So hurry to buy our products, it will not let you down.

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q40-Q45):

NEW QUESTION # 40

Where is the initial list of known integrations documented?

- A. In SAP Cloud ALM
- B. In the Digital Discovery Assessment
- C. In the Fit-to-Standard Workshops
- **D. In the Business Driven Configuration Questionnaire**

Answer: D

Explanation:

The initial list of known integrations is documented in the Business Driven Configuration Questionnaire (BDCQ). The BDCQ is a tool that helps you to capture the business requirements and scope of your SAP S/4HANA Cloud Public Edition project. It contains a series of questions that cover different aspects of your business processes, such as organizational structure, master data, configuration settings, and integration scenarios. The BDCQ also provides guidance on the best practices and recommendations for your project¹².

One of the sections in the BDCQ is the Integration section, where you can document the initial list of known integrations that are relevant for your project. The Integration section contains questions about the integration scenarios that you want to enable, such as cross-system process integration, data replication, data migration, and third-party integration. The Integration section also provides information on the available integration options, such as SAP Cloud Platform Integration, SAP API Business Hub, and SAP Cloud ALM¹³.

The initial list of known integrations is important for your project, as it helps you to identify the integration requirements, dependencies, and risks that need to be considered in the project planning and execution. The initial list of known integrations also helps you to select the appropriate integration tools and methods, and to align the integration scope with the SAP S/4HANA Cloud Public Edition roadmap and release cycles¹³.

Therefore, the correct answer is A, as the initial list of known integrations is documented in the BDCQ. NEW QUESTION # 41

What does a partner line of business configuration expert reference when identifying business processes to cover in the Fit-to-Standard workshops?

- A. Digital Discovery Assessment
- B. Business Driven Configuration Questionnaire
- **C. SAP Signavio Process Collaboration Hub**
- D. SAP Signavio Journey Modeler

Answer: C

Explanation:

A partner line of business configuration expert plays a crucial role in preparing for Fit-to-Standard workshops, which are pivotal in aligning SAP S/4HANA Cloud Public Edition's capabilities with the customer's business requirements. To identify and select relevant business processes for discussion in these workshops, the expert would reference:

* SAP Signavio Process Collaboration Hub: This tool serves as a comprehensive repository and collaboration platform for business process documentation and best practices. It provides detailed insights into various business processes, including their steps, variations, and best practices, as established in the SAP ecosystem. By referencing the SAP Signavio Process Collaboration Hub, a line of business configuration expert can identify relevant standard business processes that SAP S/4HANA Cloud supports, which should be covered during the Fit-to-Standard workshops. This ensures that the workshops focus on processes critical to the customer's operations and that any gaps or customization needs are identified early in the implementation phase.

NEW QUESTION # 42

When using the Local SAP S/4HANAA Database Schema migration approach, what is the maximum file size? Note: There are 2 correct answers to this question.

- A. 160 MB per ZIP file
- B. 160 MB per file
- **C. 100 MB per ZIP file**
- **D. 100 MB per file**

Answer: C,D

NEW QUESTION # 43

When do you specify the data retention period in the SAP S/4HANA Migration Cockpit?

- **A. When the project status is "Finished"**
- B. When the project status is "Not Started"
- C. When the project status is "In Progress"
- D. When the project status is "Completed"

Answer: A

Explanation:

You specify the data retention period in the SAP S/4HANA Migration Cockpit when the project status is "Finished". The data retention period is the length of time (in days) that the project and all associated data is kept in the system after you have set the status of the project to Finished. To do this, set the option Data Retention Period to On. The data will be deleted from the SAP S/4HANA system when the data retention time expires. If you set the option Data Retention Period to Off, then the project and all associated data will be kept in the system indefinitely. You can also change the retention time for finished projects on the Technical Information tab of the project settings. NEW QUESTION # 44

What do you use to collect the values that are entered into the configuration activities in SAP Central Business Configuration?

- A. SAP Cloud ALM Processes app
- B. Availability and Dependencies of Solution Processes Excel
- C. SAP Cloud ALM Requirements app
- **D. Business Driven Configuration Questionnaire**

Answer: D
