SAP C_S4CPB_2508 Exam Syllabus Topics:

Topic	Details
Topic 1	• Data Migration and Business Process Testing: This section of the exam measures skills of Business Process Experts and focuses on preparing, migrating, and validating business data within SAP S • 4HANA Cloud. It also includes setting up and executing business process testing to ensure smooth operations after go-live.
Topic 2	• System Landscapes and Identity Access Management: This section of the exam measures the skills of Implementation Consultants and covers the understanding of SAP system landscapes, tenants, and environments. It also assesses knowledge of identity and access management to ensure secure user provisioning, authentication, and role assignments.
Topic 3	• This section of the exam measures skills of Business Process Experts and focuses on adopting a cloud-first approach during implementations. It also emphasizes the importance of building the right project team and using fit-to-standard workshops to align customer requirements with standard SAP processes.
Topic 4	• Implementing with a Cloud Mindset, Building the Team, and Conducting Fit-to-Standard Workshops:
Topic 5	• Configuration and the SAP Fiori Launchpad: This section of the exam measures the skills of Implementation Consultants and covers the ability to configure the system to meet customer requirements. It also evaluates knowledge of using the SAP Fiori Launchpad to personalize user experiences and manage business roles within the cloud environment.
Topic 6	• Extensibility and Integration: This section of the exam measures the skills of Business Process Experts and evaluates the ability to extend SAP S • 4HANA Cloud functionalities using in-app and side-by-side extensibility options. It also includes integrating SAP systems with external applications to support end-to-end business processes.

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q59-Q64):

NEW QUESTION # 59

Where is the initial list of known integrations documented?

- A. In the Fit-to-Standard Workshops
- B. In SAP Cloud ALM
- C. In the Business Driven Configuration Questionnaire
- **D. In the Digital Discovery Assessment**

Answer: D

NEW QUESTION # 60

Which activities does the consultant do before the first Fit-to-Standard workshop? Note: There are 2 correct answers to this question.

- A. Upload customer master data in the Starter system using migration templates.
- **B. Review the integration requirements collected from the Digital Discovery Assessment.**
- **C. Evaluate the L2 Business-Driven Configuration Questionnaire responses.**
- D. Deactivate scope items that are NOT part of the Statement of Work/Digital Discovery Assessment.

Answer: B,C

NEW QUESTION # 61

What defines the organizational entities that are required in SAP Central Business Configuration?

Note:

There are 2 correct answers to this question

- A. The selected scope
- B. The selected deployment target
- C. Added partner content
- D. System consistency checks

Answer: A,B

Explanation:

The organizational entities that are required in SAP Central Business Configuration are defined by the selected deployment target and the selected scope. The deployment target specifies which SAP cloud solutions are included in the project, such as SAP S/4HANA Cloud, public edition. The scope specifies which business processes and countries/regions are included in the project, such as sales or professional services.

These choices determine which organizational units are required to run the underlying processes, such as company, business residence, sales organization, or project unit. Added partner content and system consistency checks do not define the organizational entities, but rather enhance or validate the configuration. References = SAP Central Business Configuration - Overview, page 5; Introducing SAP Central Business Configuration In SAP Central Business Configuration, the organizational entities that need to be defined for an SAP S

/4HANA Cloud Public Edition implementation are influenced by two primary factors: the selected deployment target and the selected scope. The deployment target refers to the specific environment or system where SAP S/4HANA Cloud will be implemented. This choice can affect which organizational entities are necessary based on the technical and business requirements of that environment. The selected scope, on the other hand, pertains to the business processes and functions that the company intends to use within SAP S

/4HANA Cloud. This determines the organizational structures, such as company codes, sales organizations, and purchasing organizations, that need to be set up to support the scoped processes. Both factors are integral to ensuring that the configuration supports the business's operational needs and strategic objectives.

NEW QUESTION # 62

Which of the following activities are completed in the Realize phase of the SAP Activate Methodology? Note:

There are 2 correct answers to this question.

- A. Demonstrate where to find business process documentation
- B. Set up manual test cases in SAP Cloud ALM
- C. Enter configuration values in SAP Central Business Configuration
- D. Gather perceived change impact feedback

Answer: B,C

Explanation:

In the Realize phase of the SAP Activate Methodology, the project team uses a series of iterations to build and test a complete business and system environment based on the inputs from the previous steps. The activities in this phase include:

- * Receiving the systems from SAP
- * Performing configuration in the Q-System using SAP Central Business Configuration
- * Setting up manual test cases in SAP Cloud ALM
- * Performing data loads and data migration
- * Delivering key-user training

* Preparing for cutover and go-live Therefore, the correct answers are C and D, as they are part of the Realize phase activities.
