespace Selector, Conditions and Actions**
- C. Replica, I/O profile, Secure, Placement Strategy

**Answer: B**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

An Autopilot rule in Portworx consists of four main parts: Selector, Namespace Selector, Conditions, and Actions. The Selector defines the set of volumes or pods the rule applies to, often using labels. Namespace Selector further narrows the scope to specific Kubernetes namespaces, allowing targeted policy application. Conditions specify triggers or thresholds such as capacity utilization, I/O metrics, or time-based schedules. When conditions are met, the Actions section defines automated responses such as volume expansion, migration, or alerting. This modular rule design enables flexible, policy-driven automation for storage management, helping maintain cluster health and performance without manual intervention. The Portworx Autopilot documentation provides detailed schema and examples, emphasizing these components as foundational for dynamic, autonomous cluster operation **【Pure Storage Portworx Autopilot Guide source】**.

#### NEW QUESTION # 27

What command should be used to add a new drive to an existing storage cluster?

- A. `pxctl service pool update -resize new-disk 150`
- **B. `pxctl service drive add -drive /dev/dm-1 -operation start`**
- C. `pxctl sv nw -a`

**Answer: B**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Adding a new drive to an existing Portworx storage cluster involves bringing the physical device online for Portworx management. The correct command for this is `pxctl service drive add -drive /dev/dm-1 -operation start`. This command instructs Portworx to recognize and incorporate the new drive specified by the device path (e.g., `/dev/dm-1`) into its storage pool. After this operation, Portworx can use the drive for provisioning volumes or expanding capacity. The `-operation start` flag signals Portworx to initialize and prepare the drive for use. This method is part of Portworx's dynamic storage management capabilities, allowing flexible scaling of storage resources without downtime. Official CLI documentation outlines this command as the supported approach to adding drives to running clusters safely and efficiently **【Pure Storage Portworx CLI Guide source】**.

#### NEW QUESTION # 28

When is a volume considered "Public"?

- **A. When guest access is enabled**
- B. When a volume is owned by `system.admin`
- C. When the volume does not have any ownership associated with it

**Answer: A**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Portworx, a volume is considered "Public" when guest access is enabled. Guest access allows users and applications without explicit Portworx authentication credentials to access the volume. This setting is typically used in less restrictive environments where access control is relaxed, but it reduces security by exposing data to potentially unauthorized entities. Public volumes can be accessed by any entity with network connectivity and basic permissions, which is why enabling guest access is carefully controlled in secure deployments. Portworx documentation on security models and access controls stresses that public volumes should be used sparingly and monitored closely due to the elevated risk of data exposure and compliance violations **【Pure Storage Portworx Security Guide source】**.

## NEW QUESTION # 29

.....

We are committed to providing our customers with the most up-to-date and accurate Pure Certified Portworx Enterprise Professional (PEP) Exam (Portworx-Enterprise-Professional) preparation material. That's why we offer free demos and up to 1 year of free Pure Storage Dumps updates if the Portworx-Enterprise-Professional certification exam content changes after purchasing our product. With these offers, our customers can be assured that they have the latest and most reliable prepare for your Pure Certified Portworx Enterprise Professional (PEP) Exam (Portworx-Enterprise-Professional) preparation material.
