- E. Key business decisions

Answer: A,C,E

These decisions affect the configuration and customization of the solution, and need to be documented and approved by the customer.

* D is correct because confirmation of scope is one of the findings that you document in the Explore Phase workshops. Confirmation of scope is the validation that the customer agrees with the scope items that are selected for their solution, and that they understand the functionality and limitations of each scope item. This helps to ensure that there are no misunderstandings or misalignments between the customer and the project team.

* E is correct because process models are one of the findings that you document in the Explore Phase workshops. Process models are graphical representations of the business processes that show the sequence of activities, roles, and systems involved in executing the process. Process models help to visualize and communicate the business requirements and scenarios, and identify any gaps or extensions that need to be addressed. Verified References:
