New C_S4EWM_2023 Exam Bootcamp & C_S4EWM_2023 Reliable Exam Vce

You will get real questions and accurate answers from C_S4EWM_2023 exam pdf torrent for your preparation of C_S4EWM_2023 certification. When you choose PrepPDF C_S4EWM_2023 exam dumps, you will enjoy instant access to the C_S4EWM_2023 practice papers. Moreover, free updates for C_S4EWM_2023 latest dumps are available for 1 year after the purchase. With the help of the C_S4EWM_2023 Test Engine, you can not only revisit the mistakes you made, but also can retake tests until you are satisfied. With the practice and C_S4EWM_2023 valid study material, you will get your SAP C_S4EWM_2023 certification with ease.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Extended Warehouse Management Sample Questions (Q14-Q19):

NEW QUESTION # 14

Where do you enable opportunistic cross-docking in a decentralized EWM?

- A. In the warehouse and the product
- B. In the product and the document type
- **C. In the product and the warehouse process type**
- D. In the warehouse and the document type

Answer: C

Explanation:

Comprehensive and Detailed In-Depth Explanation:

Opportunistic cross-docking in SAP EWM allows goods to be moved directly from goods receipt to goods issue without intermediate storage, optimizing warehouse efficiency. This functionality is enabled at the product level and linked to the warehouse process type, which defines the process flow (e.g., putaway, picking, or cross-docking). In a decentralized EWM system, the configuration is maintained in the product master data (under the "Warehouse" tab) where you specify cross-docking relevance, and in the warehouse process type (SPRO: SCM Extended Warehouse Management > Cross-Docking > Opportunistic Cross-Docking) where the system determines whether a product can bypass putaway. The warehouse process type controls the movement type, and the product master defines eligibility, making option B the correct choice. Options A, C, and D are incorrect because the document type and warehouse alone do not control this process-it's a combination of product-specific settings and process type logic.

NEW QUESTION # 15

Which of the following is a prerequisite for assigning a warehouse order to a resource automatically?

- A. The warehouse order must be in a queue that is assigned to the resource either directly or through a resource group.
- B. The resource group of the resource must be assigned to the warehouse order creation rule.
- **C. The warehouse order must be picked from the same activity area that is assigned to the resource.**
- D. The creation of a pick-handling unit must be done automatically with a packaging specification.

Answer: C

Explanation:

Automatic Assignment of Warehouse Orders to Resources

* A warehouse order can be automatically assigned to a resource if it is closely tied to specific operational areas, such as activity areas.

* Activity Areas (B): These represent logical divisions in the warehouse where resources perform tasks such as picking. The resource must be assigned to the same activity area to enable automatic assignment.

Excluded Options

- * Option A: Although queues may influence assignment, they are not the sole determining factor for automatic assignment.
- * Option C: Resource group assignment to warehouse order creation rules is unrelated to automatic order assignment.
- * Option D: Automatic creation of pick-handling units is a packaging specification requirement, not directly related to resource assignment.

SAP S/4HANA Cloud Private Edition Reference

- * Refer to Activity Areas in Resource Management in SAP EWM documentation for detailed configuration.

NEW QUESTION # 16

Which stock removal strategy can be realized with either packaging specifications or the alternative unit of measure (AUoM)? Note: There are 2 correct answers to this question.

- A. Stringent FIFO
- B. Partial quantities first
- C. Fixed bin
- D. Large/small quantities

Answer: B,D

NEW QUESTION # 17

When using batches with de-centralized EWM, where does the batch master data exist.

- A. It depends on customizing
- B. In SAP ERP and in SAP EWM
- C. Only in SAP EWM
- D. Only in SAP ERP

Answer: B

NEW QUESTION # 18

With SAP S/4HANA embedded EWM or EWM 9.5, you can skip certain document categories. Which document category combination is still mandatory?

- A. An outbound delivery request and an outbound delivery order
- B. An outbound delivery request and an outbound delivery
- C. An outbound delivery order and an outbound delivery
- D. A production material request and a stock transfer

Answer: C

NEW QUESTION # 19

.....
