Are you still satisfied with your present job? Do you still have the ability to deal with your job well? Do you think whether you have the competitive advantage when you are compared with people working in the same field? If your answer is no, you are a right place now. Because our C\_ACDET\_2506 exam torrent will be your good partner and you will have the chance to change your work which you are not satisfied with, and can enhance your ability by our C\_ACDET\_2506 Guide questions, you will pass the C\_ACDET\_2506 exam and achieve your target. Just free download the demo of our C\_ACDET\_2506 exam questions!

## SAP C\_ACDET\_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.</li> </ul>

This time set your mind at rest with the help of our C\_ACDET\_2506 guide quiz. You are free from any loss but focus on your success of the exam firmly this time. If you choose our nearly perfect C\_ACDET\_2506 practice materials with high quality and accuracy, our C\_ACDET\_2506 Training Questions can enhance the prospects of victory. Choosing our C\_ACDET\_2506 learning prep is the most useful way to improve your grade and chance to pass the exam.

### **SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q51-Q56):**

#### **NEW QUESTION # 51**

A French translation of a custom field label needs to be updated.

Where do you update it?

- A. Layout tab
- B. Customization Manager → Views
- C. AML & Translations Upload**
- D. Field Configuration Label

**Answer: C**

#### **NEW QUESTION # 52**

Which of the following applies in a Greenfield deployment scenario when migrating configurations from your test site?

- A. You can revert migrated configurations from the target site.
- B. If any configuration type fails during the migration process, you cannot create a new migration request.
- C. The status changes to Complete when migration is finished.**
- D. You cannot make other configuration updates in ICM when a migration operation is in progress.

**Answer: C,D**

Explanation:

During Greenfield migrations using the Intelligent Configuration Manager (ICM), no other configuration updates can be made in ICM while a migration operation is active to ensure stability and consistency of the migration bundle. Additionally, once the migration finishes successfully, the status updates to

"Complete", indicating the configuration is fully migrated and applied.

Contrary to option A, there is no built-in revert or rollback feature in ICM for deployed configurations; changes require new migration cycles. Option D is incorrect because if a migration fails, you can correct the issues and create a new migration request to retry. This process ensures controlled and orderly deployment of configurations.

### **NEW QUESTION # 53**

Which scenarios are applicable when moving templates from the test site to the production site by Intelligent Configuration Manager (ICM)? (Select 2 correct answers)

- A. Published templates with flex master data references in the test site are migrated to the production site during the first migration attempt.
- B. **New templates that successfully migrated to the production site are in Draft state.**
- C. Batch imports are available for templates when migrating configuration bundles.
- D. **Draft templates on the source site are skipped.**

**Answer: B,D**

Explanation:

ICM only migrates published templates; draft templates are skipped (A). When templates are imported into production, they arrive in draft state by default to allow review and publishing before use (C). Batch imports for templates (B) are not supported; migration is typically handled per template. Flex master data references require manual migration steps and are not migrated automatically during the initial template transfer (D).

### **NEW QUESTION # 54**

What is the key role of the SAP Deployment Lead assigned to the project?

- A. To Test and Validate the solution prior to go-live
- B. To perform configuration changes required to the SAP Ariba Strategic Sourcing suite solutions
- C. To advise the customer and partner in solution configurations
- D. **To act as the liaison between the customer and SAP Support in resolving technical issues and manage customer escalations**

**Answer: D**

### **NEW QUESTION # 55**

During verification in Production, a stakeholder reports that the imported form template appears outdated. What could be a likely reason for this?

- A. **The Test site template was not the latest version when exported.**
- B. The Production site is missing certain parameter settings.
- C. The system automatically reverted the template to a previous version during import.
- D. The Production site does not support custom form templates.

**Answer: A**

Explanation:

If an imported form template appears outdated in Production, the most common cause is that the version exported from Test was not the latest published version. SAP Ariba's export/import process is version-specific; only the selected version at export time is moved. If the latest updates weren't published or exported, Production will receive an older version.

SAP does not auto-revert templates to previous versions during import, and missing parameter settings typically do not affect template versions. Production supports custom templates as long as metadata and versions align.

Proper version control, including publishing the latest template version in Test before export, is essential to avoid this issue.

### **NEW QUESTION # 56**

.....

With the intense competition in labor market, it has become a trend that a lot of people, including many students, workers and so on, are trying their best to get a C\_ACDET\_2506 certification in a short time.
