Now DumpsReview experts have developed a pertinent training program for SAP Certification C_BCBAI_2502 Exam, which can help you spend a small amount of time and money and 100% pass the exam at the same time.

SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite Sample Questions (Q16-Q21):

NEW QUESTION # 16
Which SAP module focuses on workplace safety and environmental compliance? Please choose the correct answer.

- A. SAP Predictive Analytics
- B. SAP Environment, Health, and Safety (EHS)
- C. SAP Financial Closing Cockpit

- D. SAP Business Network

Answer: B

Explanation:
SAP Environment, Health, and Safety (EHS) is the dedicated module for managing workplace safety and environmental compliance, ensuring organizations meet regulatory and sustainability standards. The correct answer is SAP Environment, Health, and Safety (EHS), as it is explicitly designed for this purpose.
SAP documentation states: "SAP Environment, Health, and Safety (SAP EHS) supports companies in managing workplace safety, environmental compliance, and sustainability initiatives. It helps organizations comply with global regulations, ensure safe working conditions, and track environmental performance." SAP EHS enables companies to "monitor workplace incidents, manage safety protocols, and report on environmental compliance," such as emissions and waste management, to meet regulatory requirements. For example, it supports "tracking and reporting environmental data" to ensure adherence to standards, aligning with SAP's sustainability-focused solutions.
The incorrect options are unrelated to workplace safety and environmental compliance. SAP Business Network focuses on supplier collaboration and procurement, not safety or compliance. SAP Financial Closing Cockpit is used for financial reporting, not environmental or safety management. SAP Predictive Analytics supports forecasting and trend analysis, not compliance. SAP EHS is the clear choice for this purpose, as confirmed by its role in SAP's sustainability portfolio.

NEW QUESTION # 17
How does SAP Ariba contribute to supply chain sustainability? Please choose the correct answer.

- A. By monitoring supplier risks and compliance
- B. By providing sales forecasting insights
- C. By tracking HR compliance
- D. By managing workforce training

Answer: A

Explanation:
SAP Ariba contributes to supply chain sustainability by enabling organizations to manage supplier relationships and ensure compliance with sustainability standards. The correct answer is "By monitoring supplier risks and compliance," as this is the primary way SAP Ariba supports sustainable supply chain practices.
SAP documentation explains: "SAP Ariba helps organizations build sustainable supply chains by monitoring supplier risks and ensuring compliance with environmental, social, and governance (ESG) standards." It provides tools to "assess supplier performance, track compliance with sustainability regulations, and mitigate risks related to unethical practices or environmental violations." For example, SAP Ariba's supplier risk management capabilities allow companies to evaluate suppliers based on sustainability criteria, ensuring responsible sourcing and reducing environmental impact. This aligns with SAP's broader sustainability goals, as seen in solutions like SAP Sustainability Control Tower.
The incorrect options are unrelated to SAP Ariba's role in supply chain sustainability. Managing workforce training is an HR function, typically handled by SAP SuccessFactors. Providing sales forecasting insights is a marketing function, not specific to SAP Ariba. Tracking HR compliance is also an HR task, not a supply chain function. SAP Ariba's focus on supplier management and compliance makes it the clear choice for this purpose.

NEW QUESTION # 18
Which SAP Business AI solutions are used for automating business workflows?
There are 2 correct answers to this question.
Response:

- A. SAP Conversational AI
- B. SAP Intelligent Robotic Process Automation (RPA)
- C. SAP SuccessFactors
- D. SAP Extended Warehouse Management

Answer: A,B

NEW QUESTION # 19

What are the benefits of SAP AI-driven predictive analytics? Note: There are 3 correct answers to this question.

- A. Automated anomaly detection
- B. Increased manual data entry
- C. Future trend forecasting
- D. Manual invoice processing
- E. Real-time decision-making insights

Answer: A,C,E

Explanation:

SAP AI-driven predictive analytics provides significant benefits by enabling organizations to anticipate trends, make informed decisions, and automate anomaly detection. The correct answers are future trend forecasting, real-time decision-making insights, and automated anomaly detection, as these are core benefits documented in SAP's AI portfolio.

SAP documentation states: "SAP Business AI offers predictive analytics to enhance decision-making, provide personalized insights, and improve business processes. It supports future trend forecasting, real-time decision- making, and automated anomaly detection across functions like finance, supply chain, and marketing." Future trend forecasting allows organizations to "predict customer demand, financial trends, and operational risks," as seen in SAP S/4HANA's forecasting of incoming payments. Real-time decision-making insights enable

"proactive responses to market changes" by analyzing live data, such as in SAP Integrated Business Planning.

Automated anomaly detection identifies "unusual patterns in financial transactions or supply chain operations," enhancing security and efficiency, as exemplified by SAP AI Business Services' fraud detection capabilities.

The incorrect options-increased manual data entry and manual invoice processing-are contrary to SAP's automation focus.

Predictive analytics aims to reduce manual efforts, not increase them, and manual invoice processing is replaced by solutions like SAP Cash Application. SAP's emphasis on AI-driven automation and insights, as seen in case studies like Henkel's supply chain optimization, confirms the selected benefits.

NEW QUESTION # 20

What are some benefits of SAP Signavio's Al-assisted process analyzer, text to insights?
There are 3 correct answers to this question.
Response:

- A. Correlation and anomaly detection consumable by business users
- B. Self-service approach to define initial process monitoring framework
- C. No need for consulting-heavy services to define the first process draft to start the modeling activity
- D. Democratized approach to process mining
- E. Increased accuracy and relevance of the analysis output based on business user prompts

Answer: A,D,E

NEW QUESTION # 21

......

Our C_BCBAI_2502 practice materials are your optimum choices which contain essential know-hows for your information. If you really want to get the certificate successfully, only C_BCBAI_2502 practice materials with intrinsic contents can offer help they are preeminent materials can satisfy your both needs of studying or passing with efficiency. You may strand on some issues at sometimes, all confusions will be answered by their bountiful contents. Wrong choices may engender wrong feed-backs, we are sure you will come a long way by our C_BCBAI_2502 practice material.
