If you are craving for getting promotion in your company, you must master some special skills which no one can surpass you. To suit your demands, our company has launched the C_CPI_2506 exam materials especially for office workers. For on one hand, they are busy with their work, they have to get the C_CPI_2506 Certification by the little spread time. On the other hand, it is not easy to gather all of the exam materials by themselves. So our C_CPI_2506 study questions are their best choice.

SAP C_CPI_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	Managing APIs: This section of the exam measures the skills of Solution Architects and focuses on managing APIs within the SAP ecosystem. It covers topics such as API provisioning, lifecycle management, security policies, and monitoring, ensuring candidates can handle APIs effectively for enterprise integration needs.
Topic 2	SAP Event Mesh: This section of the exam measures the skills of Solution Architects and centers on using SAP Event Mesh to support event-driven integration. It highlights the importance of asynchronous communication, event publishing, and subscription models, allowing organizations to build scalable and decoupled systems.

Topic 3	Implementing Cloud Integration: This section of the exam measures the skills of Integration Consultants and examines how cloud integration flows are designed and deployed. It emphasizes creating integration scenarios, handling connectivity, and applying best practices to build efficient, secure, and reliable integration processes in SAP's cloud environment.
Topic 4	SAP Integration Suite Overview: This section of the exam measures the skills of Integration Consultants and covers the foundational concepts of the SAP Integration Suite. It provides an understanding of the suite's capabilities, its role in connecting applications, and its relevance in modern cloud-based integration scenarios.

C_CPI_2506 Discount Code | C_CPI_2506 Exam Tutorials

Our C_CPI_2506 exam questions are totally revised and updated according to the changes in the syllabus and the latest developments in theory and practice. We carefully prepare the C_CPI_2506 test guide for the purpose of providing high-quality products. All the revision and updating of products can graduate the accurate information about the C_CPI_2506 Guide Torrent you will get, let the large majority of student be easy to master and simplify the content of important information. Our product C_CPI_2506 test guide delivers more important information with fewer questions and answers.

SAP Certified Associate - Integration Developer Sample Questions (Q10-Q15):

NEW QUESTION # 10

What does an API consumer do?

- A. It provides an interface.
- B. It invokes an interface.
- C. It provides the server-side implementation of an interface.

Answer: B

Explanation:

An API consumer is an application or system that invokes an interface provided by an API provider. An API consumer uses the interface to access or manipulate data or functionality exposed by the API provider. An API consumer can be a web browser, a mobile app, a cloud service, or any other client that can send requests and receive responses from an API provider. Reference: Integration Software | SAP Integration Suite, Modernize Integration with SAP Integration Suite | openSAP

NEW QUESTION # 11

You are using a Data store Operation of the type Write. Which parameter must you select to avoid duplicate entries?

- A. Encrypted stored Message
- B. Overwrite Existing Message
- C. Retention Threshold for Alerting
- D. Include Message Headers

Answer: B

Explanation:

In a Data Store Write operation:

If multiple messages are written with the same Entry ID, enabling Overwrite Existing Message ensures that the previous entry is replaced, avoiding duplicate records.

Other options:

Encrypted Stored Message # Secures data, not related to duplicates.

Include Message Headers # Controls storage of headers, not duplication.

Retention Threshold for Alerting # Configures alerts, not duplication.

Thus, the parameter required to avoid duplicates is Overwrite Existing Message.

NEW QUESTION # 12

Which of the following can you use for an XSLT mapping in an integration flow?

- A. PHP
- **B. XML**
- C. HTML
- D. JSON

Answer: B

Explanation:

To use an XSLT mapping in an integration flow, you must use XML as the input and output format. XSLT stands for Extensible Stylesheet Language Transformations, which is a language for transforming XML documents into other XML documents or other formats. An XSLT mapping consists of an XSLT stylesheet that defines the rules for transforming the source XML document into the target XML document. You can use an XSLT mapping step in an integration flow to apply an XSLT transformation to the message body. Reference: XSLT Mapping | SAP Help Portal, XSLT - W3Schools

NEW QUESTION # 13

Which data store operation can you use to save a customer ID?

- A. POST
- B. SELECT
- **C. WRITE**
- D. GET

Answer: C

Explanation:

In SAP Cloud Integration (part of Integration Suite), the Data Store operations allow temporary or persistent storage of messages for asynchronous processing or correlation.

WRITE # Used to save/store data (e.g., Customer ID) in the Data Store.

GET # Retrieves stored data.

SELECT # Reads stored data with filters.

POST # Not a valid Data Store operation in SAP CPI (it's an HTTP verb).

Hence, to save a customer ID, the correct operation is WRITE.

NEW QUESTION # 14

To activate the Event Mesh (EMIS) capability in the SAP Integration Suite, which role collections must be assigned to the user performing the activation?

- A. Process_orchestrator and Subaccount_Viewer
- B. API_Manager and Monitoring_Viewer
- C. Integration_Administrator and Security_Auditor
- **D. Integration_Provisioner and Subaccount Administrator**

Answer: D

Explanation:

To activate Event Mesh (EMIS) capability in SAP Integration Suite, the required role collections are:

Integration_Provisioner # Allows provisioning of new capabilities (including Event Mesh) in Integration Suite.

Subaccount Administrator # Grants permission to manage and configure subaccount-level entitlements and service activations.

Other options:

Integration_Administrator, API_Manager, Monitoring_Viewer # Used for operational tasks, not provisioning.

Process_orchestrator # Refers to on-premise PI/PO, not BTP roles.

Security_Auditor # Auditing role, not activation.

Thus, the correct roles are Integration_Provisioner and Subaccount Administrator.

NEW QUESTION # 15

.....

Before the clients decide to buy our C_CPI_2506 test guide they can firstly be familiar with our products. The clients can understand the detailed information about our products by visiting the pages of our products on our company's website. Firstly you could know the price and the version of our C_CPI_2506 study question, the quantity of the questions and the answers. Secondly you could look at the free demos of our C_CPI_2506 learning prep to see if the questions and the answers are valuable. And our pass rate of C_CPI_2506 exam questions is more than 98%.
