

C_ACDET_2506 Exam Pass Guide, Interactive C_ACDET_2506 Practice Exam

What's more, part of that Real4dumps C_ACDET_2506 dumps now are free: <https://drive.google.com/open?id=1Ds1Z7dKu7va8umfSr8Rc5q-0F7U0DTz->

You will be able to assess your shortcomings and improve gradually without having anything to lose in the actual SAP C_ACDET_2506 exam. You will sit through mock exams and solve actual SAP C_ACDET_2506 Dumps. In the end, you will get results that'll improve each time you progress and grasp the concepts of your syllabus.

SAP C_ACDET_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.
Topic 2	Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.
Topic 3	Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.

C_ACDET_2506 Exam Torrent & C_ACDET_2506 Study Materials & C_ACDET_2506 Actual Exam

With our C_ACDET_2506 learning quiz, the exam will be a piece of cake. And C_ACDET_2506 training materials serve as a

breakthrough of your entire career. Meanwhile, C_ACDET_2506 study guide provides you considerable solution through the exam and efficient acquaintance. By imparting the knowledge of the exam to those ardent exam candidates who are eager to succeed like you, our experts treat it as responsibility to offer help. So please prepare to get striking progress if you can get our C_ACDET_2506 Study Guide with following traits for your information.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q16-Q21):

NEW QUESTION # 16

Which SAP Ariba solutions are included in SAP Ariba Strategic Sourcing Suite? (Select 2 correct answers)

- A. SAP Ariba Supplier Lifecycle and Performance
- B. SAP Ariba Buying and Invoicing
- C. SAP Ariba Category Management
- D. SAP Ariba Contracts

Answer: A,D

Explanation:

The SAP Ariba Strategic Sourcing Suite typically includes SAP Ariba Contracts and SAP Ariba Supplier Lifecycle and Performance (SLP) solutions. These modules, along with SAP Ariba Sourcing and Supplier Risk, form the core sourcing suite for supplier management, contract lifecycle management, and performance analytics. Category Management and Buying and Invoicing belong to different SAP Ariba product suites focused on procurement and spend management rather than strategic sourcing.

NEW QUESTION # 17

How can you set the order of your custom Contract Workspace fields? Note: There are 2 correct answers to this question.

- A. Select Field Configuration and under the advanced tab select property Sequence. Fields are sorted by this field in the UL. Once all changes are performed, publish all changes via Customizing Publish.
- B. Navigate to the UI where the class is presented, select Customize in the banner, select Edit, and drag and drop the fields in the order they should be presented. Once all changes are performed, publish all changes via Customizing → Publish
- C. The fields are presented in alphabetical order of the field label. By carefully choosing the
- D. Select Field Configuration, find the class, and select the Layout tab. Here you can drag and drop the order of the fields. Once all changes are performed, publish all changes via Customizing Publish.

Answer: B,D

NEW QUESTION # 18

Which of the following applies to Suite Integration?

- A. Suite Integration is a key benefit of SAP Ariba Strategic Sourcing suite as they are natively integrated
- B. Suite Integration is the activity to integrate SAP Ariba Buying and Invoicing with an SAP Ariba Strategic Sourcing suite solution
- C. Suite Integration represents the out of the box integration between SAP Ariba Strategic Sourcing suite and S/4HANA Public Cloud
- D. Suite Integration refers to the process of manually connecting SAP Ariba applications with third-party software solutions.

Answer: A

NEW QUESTION # 19

A customer has requested that a Contracts field be added to an export event. After creating the field, assigning the appropriate checkbox in the advanced section, and publishing, this field still cannot be found in the export.

What can be done to rectify this? (Select 2 correct answers)

- A. Custom fields cannot be added to import/exports
- B. The data definition needs to be refreshed
- C. A custom visibility expression needs to be added stating isVisibleInExport == true

- **D. The field must be accepted and published in the data definition**

Answer: B,D

Explanation:

To ensure a custom Contracts field appears in export events, it must be accepted and published in the Data Definition within the Integration Manager, which formally exposes it for integrations (B). Also, the Data Definition should be refreshed (D) so that the export metadata is updated. A custom visibility expression is unnecessary, and custom fields can be added to import/export when configured correctly.

NEW QUESTION # 20

During verification in Production, a stakeholder reports that the imported form template appears outdated. What could be a likely reason for this?

- A. The Production site does not support custom form templates.
- **B. The Test site template was not the latest version when exported.**
- C. The Production site is missing certain parameter settings.
- D. The system automatically reverted the template to a previous version during import.

Answer: B

Explanation:

If an imported form template appears outdated in Production, the most common cause is that the version exported from Test was not the latest published version. SAP Ariba's export/import process is version-specific; only the selected version at export time is moved. If the latest updates weren't published or exported, Production will receive an older version.

SAP does not auto-revert templates to previous versions during import, and missing parameter settings typically do not affect template versions. Production supports custom templates as long as metadata and versions align.

Proper version control, including publishing the latest template version in Test before export, is essential to avoid this issue.

NEW QUESTION # 21

.....

To let the client be familiar with the atmosphere of the C_ACDET_2506 exam we provide the function to stimulate the exam and the timing function of our study materials to adjust your speed to answer the questions. We provide the stimulation, the instances and the diagrams to explain the hard-to-understand contents of our C_ACDET_2506 Study Materials. For these great merits we can promise to you that if you buy our C_ACDET_2506 study materials you will pass the test with few difficulties.
