We do not charge any additional fees. Once our C\_S4EWM\_2023 Learning Materials are updated, we will automatically send you the latest information about our C\_S4EWM\_2023 exam question. We assure you that our company will provide customers with a sustainable update system.

## SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management Sample Questions (Q57-Q62):

### NEW QUESTION # 57

Which of the following actions can you perform from the shipping cockpit? Note: There are 2 correct answers to this question.

- A. Create and check in transportation units
- B. Create waves and assign doors
- C. Assign outbound delivery orders and inbound deliveries to transportation units
- D. Create Pick HUs

**Answer: A,B**

Explanation:

Comprehensive and Detailed In-Depth Explanation:

The shipping cockpit (/SCWM/SHCO) in SAP EWM manages outbound processes. Option A ("Create waves and assign doors") is correct as it supports wave creation and door assignment, and option D ("Create and check in transportation units") is correct for TU management, both available in the cockpit. Option B is transportation management-specific, and option C (Pick HUs) is done during picking, not in the cockpit.

#### NEW QUESTION # 58

How are warehouse orders sorted for automatic assignment to a resource? Note: There are 2 correct answers to this question.

- A. By latest starting date
- B. By execution priority
- C. By resource utilization
- D. By mode

**Answer: A,B**

Explanation:

Comprehensive and Detailed In-Depth Explanation:

Warehouse order sorting for resource assignment in SAP EWM uses priority criteria. Option A ("By latest starting date") is correct as it ensures timely execution, and option D ("By execution priority") is correct because priority levels (e.g., high, low) influence assignment, both set in SPRO: SCM Extended Warehouse Management > Resource Management > Define Sort Rules. Option B (utilization) and option C (mode) are not standard sorting parameters.

#### NEW QUESTION # 59

You have maintained several process types that should all use the same storage type search sequence for putaway. You want to minimize customizing efforts and create only one entry for these process types. What can you use to achieve this goal?

- A. Storage type group
- B. Stock type group
- C. Process type group
- D. Putaway control indicator

**Answer: C**

Explanation:

Comprehensive and Detailed In-Depth Explanation:

To streamline configuration, SAP EWM allows grouping process types. Option A ("Process type group") is correct because it enables multiple process types to share a single storage type search sequence, defined in SPRO: SCM Extended Warehouse Management > Goods Receipt Process > Define Process Type Group.

Options B, C, and D (putaway control indicator, storage type group, stock type group) serve other purposes like putaway rules or stock categorization, not process type grouping for search sequences.

#### NEW QUESTION # 60

What do you need to configure before you can create warehouse tasks for an outbound delivery order or an inbound delivery?

Note: There are 2 correct answers to this question.

- A. Putaway control indicator or stock removal control indicator
- B. Warehouse process types
- C. Warehouse process type determination

- D. Warehouse order creation rules

**Answer: B,C**

Explanation:

Pre-Configuration for Creating Warehouse Tasks

- \* Warehouse Process Types (D): Define the processes (e.g., putaway, picking) and are a prerequisite for executing tasks.
- \* Warehouse Process Type Determination (C): Determines which process type is applied based on specific conditions like document type or storage type.

Excluded Options

- \* Warehouse Order Creation Rules (A): Relevant for creating warehouse orders but not for tasks.
  - \* Putaway Control/Stock Removal Indicators (B): Influences stock placement/removal but does not directly enable task creation.
- SAP S/4HANA Cloud Private Edition Reference
- \* Refer to Warehouse Task Creation Configuration in SAP EWM guides.

### NEW QUESTION # 61

Which document is created in SAP Extended Warehouse Management when you use advanced production integration?

- **A. Production material request**
- B. Outbound delivery request
- C. Production order
- D. Outbound delivery

**Answer: A**

Explanation:

Advanced Production Integration in SAP EWM

- \* Production Material Request (B): This document is created in SAP EWM to manage materials needed for production, ensuring proper staging and inventory allocation.

Excluded Options

- \* A (Production Order): Created in SAP ERP, not EWM.
- \* C (Outbound Delivery Request): Relevant for outbound flows, not production integration.
- \* D (Outbound Delivery): Triggered for shipping but not for production.

SAP S/4HANA Cloud Private Edition Reference

- \* Refer to Advanced Production Integration with EWM.

### NEW QUESTION # 62

.....

There is no doubt that advanced technologies are playing an important role in boosting the growth of SAP companies. This is the reason why the employees have now started upgrading their skillset with the SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management (C\_S4EWM\_2023) certification exam because they want to work with those latest applications and save their jobs.
