NEW QUESTION # 52

How does SAP AI improve financial forecasting and reporting? Note: There are 3 correct answers to this question.

- A. AI-powered predictive analytics for financial trends
- B. AI-based anomaly detection in financial transactions
- C. Conversational AI for customer service automation
- D. SAP Blockchain for invoice validation
- E. Automated financial risk assessment

Answer: A,B,E

Explanation:

SAP AI enhances financial forecasting and reporting by leveraging advanced analytics, automation, and anomaly detection to improve accuracy and mitigate risks. The correct answers are AI-powered predictive analytics for financial trends, automated financial risk assessment, and AI-based anomaly detection in financial transactions, as these are core functionalities documented in SAP's financial AI solutions.

SAP documentation states: "SAP AI in finance, embedded in solutions like SAP S/4HANA, improves financial forecasting and reporting through predictive analytics, automated risk assessment, and anomaly detection." AI-powered predictive analytics enables "forecasting expected incoming payments and financial trends" by analyzing historical and real-time data, as seen in SAP Collections Management. Automated financial risk assessment uses AI to "evaluate financial risks automatically," such as identifying high-risk accounts or potential cash flow issues, enhancing decision-making. AI-based anomaly detection supports "identifying unusual patterns in financial transactions," such as potential fraud, through solutions like SAP Cash Application, which mitigates financial losses.

The incorrect options-conversational AI for customer service automation and SAP Blockchain for invoice validation-are not relevant to financial forecasting and reporting. Conversational AI, powered by Joule, is designed for customer interactions, not financial processes. SAP Blockchain for invoice validation focuses on secure transactions, not forecasting or reporting. SAP's emphasis on AI-driven financial solutions, as seen in case studies like SAP S/4HANA Finance, confirms the selected functionalities.
