C_BW4H_2505 Latest Exam Dumps, C_BW4H_2505 Valid Torrent

As the authoritative provider of C_BW4H_2505 guide training, we can guarantee a high pass rate compared with peers, which is also proved by practice. Our good reputation is your motivation to choose our learning materials. We guarantee that if you under the guidance of our C_BW4H_2505 study tool step by step you will pass the exam without a doubt and get a certificate. Our C_BW4H_2505 Learning Materials are carefully compiled over many years of practical effort and are adaptable to the needs of the C_BW4H_2505 exam. We firmly believe that you cannot be an exception.

SAP Certified Associate - Data Engineer - SAP BW/4HANA Sample Questions (Q64-Q69):

NEW QUESTION # 64

You have already loaded data from a non-SAP system into . You want to federate this data with data from an InfoCube of your SAP BW powered by SAP HANA. What do you need to use to combine the data?

- A. SAP BW Remote Migration
- B. SAP BW/4HANA Model Transfer
- C. SAP BW Shell Migration
- D. SAP ABAP Connection**

Answer: D

NEW QUESTION # 65

Where is the button that automatically generates a process chain?

- A. In the editor of a data flow object**
- B. In the editor of a data transfer process
- C. In the SAP GUI transaction for Process Chain Maintenance
- D. In the app called Process Chain Editor

Answer: A

Explanation:

In SAP BW/4HANA, process chains are used to automate and schedule tasks such as data loads, transformations, and activations. The ability to automatically generate a process chain is available in specific editors within the SAP BW/4HANA environment. Below

is an explanation of the correct answer:

D). In the editor of a data flow objectThe data flow object in SAP BW/4HANA represents the end-to-end flow of data from source to target. When working with data flow objects (e.g., in the Data Flow Editor), you can automatically generate a process chain by clicking a dedicated button. This feature simplifies the creation of process chains by analyzing the data flow and creating the necessary steps (e.g., extraction, transformation, loading, and activation) in the process chain.

* Steps to Generate a Process Chain:

* Open the data flow object in the Data Flow Editor.

* Locate the "Generate Process Chain" button (usually represented by a chain icon).

* Click the button to automatically create a process chain based on the defined data flow.

1: The SAP BW/4HANA Modeling Guide highlights this functionality as part of the data flow modeling capabilities. It emphasizes that the automatic generation of process chains is tightly integrated into the data flow editor for ease of use.

Incorrect OptionsA. In the app called Process Chain EditorWhile the Process Chain Editor is used to manually create or modify process chains, it does not have a button to automatically generate a process chain based on a data flow. The Process Chain Editor is primarily used for editing existing chains rather than generating new ones.

Reference: The SAP BW/4HANA documentation specifies that the Process Chain Editor is a manual tool for managing process chains, not for automatic generation.

B). In the editor of a data transfer processThe editor for a Data Transfer Process (DTP) allows you to configure data extraction, transformation, and loading between objects. However, it does not include a button to automatically generate a process chain. While DTPs are often part of process chains, their editor focuses on individual DTP configurations rather than generating entire chains.

Reference: The SAP BW/4HANA Data Transfer Process Guide confirms that DTP editors are limited to configuring individual processes, not generating full process chains.

C). In the SAP GUI transaction for Process Chain MaintenanceThe SAP GUI transaction for Process Chain Maintenance (e.g., RSPC) is used to manage and monitor process chains. However, it does not provide a button to automatically generate a process chain. This transaction is primarily for maintaining existing chains rather than creating new ones.

Reference: The SAP BW/4HANA Administration Guide states that the Process Chain Maintenance transaction is focused on monitoring and manual adjustments, not automatic generation.

ConclusionThe correct location of the button that automatically generates a process chain is:In the editor of a data flow object. This functionality streamlines the creation of process chains by leveraging the predefined data flow, ensuring that all necessary steps are included in the chain.

NEW QUESTION # 66

What are the prerequisites for deleting business partner attribute master data in SAP BW/4HANA? Note:

There are 2 correct answers to this question.

- A. There must be no BW query as InfoProvider in SAP BW/4HANA that uses business partner as a free characteristic.
- B. **There must be no transaction data in a DataStore Object (advanced) referring to business partner values that should be deleted.**
- C. **In SAP BW/4HANA there must be no hierarchy data related to business partner values that should be deleted.**
- D. In SAP BW/4HANA there must be no analysis authorizations related to business partner values that should be deleted

Answer: B,C

NEW QUESTION # 67

You want to build an SAP HANA HDI calculation view of data category CUBE, but you get a "no measure defined" error. For the business requirement, a measure does not make sense. Besides changing the data category to DIMENSION, what do you have to do?

- A. Switch from an aggregation node to a star join node.
- B. Switch from a projection node to a star join node.
- C. Switch from an aggregation node to a projection node.
- D. **Switch from a projection node to an aggregation node.**

Answer: D

NEW QUESTION # 68

You created an Open ODS View on an SAP HANA database table to virtually consume the data in SAP BW /4HANReal-time reporting requirements have now changed you are asked to persist the data in SAP BW

/4HANA. Which objects are created when using the "Generate Data Flow" function in the Open ODS View editor? Note: There are 3 correct answers to this question.

- A. CompositeProvider
- B. SAP HANA calculation view
- C. Data source
- D. Transformation
- E. DataStore object (advanced)

Answer: C,D,E

NEW QUESTION # 69

.....

Three versions for C_BW4H_2505 test materials are available, and you can choose the most suitable one according to your own needs. C_BW4H_2505 PDF version is printable, and if you prefer to practice on paper, this version must be your taste.

C_BW4H_2505 Soft test engine can stimulate the real exam environment, and you can know the procedures for the exam, and your confidence will be strengthened. C_BW4H_2505 Online Test engine supports all web browsers and it also supports Android and iOS etc. This version can give you a general review of what you have learnt last time.
