Microsoft PL-400 Test Certification Cost - Detailed PL-400 Study Plan

The cost of registering for a certification Microsoft Power Platform Developer (PL-400) exam is quite expensive, ranging between \$100 and \$1000. After paying such an amount, the candidate is sure to be on a tight budget. FreeCram provides Microsoft Power Platform Developer (PL-400) preparation material at very low prices compared to other platforms. We also assure you that the amount will not be wasted and you will not have to pay for the Microsoft Power Platform Developer (PL-400) certification test for a second time.

To become a Microsoft Certified Power Platform Developer, passing the PL-400 Exam is mandatory. Microsoft Power Platform Developer certification validates the developer's skills and knowledge in Power Platform development, which can be a significant asset in the job market. Certified developers are expected to be proficient in creating custom business applications, automating processes, and integrating data from different sources.

Microsoft Power Platform Developer Sample Questions (Q54-Q59):

NEW QUESTION # 54

You are creating a Power Apps Component Framework (PCF) control.

You test the control by using a local test harness.

You need to complete testing.

Which commands should you use? To answer, drag the appropriate commands to the correct functions. Each command may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 55

You need to complete a Power Apps component framework (PCF) control.

How should you define the order in the manifest? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Reference:

<https://docs.microsoft.com/en-us/powerapps/developer/component-framework/manifest-schema-reference/css>

<https://docs.microsoft.com/en-us/powerapps/developer/component-framework/manifest-schema-reference/html>

NEW QUESTION # 56

A company uses Microsoft 365. You are developing a model-driven app.

The app must meet the following requirements:

* Use SharePoint Online for document storage.

* Send emails by using Exchange Online.

You need to configure integrations.

What should you configure? To answer, drag the appropriate configuration options to the correct requirements. Each configuration option may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

□

Answer:

Explanation:

Explanation:

Box 1: Server-side synchronization

Configure default email processing and synchronization: set server-side synchronization to be the default configuration method for newly created users.

Box 2: Server-side integration

If your organization is already using document management with Microsoft Dynamics CRM List Component, you must switch to server-based SharePoint integration.

If your organization has not deployed document management, when a System Administrator logs in an alert message will be displayed to enable server-based SharePoint integration.

NEW QUESTION # 57

You are developing a model-driven app for the purchasing department of an organization. You provision a new test environment and a security role. You select users to test the apps and assign the users to a security group named TestSG.

If the tests succeed, a manager will perform additional testing in the production environment and then publish the app for the organization's purchasing department.

You need to ensure that the test and production environments are configured correctly.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

□

Answer:

Explanation:

Explanation

Box 1: Set the test environment security group to TestSG and assign test users the app security role.

PowerApps apps use role-based security for sharing. The fundamental concept in role-based security is that a security role contains privileges that define a set of actions that can be performed within the app. All app users must be assigned to one or more predefined or custom roles.

Box 2: Assign the manager the app security role.

Box 3: Set the production environment security group to TestSG

Box 4: Add all users in the department to the TestSG security group.
