C_S4CPB_2508 Reliable Test Sims & Practice C_S4CPB_2508 Mock

The competition in the tech sector is getting tougher and tougher day by day. Therefore, ExamDumpsVCE is offering updated and latest SAP C_S4CPB_2508 Questions so aspirants can ace the SAP C_S4CPB_2508 test in a short time and stay competitive in today's challenging job market.

SAP Certified Associate - Implementation Consultant - SAP S/4HANA Cloud Public Edition Sample Questions (Q23-Q28):

NEW QUESTION # 23

Where do you enable a customer-specific field to be available for UIs and reports relevant for the same business context?

- A. In the Extensibility Cockpit app
- B. In the Runtime Authoring mode
- C. In the Custom Fields app
- D. In the Maintain SAP Business Technology Platform Extensions app

Answer: C

NEW QUESTION # 24

What defines the organizational entities that are required in SAP Central Business Configuration? Note: There are 2 correct answers to this question.

- A. The selected deployment target

- B. Added partner content
- C. The selected scope
- D. System consistency checks

Answer: C,D

NEW QUESTION # 25

In which deployment models is application management the responsibility of the customer? Note: There are 3 correct answers to this question.

- A. Software as a Service
- B. Private Cloud
- C. Infrastructure as a Service
- D. Platform as a Service
- E. On premise

Answer: B,D,E

Explanation:

In different deployment models, the responsibility for application management varies, with the customer typically taking on more responsibility in certain models:

* Platform as a Service (PaaS): In this model, the customer is responsible for managing the applications they develop or deploy on the platform, even though the provider manages the underlying infrastructure, operating systems, and middleware.

* On premise: In an on-premise deployment, the customer has full responsibility for managing both the applications and the infrastructure they run on. This includes maintenance, updates, security, and compliance for both the applications and the hardware/software infrastructure.

* Private Cloud: Similar to on-premise deployments, customers in a private cloud model are typically responsible for managing their applications, including SAP S/4HANA Cloud Public Edition. The cloud provider may manage the cloud infrastructure and virtualization layer, but the customer often handles application-level management tasks, including updates, customization, and user management.

These deployment models contrast with Software as a Service (SaaS), where the service provider is generally responsible for managing the application, including its maintenance, updates, and availability.

NEW QUESTION # 26

Which layer of SAP S/4HANA provides a universal language to read and process data across different applications?

- A. SAP HANA
- B. SAP Fiori
- C. Core Data Services
- D. SAP Business Suite

Answer: C

Explanation:

Core Data Services (CDS) is a layer of SAP S/4HANA that provides a universal language to read and process data across different applications. CDS is based on SQL and extends it with domain-specific features and annotations. CDS views are reusable and can be consumed by various interfaces such as SAP Fiori, OData, or SQL. CDS views also enable the definition of semantic data models that expose the business logic and meaning of the underlying data sources. References = [SAP S/4HANA Cloud Public Edition - Introduction to Core Data Services], [SAP S/4HANA Cloud Public Edition - Core Data Services in SAP S/4HANA Cloud]

NEW QUESTION # 27

Who should be identified and assigned the role of the IT Contact immediately when the implementation begins?

- A. Partner project manager
- B. Customer system admin
- C. Partner lead configuration expert
- D. Customer project manager

Answer: B

Explanation:

The IT Contact is the person who is responsible for setting up the initial system access, provisioning users, and managing authentication for the SAP S/4HANA Cloud Public Edition project. The IT Contact should be identified and assigned immediately when the implementation begins, as they will receive all the SAP communications and notifications related to the system setup and configuration. The IT Contact should also be available and accessible throughout the project, and collaborate with the project team and the business stakeholders¹.

The IT Contact should be someone who is a hands-on system administrator, not an executive. They should have the skills and experience to perform the system administration tasks, such as creating users, assigning roles, configuring identity providers, and troubleshooting issues. They should also be committed and engaged with the project, and provide feedback and participate in testing and training activities¹.

Therefore, the correct answer is C, as the customer system admin is the most suitable person to be the IT Contact for the SAP S/4HANA Cloud Public Edition project. References = 1 How to Choose the Right IT Contact for Your SAP S/4HANA Cloud Public Edition Project - SAP Community

NEW QUESTION # 28

.....

It is indeed not easy to make a decision. C_S4CPB_2508 study engine is willing to give you a free trial. If you have some knowledge of our C_S4CPB_2508 training materials, but are not sure whether it is suitable for you, you can email us to apply for a free trial version. You know, we have provided three versions of C_S4CPB_2508 practice quiz: the PDF, Software and APP online. Accordingly, we have three free trial versions as well.

C_S4CPB_2508 Reliable Test Sims: https://www.examdumpsvce.com/C_S4CPB_2508-valid-exam-dumps.html

So we never stop the pace of offering the best services and C_S4CPB_2508 practice materials for you, SAP C_S4CPB_2508 Pdf Pass Leader If you do not pass the exam at your first try with passexamonline.com materials, we will give you a full refund, SAP C_S4CPB_2508 Pdf Pass Leader You can see that our protection system is very powerful, SAP C_S4CPB_2508 Pdf Pass Leader The PDF version, you could download it after buying, which can be opened with your laptop.

All our three versions are paramount versions, Because they C_S4CPB_2508 Labs know many of these apps are written by programmers with little or no experience or training in software security.
