

C_IBP_2502 Echte Fragen - C_IBP_2502 Testantworten

C_IBP_2502	
Duration:	180 minutes
Number of Questions:	80
Passing Score:	73% cut score
Format:	Multiple Choice & Multiple Response
Languages:	English only

Qualitativ hochwertige C_IBP_2502 Prüfungsunterlagen. Gehen Sie einen entscheidenden Schritt weiter. Mit der SAP C_IBP_2502 Zertifizierung erhalten Sie einen Nachweis Ihrer besonderen Qualifikationen und eine Anerkennung für Ihr technisches Fachwissen. SAP bietet eine Reihe verschiedener Zertifizierungsprogramme für professionelle Benutzer an. Untersuchungen haben gezeigt, dass zertifizierte Fachleute häufig mehr verdienen können als ihre Kollegen ohne Zertifizierung.

SAP C_IBP_2502 Prüfungsplan:

Thema	Einzelheiten
Thema 1	Analytics and Reporting: This section evaluates the expertise of reporting specialists in generating and interpreting reports within SAP. It covers key analytical tools and reporting functions that provide insights into planning performance. Candidates will be assessed on their ability to extract, analyze, and present data effectively to support business decisions.
Thema 2	Model Sales & Operations Processes: This section targets operations managers and evaluates knowledge of sales and operations planning. It covers the alignment of supply and demand, scenario planning, and decision-making processes to optimize operational efficiency. Candidates will be assessed on their ability to configure models that support strategic business goals.
Thema 3	General Configuration of a Planning Area: This section is aimed at SAP solution consultants and covers the configuration of a planning area. It includes defining key planning parameters, setting up structures, and ensuring the system is configured to meet business needs. Candidates will be tested on their ability to customize planning areas for optimal performance.
Thema 4	Planning Operators & Application: Jobs This section is designed for demand planners and focuses on the configuration and execution of planning operators and application jobs. It includes an understanding of how these tools automate planning processes and improve system performance. Candidates will be tested on their ability to configure and execute jobs that support various planning functions.
Thema 5	Key Figures & Attributes: This section of the exam measures the skills of supply chain analysts and focuses on the key figures and attributes used in planning. It covers how to define and configure key figures to ensure accurate data representation and decision-making. Candidates are also tested on their ability to manage attributes that support various planning scenarios.

C_IBP_2502 Testantworten, C_IBP_2502 Dumps Deutsch

Mit langjähriger Forschung im Gebiet der IT-Zertifizierungsprüfung spielen wir PrüfungFrage eine führende Rolle in diesem Gewerbe.

Die Softwares, die wir entwickeln, sind umfassend und enthalten große Menge Prüfungsaufgaben. SAP C_IBP_2502 Prüfungssoftware ist eine der Bestseller. Sie hilft gut die Prüfungsteilnehmer, die SAP C_IBP_2502 zu bestehen. Und es ist allgemein bekannt, dass mit die SAP C_IBP_2502 Zertifizierung wird Ihre Karriere im IT-Gewerbe leichter sein!

SAP Certified Associate - SAP IBP for Supply Chain C_IBP_2502 Prüfungsfragen mit Lösungen (Q19-Q24):

19. Frage

What are some of the actions configurators can do when working with versions? Note: There are 2 correct answers to this question.

- **A. Copy master data from base version to other version**
- B. Delete key figure data for a date range for all versions at once
- C. Run an application job to purge obsolete versions
- **D. Copy key figure data from any version to any version**

Antwort: A,D

Begründung:

Versions in SAP IBP (e.g., baseline, scenario) allow what-if planning, with configurators managing data across them, per SAP IBP's version management documentation.

* Option A: Delete key figure data for a date range for all versions at once This is incorrect. Purge jobs delete data per version, not across all versions simultaneously in one action.

* Option B: Copy key figure data from any version to any version This is correct. The Copy Operator can transfer key figure data between any versions (e.g., baseline to scenario), a standard feature, per SAP IBP's documentation.

* Option C: Copy master data from base version to other version This is correct. Master data can be copied from the base version to other versions via the Manage Versions app or data integration, per SAP IBP's version setup.

* Option D: Run an application job to purge obsolete versions This is incorrect. Versions are managed manually or via expiration, but there's no specific job to "purge obsolete versions"; data purging is separate.

Thus, B and C are valid actions, per SAP IBP's official version capabilities.

20. Frage

What are some of the prerequisites for configuring a planning area that results in a successful consistency check? Note: There are 2 correct answers to this question.

- **A. Assign the compound master data type and its component master data types**
- B. Configure at least one calculated key figure for the planning area
- **C. Specify a planning horizon in the planning area for each level of the assigned time profile**
- D. Configure at most two input key figures on the same planning level in a key figure calculation

Antwort: A,C

Begründung:

A successful consistency check in SAP IBP ensures the planning area's configuration is valid, per SAP IBP's documentation.

* Option A: Configure at least one calculated key figure for the planning area This is incorrect.

Calculated key figures are optional; a planning area can function with only stored key figures.

* Option B: Specify a planning horizon in the planning area for each level of the assigned time profile This is correct. The planning horizon (e.g., past/future periods) must align with the time profile levels (e.g., week, month) for data consistency, a prerequisite, per SAP IBP's setup.

* Option C: Configure at most two input key figures on the same planning level in a key figure calculation This is incorrect. There's no such limit; calculations can use multiple inputs, depending on complexity.

* Option D: Assign the compound master data type and its component master data types This is correct. Compound types (e.g., SOURCECUSTOMER) and their components (e.g., Customer, Location) must be assigned for network consistency, per SAP IBP's documentation.

Thus, B and D are prerequisites, per SAP IBP's official consistency check requirements.

21. Frage

You need to make manual adjustments to your S&OP plan. Which are possible ways of making these changes? Note: There are 2 correct answers to this question.

- A. Using Driver-Based Planning
- **B. Using Microsoft Excel planning views**
- **C. Leveraging the web-based planning capability**
- D. Leveraging the functionality of SAP Work Zone

Antwort: B,C

Begründung:

Manual adjustments to an S&OP plan in SAP IBP involve editing key figures, supported by specific UIs, per SAP IBP's S&OP documentation.

* Option A: Leveraging the web-based planning capability This is correct. The Planner Workspaces app (web-based) allows manual adjustments to key figures (e.g., demand plans), a standard feature, per SAP IBP's UI capabilities.

* Option B: Leveraging the functionality of SAP Work Zone This is incorrect. SAP Work Zone is a collaboration platform, not a planning tool for S&OP adjustments in IBP.

* Option C: Using Microsoft Excel planning views This is correct. The Excel add-in's planning views are the primary interface for manual S&OP adjustments (e.g., editing Consensus Demand), per SAP IBP's documentation.

* Option D: Using Driver-Based Planning This is incorrect. Driver-Based Planning is a methodology (e.g., linking demand to drivers), not a direct manual adjustment method.

Thus, A and C are valid ways, per SAP IBP's official planning interfaces.

22. Frage

What are some of the available ABC segmentation methods in SAP IBP? Note: There are 2 correct answers to this question.

- **A. By Number of Items (Sorted Value)**
- B. By Pareto Principle (Sorted and Calculated Values)
- C. By Number of Items (Sorted Average)
- **D. By Pareto Principle (Sorted and Cumulated %)**

Antwort: A,D

Begründung:

ABC segmentation in SAP IBP classifies items (e.g., products) based on value or volume, using methods in the ABC/XYZ Segmentation app, per SAP IBP's demand planning documentation.

* Option A: By Number of Items (Sorted Average) This is incorrect. "Sorted Average" is not a standard ABC method; it's not defined in SAP IBP's segmentation options.

* Option B: By Pareto Principle (Sorted and Cumulated %) This is correct. The Pareto Principle (80/20 rule) sorts items by value (e.g., revenue) and cumulates percentages (e.g., top 20% = A), a standard method, per SAP IBP's documentation.

* Option C: By Number of Items (Sorted Value) This is correct. Sorting by value (e.g., total sales) and assigning classes (A, B, C) based on item count thresholds is a supported ABC method, per SAP IBP's segmentation features.

* Option D: By Pareto Principle (Sorted and Calculated Values) This is incorrect. "Calculated Values" is vague and not a distinct method; B covers the Pareto approach accurately.

Thus, B and C are available ABC methods, per SAP IBP's official segmentation capabilities.

23. Frage

You are implementing a demand process in SAP IBP for sales and operations, and consider using the standard forecast key figures available in the sample planning area SAPIBP1. What are the first and last key figures in the logical progression of demand in the S&OP process?

- A. Local Demand Plan first and Consensus Demand Plan Qty last
- **B. Statistical Forecast Qty first and Consensus Demand Plan Qty last**
- C. Local Demand Plan first and Combined Final Demand last
- D. Statistical Forecast Qty first and Global Demand Plan Qty for S&OP last

Antwort: B

Begründung:

In SAP IBP for Sales and Operations Planning (S&OP), the demand planning process follows a logical progression of key figures, as exemplified in the sample planning area SAPIBP1. This progression starts with raw forecast data and ends with an agreed-upon

demand plan.

* Option A: Local Demand Plan first and Combined Final Demand last "Local Demand Plan" is not a standard key figure in SAPIBP1; it's a vague term. "Combined Final Demand" is also not a recognized key figure. This option misaligns with the S&OP process flow.

* Option B: Statistical Forecast Qty first and Consensus Demand Plan Qty last This is correct. In SAPIBP1, the demand process begins with Statistical Forecast Qty (e.g., generated via statistical models like moving average or exponential smoothing), representing the initial unconstrained forecast.

The process progresses through adjustments (e.g., manual overrides, market inputs) and collaboration, culminating in Consensus Demand Plan Qty, the final agreed-upon demand plan after S&OP meetings.

This reflects SAP IBP's S&OP workflow: forecast generation # review # consensus.

* Option C: Local Demand Plan first and Consensus Demand Plan Qty last As noted, "Local Demand Plan" is not a standard key figure in SAPIBP1 or S&OP terminology, making this incorrect despite the valid end point.

* Option D: Statistical Forecast Qty first and Global Demand Plan Qty for S&OP last While

"Statistical Forecast Qty" is a valid starting point, "Global Demand Plan Qty for S&OP" is not a standard key figure in SAPIBP1.

The correct term is "Consensus Demand Plan Qty," which is more specific to the S&OP output.

Thus, B aligns with SAP IBP's S&OP demand planning progression per SAPIBP1's standard key figures and official S&OP process documentation.

24. Frage

.....

Prüfung Frage hat sich stetig entwickelt. Unsere Antriebe werden von unseren Kunden, die mit Hilfe unserer Produkte die IT-Zertifizierung erworbt haben, gegeben. Heute wird die SAP C_IBP_2502 Prüfungssoftware von zahllosen Kunden geprüft und anerkannt. Die Software hilft ihnen, die Zertifizierung der SAP C_IBP_2502 zu erwerben. Auf unserer offiziellen Webseite können Sie die Demo kostenfrei downloaden und probieren. Wir erwarten Ihre Anerkennung. Innerhalb einem Jahr nach Ihrem Kauf werden wir Ihnen Informationen über den Aktualisierungsstand der SAP C_IBP_2502 rechtzeitig geben. Ihre Vorbereitungsprozess der Prüfung wird deshalb bestimmt leichter!
