We can promise that the three different versions of our C_BCBTM_2509 exam questions are equipped with the high quality.

SAP Certified Associate - Positioning SAP Business Transformation Management Solutions Sample Questions (Q25-Q30):

NEW QUESTION # 25

How does the SAP Signavio Process Collaboration Hub help organizations?

- **A. By providing transparency into processes and enabling collaboration.**
- B. By creating marketing strategies based on customer feedback.
- C. By automatically generating legal compliance reports and enabling collaboration.
- D. By replacing existing process modeling tools with AI-driven automation.

Answer: A

Explanation:

The SAP Signavio Process Collaboration Hub is designed to make business processes transparent and accessible across the organization while fostering collaboration among stakeholders.

"The SAP Signavio Process Collaboration Hub provides a central entry point for all users to access, share, and collaborate on process-related information, offering transparency across business processes." Reference:

It allows employees, analysts, and management to view, discuss, and contribute to process improvement initiatives, supporting collaborative transformation and process governance.

"It enables everyone in the organization to access process information, provide feedback, and collaborate for continuous improvement." Options A, C, and D are incorrect:

A: Compliance reporting is not a function of Collaboration Hub.

C: Marketing strategy and customer feedback analysis are outside its purpose.

D: It does not replace modeling tools; it integrates with Process Manager and Process Intelligence.

Thus, the correct and SAP-verified answer is B: By providing transparency into processes and enabling collaboration.

NEW QUESTION # 26

What are the main use cases for SAP Signavio and SAP LeanIX solutions?

- **A. Enabling business transformation and continuous excellence.**
- B. Expanding product offerings and portfolio management.
- C. Enhancing customer service and managing digital supply chain.
- D. Improving financial management and material management.

Answer: A

Explanation:

The SAP Signavio and SAP LeanIX solutions are foundational components of SAP Business Transformation Management (BTM). Their main purpose is to enable enterprise-wide transformation, continuous optimization, and operational excellence by connecting business processes and IT architecture.

"The combined use of SAP Signavio and SAP LeanIX empowers organizations to enable business transformation through a comprehensive view of processes, applications, and technology, driving continuous excellence and improvement." Reference: SAP Signavio provides business process intelligence, while SAP LeanIX delivers enterprise architecture transparency. Together, they support organizations in transforming operations, modernizing IT landscapes, and achieving long-term performance improvement.

"SAP Signavio and SAP LeanIX support use cases centered around continuous business transformation, providing insights that align business goals with IT strategies." Incorrect Options:

B: Product portfolio management is managed under SAP PLM, not BTM solutions.

C: Supply chain management is covered by SAP Digital Supply Chain applications, not LeanIX or Signavio.

D: Financial and material management belong to SAP S/4HANA core ERP modules.

Verified Correct answer: A: Enabling business transformation and continuous excellence.

NEW QUESTION # 27

What is the primary purpose of WalkMe's Digital Adoption Platform (DAP)?

- A. To implement advanced hardware solutions
- B. To manage payroll systems efficiently
- C. To automate recruitment processes
- **D. To reduce digital friction and guide users through complex software**

Answer: D

Explanation:

The WalkMe Digital Adoption Platform (DAP) is designed to improve the user experience by reducing friction when interacting with digital systems. It provides on-screen guidance, automation, and analytics that help users complete tasks accurately and efficiently.

"The primary purpose of WalkMe's Digital Adoption Platform is to reduce digital friction and guide users through complex software environments using AI-powered, context-aware assistance." Reference:

The platform enhances employee productivity, adoption success, and process efficiency across SAP and third-party applications by simplifying navigation and ensuring process compliance.

"WalkMe DAP provides contextual guidance directly within applications, enabling users to execute digital workflows with minimal errors or training." Incorrect Options:

A: WalkMe is software-based, not a hardware solution.

B: Recruitment automation is part of SAP SuccessFactors, not WalkMe.

D: Payroll management is unrelated to WalkMe's purpose.

Verified Correct answer: C: To reduce digital friction and guide users through complex software.

NEW QUESTION # 28

What unique technology powers WalkMe's AI-first Digital Adoption Platform (DAP), enabling it to understand application context and drive adoption success?

- A. FedRAMP Certified Platform
- **B. DeepUI Technology**
- C. Library of Pre-Made Content
- D. SAP Ecosystem Integration

Answer: B

Explanation:

DeepUI Technology is the core AI capability within WalkMe's Digital Adoption Platform (DAP). It enables the platform to understand, interpret, and interact with user interfaces dynamically without requiring code-level integration.

"WalkMe's DeepUITM technology leverages AI to recognize and interact with any user interface element, allowing context-aware guidance and automation across applications." Reference:

Within SAP's BTM context, DeepUI allows WalkMe to seamlessly overlay SAP applications, providing real-time assistance and ensuring users complete digital processes correctly - a core aspect of digital adoption enablement.

"DeepUI powers WalkMe's AI-first approach, enabling contextual understanding of SAP Fiori, S/4HANA, and other applications for consistent adoption experiences." Option B (SAP Ecosystem Integration) describes compatibility, not the underlying AI engine.

Option C (Library of Pre-Made Content) is a feature, not a technology.

Option D (FedRAMP Certified Platform) refers to compliance for U.S. federal systems, not functionality.

Therefore, the verified and accurate answer based on SAP BTM and WalkMe documentation is A: DeepUI Technology.

NEW QUESTION # 29

What primary issue does WalkMe's solution aim to solve for customers?

- A. Need for upgrading physical infrastructure in organizations
- B. Difficulty in maintaining accurate financial records
- C. High employee turnover rates
- **D. Challenges in adopting and effectively using digital tools**

Answer: D

Explanation:

The WalkMe Digital Adoption Platform (DAP), which is integrated into SAP's Business Transformation Management (BTM) solutions, primarily addresses the challenge of digital adoption - helping users effectively utilize enterprise software and workflows.

"WalkMe is designed to eliminate user friction with digital systems by providing contextual, in-application guidance and automation that accelerates digital adoption." Reference:

The main problem WalkMe solves is difficulty in adopting and effectively using digital tools, which directly impacts productivity, process efficiency, and transformation success.

"Organizations struggle with the complexity of modern applications; WalkMe's solution enables users to navigate and complete digital processes successfully without training dependency." Options B, C, and D do not represent the platform's focus:

WalkMe is not an HR solution to reduce turnover (B).

It does not manage physical infrastructure (C).

It does not handle financial record accuracy (D).

The central goal, as reinforced in SAP BTM documentation, is to bridge the gap between technology implementation and effective user adoption - making A the correct and verified answer.

NEW QUESTION # 30

.....
