SAP C_S4CPB_2502 Exam Syllabus Topics:

Topic	Details
Topic 1	• Introduction to Cloud Computing and SAP Cloud ERP Basics: This section of the exam measures skills of ERP Implementation Project Manager and assesses foundational knowledge of cloud computing principles and SAP Cloud ERP structure. It ensures understanding of key differences from on-premise ERP, cloud deployment benefits, and basic navigation of cloud ERP systems.
Topic 2	• System Landscapes and Identity Access Management: This section of the exam measures skills of SAP Cloud ERP Consultant and involves understanding SAP's system landscape in the cloud, including tenants and environments. It also focuses on identity and access management, covering how user roles, permissions, and security are managed across the cloud ecosystem.

Topic 3	• Data Migration and Business Process Testing: This section of the exam measures skills of SAP Cloud ERP Consultant and evaluates the ability to plan and execute data migration strategies and validate business processes through structured testing. Candidates are expected to be familiar with tools and methods for importing legacy data and confirming its integrity post-migration.
Topic 4	• Configuration and the SAP Fiori Launchpad: This section of the exam measures skills of SAP Cloud ERP Consultant and focuses on setting up system configurations in SAP Cloud ERP and understanding how to manage user navigation and interface personalization through the SAP Fiori Launchpad. It tests the consultant's ability to configure and align user experience with business roles.
Topic 5	• Extensibility and Integration: This section of the exam measures skills of SAP Cloud ERP Consultant and deals with the capabilities of extending SAP applications to meet custom business requirements and integrating with other systems or services. The focus is on knowing when to extend standard functionality and how to ensure smooth system integration in a cloud context.

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q10-Q15):

NEW QUESTION # 10

You have assigned a business role to an end user who has been granted access to only one specific application. While you have a day off, it turns out that the app doesn't show up on the user's launchpad. What can the user do?

- A. Assign a different business role that provides access.
- B. Assign a launchpad space to the business role.
- C. Create a page and assign it to the launchpad space.
- **D. Use the search function to find the app.**

Answer: D

Explanation:

When an end user has been assigned a business role that grants access to only one specific application, and the app does not appear on the user's SAP Fiori Launchpad, the recommended action for the user is:

* Use the search function to find the app: The search function on the SAP Fiori Launchpad allows users to locate applications by their name or related keywords. Even if the app is not immediately visible on the launchpad due to configuration issues or other reasons, using the search function can help the user access the app directly. This is a quick and effective way for users to access necessary applications when they encounter visibility issues on their launchpad.

NEW QUESTION # 11

How can you define the relationship between business roles and business catalogs?

- A. A business role restricts access to one or more business catalogs.
- **B. A business role is a collection of one or more business catalogs.**
- C. A business catalog restricts access to one or more business roles.

- D. A business catalog is a collection of one or more business roles.

Answer: B

Explanation:

A business role is assigned to a business user to provide access to business tasks. A business role can contain one or more business catalogs, which are predefined by SAP and contain the actual authorizations that allow users to access the apps contained in the catalog. Each business catalog bundles authorizations for a specific business area. You can tailor the access according to the needs of the business and for compliance purposes using restrictions. NEW QUESTION # 12

Where is the initial list of known integrations documented?

- A. In the Business Driven Configuration Questionnaire
- **B. In the Digital Discovery Assessment**
- C. In SAP Cloud ALM
- D. In the Fit-to-Standard Workshops

Answer: B

NEW QUESTION # 13

Based on the SAP Activate methodology, which activities must you perform in the Explore phase? Note: There are 2 correct answers to this question.

- **A. Conduct the Fit-to-Standard analysis to gather configuration values.**
- B. Define the organizational structure and chart of accounts.
- **C. Use the Test system to demonstrate SAP Best Practice processes.**
- D. Conduct the Digital Discovery Assessment to identify extension requirements.

Answer: A,C

Explanation:

Based on the SAP Activate methodology, the Explore phase is where consultants configure business processes based on the information gathered in the Fit-to-Standard workshops. The Fit-to-Standard analysis is conducted in a series of workshops and allows for validation of predefined scenarios agreed upon and to make room for enhancements or additional configuration required. To prepare for this workshop, it is recommended that teams get familiar with the SAP Best Practices content, including the process flows, test scripts with sample data, and other documentation available in SAP Best Practices Explorer. Consultants should also use the Test system to demonstrate SAP Best Practice processes and enable business users to run the end-to-end processes and identify any gaps. The other two activities, conducting the Digital Discovery Assessment and defining the organizational structure and chart of accounts, are part of the Prepare phase, not the Explore phase. References = SAP Activate - Explore Phase: Use Fit-to-Standard to confirm business process fit and identify gaps in your SAP S/4HANA Cloud Implementation, SAP Explore Phase Activities: Define Target BP and Architecture, SAP Activate Elements and Phases, Explaining the Explore Phase

NEW QUESTION # 14

Which of the following analyses can you create from the Manage KPIs and Reports app? Note: There are 3 correct answers to this question.

- A. Object Views
- **B. Multidimensional Reports**
- **C. SAC Stories**
- **D. Review Booklets**
- E. Lumira Dashboards

Answer: B,C,D

Explanation:

The Manage KPIs and Reports app is a single platform for creating all analytical applications using KPIs, reports, multidimensional
