If you want to practice the C_S4PM_2504 exam questions with different electronic devices. We believe our APP version of C_S4PM_2504 training braindump will be very convenient for you. In addition, the online version of our C_S4PM_2504 training materials can work in an offline state. If you buy our C_S4PM_2504 Study Guide, you have the chance to use our C_S4PM_2504 study materials for preparing your exam when you are in an offline state. We believe that you will like the online version of our C_S4PM_2504 exam questions.

SAP C_S4PM_2504 Exam Syllabus Topics:

Topic	Details
Topic 1	• SAP S • 4HANA Cloud Public Edition Implementation: This section of the exam measures the skills of Implementation Consultants and covers the foundational aspects of deploying SAP S • 4HANA Cloud Public Edition in a business environment. It focuses on understanding system architecture, scope definition, and the technical and functional setup required for a successful implementation. The candidate is expected to have a strong grasp of how to execute the necessary configuration and adoption tasks that align with customer-specific requirements.
Topic 2	• SAP Activate Methodology: This section of the exam measures skills of Business Process Architects and covers the structure and practical application of SAP Activate. It includes understanding the phases of the methodology: Discover, Prepare, Explore, Realize, Deploy, and Run, and the use of supporting tools such as SAP Roadmap Viewer and SAP Best Practices. Candidates are expected to demonstrate the ability to apply this methodology to streamline cloud implementation processes and ensure agile delivery.

Topic 3	• Project Management • Organizational Change Management (OCM): This section of the exam measures the skills of Project Managers and covers the key principles of managing SAP cloud implementation projects, including team coordination, stakeholder communication, and change management. It evaluates the ability to lead project activities, manage expectations, and handle resistance during digital transformation. Emphasis is placed on aligning organizational goals with implementation strategies to ensure effective user adoption and project success.

Examinations SAP C_S4PM_2504 Actual Questions | C_S4PM_2504 Customized Lab Simulation

You only need 20-30 hours to learn our C_S4PM_2504 Test Braindumps and then you can attend the exam and you have a very high possibility to pass the exam. For many people whether they are the in-service staff or the students they are busy in their job, family lives and other things. But you buy our C_S4PM_2504 prep torrent you can mainly spend your time energy and time on your job, the learning or family lives and spare little time every day to learn our SAP Certified Associate - Managing SAP S/4HANA Cloud Public Edition Projects exam torrent. Owing to the superior quality and reasonable price of our exam materials, our exam torrents are not only superior in price than other makers in the international field, but also are distinctly superior in many respects.

SAP Certified Associate - Managing SAP S/4HANA Cloud Public Edition Projects Sample Questions (Q68-Q73):

NEW QUESTION # 68

Why does SAP recommend to perform regression testing during the upgrade window for SAP S/4HANA Cloud Public Edition?

- A. To validate that all user permissions have been properly migrated to the new version
- B. To ensure that new features of the upgrade are working as specified in the requirements
- C. To confirm that the database schema changes have been implemented successfully
- D. To verify existing functionality still works correctly after the upgrade

Answer: D

Explanation:

Regression testing is a critical activity during the upgrade window for SAP S/4HANA Cloud Public Edition to ensure system stability and continuity of operations post-upgrade.

* Option A: To ensure that new features of the upgrade are working as specified in the requirements Incorrect. Testing new features is part of functional or exploratory testing, not regression testing, which focuses on existing functionality. The SAP S/4HANA Cloud Testing Guide states,

"Regression testing verifies existing functionality, while new features are tested separately during functional or user acceptance testing."

* Option B: To validate that all user permissions have been properly migrated to the new version Incorrect. User permissions are validated through security testing, not regression testing. The SAP S/4HANA Cloud Security Guide notes, "Permission validation is handled through security and role-based testing, not regression testing, which focuses on business processes."

* Option C: To confirm that the database schema changes have been implemented successfully Incorrect. Database schema changes are validated through technical or integration testing, not regression testing. The SAP S/4HANA Cloud Implementation Guide clarifies, "Database schema validation is a technical task, whereas regression testing focuses on business process continuity."

* Option D: To verify existing functionality still works correctly after the upgrade Correct.

Regression testing ensures that existing business processes and functionalities remain operational after an upgrade. The SAP S/4HANA Cloud Testing Guide explains, "SAP recommends regression testing during the upgrade window to verify that existing functionality in SAP S/4HANA Cloud Public Edition continues to work correctly, preventing disruptions to business operations."

Extract from Official Documentation:

* SAP S/4HANA Cloud Testing Guide (SAP Help Portal, <https://help.sap.com>): "Regression testing is performed during the upgrade window to verify that existing functionality in SAP S/4HANA Cloud Public Edition remains intact, ensuring business continuity after the introduction of new releases."

* SAP S/4HANA Cloud Implementation Guide (SAP Community, <https://community.sap.com>): "During upgrades, regression testing

is critical to confirm that core business processes and existing functionalities are unaffected by the new release, safeguarding system reliability." Additional Context:

SAP S/4HANA Cloud Public Edition's semi-annual upgrades introduce new features and updates, making regression testing essential to mitigate risks of unintended impacts on existing processes. This aligns with SAP's cloud strategy of maintaining stability while delivering continuous innovation.

:

SAP Help Portal: SAP S/4HANA Cloud Testing Guide (<https://help.sap.com>).

SAP Community: SAP S/4HANA Cloud Implementation Guide (<https://community.sap.com>).

SAP Activate Methodology Guide: Includes testing strategies for upgrades.

SAP S/4HANA Cloud Study Guide: Explains regression testing purpose.

NEW QUESTION # 69

You are implementing SAP S/4HANA Cloud, public edition for your customer. How do you activate the pre- configuration?

- A. SAP Contact Center
- B. Via the SAP Cloud ALM
- C. Via the SAP Business Technology Platform
- **D. Via the Central Business Configuration System**

Answer: D

Explanation:

Activating pre-configuration in SAP S/4HANA Cloud Public Edition involves applying predefined settings, such as SAP Best Practices, to streamline the implementation process. This is managed through a specific configuration tool.

* Option A: Via the SAP Cloud ALMIncorrect. SAP Cloud ALM is used for project and test management, not for activating pre-configuration. TheSAP Cloud ALM Documentationstates, "SAP Cloud ALM supports project management and testing, not the activation of pre-configuration, which is handled by configuration tools."

* Option B: Via the SAP Business Technology PlatformIncorrect. SAP BTP is for development and integration, not configuration activation. TheSAP BTP Documentationnotes, "SAP BTP supports custom extensions, not the activation of pre-configured settings for SAP S/4HANA Cloud."

* Option C: SAP Contact CenterIncorrect. The SAP Contact Center is for support and service, not configuration tasks. TheSAP S/4HANA Cloud Study Guideclarifies, "The SAP Contact Center provides customer support, not configuration activation capabilities."

* Option D: Via the Central Business Configuration SystemCorrect. The Central Business Configuration (CBC) system is used to activate pre-configured settings, such as SAP Best Practices, for SAP S/4HANA Cloud Public Edition. TheSAP Central Business Configuration Guideexplains, "The Central Business Configuration system is used to activate pre-configuration, including SAP Best Practices, for SAP S/4HANA Cloud Public Edition, enabling rapid setup of the solution." Extract from Official Documentation:

* SAP Central Business Configuration Guide(SAP Help Portal,<https://help.sap.com>): "In SAP S/4HANA Cloud Public Edition, the Central Business Configuration system is the tool for activating pre- configured settings, such as SAP Best Practices, to streamline the implementation process."

* SAP S/4HANA Cloud Implementation Guide(SAP Community,<https://community.sap.com>): "Pre- configuration activation, including the application of SAP Best Practices, is performed via the Central Business Configuration system, ensuring a standardized and efficient setup." Additional Context:

The CBC system is a key component of SAP S/4HANA Cloud Public Edition's configuration process, allowing customers to activate pre-configured settings quickly, aligning with the cloud's standardized approach. This reduces implementation time and ensures consistency with SAP Best Practices.

:

SAP Help Portal: SAP Central Business Configuration Guide (<https://help.sap.com>).

SAP Community: SAP S/4HANA Cloud Implementation Guide (<https://community.sap.com>).

SAP S/4HANA Cloud Study Guide: Details configuration tools.

SAP Activate Methodology: Outlines configuration activation.

NEW QUESTION # 70

What can you find in the SAP Fiori apps reference library? Note: There are 3 correct answers to this question.

- A. Shortcut to the Maintenance Planner tool to establish the technical update path
- B. Shortcut to the Quicksizer tool to estimate hardware requirements
- **C. Related app-specific solution design guidelines**

- D. Related app recommendations based on your usage profile
- E. Installation and configuration requirements for selected apps

Answer: C,D,E

Explanation:

The SAP Fiori Apps Reference Library is a comprehensive resource for exploring and implementing Fiori apps in SAP S/4HANA Cloud Public Edition, providing detailed information to support app selection and configuration.

* Option A: Related app-specific solution design guidelinesCorrect. The SAP Fiori Apps Reference Library includes solution design guidelines for specific apps, detailing their use cases and implementation considerations. TheSAP Fiori Apps Reference Library Guidestates, "The SAP Fiori Apps Reference Library provides app-specific solution design guidelines, outlining functionality, use cases, and implementation best practices."

* Option B: Shortcut to the Maintenance Planner tool to establish the technical update path Incorrect. The Maintenance Planner is a separate tool for planning system updates, not linked through the Fiori Apps Reference Library. TheSAP S/4HANA Cloud Implementation Guidenotes, "The Maintenance Planner is accessed independently, not via the SAP Fiori Apps Reference Library."

* Option C: Installation and configuration requirements for selected appsCorrect. The library details installation and configuration requirements for each Fiori app, ensuring proper setup. TheSAP Fiori Apps Reference Library Guideexplains, "For each Fiori app, the SAP Fiori Apps Reference Library provides detailed installation and configuration requirements, including prerequisites and settings."

* Option D: Shortcut to the Quicksizer tool to estimate hardware requirementsIncorrect. The Quicksizer tool is used for sizing hardware and is not accessible through the Fiori Apps Reference Library. TheSAP S/4HANA Cloud Study Guideclarifies, "The Quicksizer tool is a standalone resource for hardware sizing, not linked to the Fiori Apps Reference Library."

* Option E: Related app recommendations based on your usage profileCorrect. The library offers recommendations for related apps based on usage patterns or roles. TheSAP Fiori Apps Reference Library Guideconfirms, "The SAP Fiori Apps Reference Library provides related app recommendations based on your usage profile, helping users discover relevant apps for their needs." Extract from Official Documentation:

* SAP Fiori Apps Reference Library Guide(SAP Help Portal,<https://help.sap.com>): "The SAP Fiori Apps Reference Library includes app-specific solution design guidelines, installation and configuration requirements, and related app recommendations based on usage profiles, supporting effective app selection and implementation."

* SAP S/4HANA Cloud Implementation Guide(SAP Community,<https://community.sap.com>): "The Fiori Apps Reference Library provides comprehensive details on Fiori apps, including design guidelines, configuration requirements, and recommendations for related apps, enhancing user experience in SAP S /4HANA Cloud."

Additional Context:

The SAP Fiori Apps Reference Library is a critical resource for SAP S/4HANA Cloud Public Edition, enabling customers to explore, configure, and optimize Fiori apps. Its detailed guidelines and recommendations support the cloud's user-centric design, ensuring apps are tailored to business needs while maintaining standardization.

:

SAP Help Portal: SAP Fiori Apps Reference Library Guide (<https://help.sap.com>).

SAP Community: SAP S/4HANA Cloud Implementation Guide (<https://community.sap.com>).

SAP S/4HANA Cloud Study Guide: Details Fiori app resources.

SAP Fiori Documentation: Outlines library features.

NEW QUESTION # 71

Which of the following is the customer's responsibility in both on-premise and private cloud scenarios?

- A. Middleware
- B. Servers
- C. Database
- D. Operating system

Answer: A

NEW QUESTION # 72

Which system tenant is the first to be provisioned when implementing SAP S/4HANA Cloud, public edition?

- A. SAP S/4HANA Cloud Development system
- B. SAP S/4HANA Cloud Sandbox system
- C. SAP Cloud Identity Services

- **D. Central Business Configuration system**

Answer: D

Explanation:

The implementation of SAP S/4HANA Cloud Public Edition involves provisioning multiple system tenants in a specific sequence to support configuration, testing, and production. The first tenant provisioned sets the foundation for subsequent activities.

* Option A: SAP S/4HANA Cloud Sandbox systemIncorrect. The Sandbox system is provisioned later for prototyping and testing, not as the first tenant. TheSAP S/4HANA Cloud Implementation Guide states, "The Sandbox system is provisioned after initial configuration to support exploration and testing, not as the first tenant."

* Option B: SAP S/4HANA Cloud Development systemIncorrect. There is no dedicated Development system in SAP S/4HANA Cloud Public Edition; development occurs in other systems. TheSAP S/4HANA Cloud Study Guidenotes, "Development activities are handled in Sandbox or Test systems, not a separate Development tenant."

* Option C: SAP Cloud Identity ServicesIncorrect. SAP Cloud Identity Services manage user authentication but are not the first tenant provisioned for implementation. TheSAP S/4HANA Cloud Security Guideclarifies, "SAP Cloud Identity Services are configured alongside implementation systems, not as the initial tenant."

* Option D: Central Business Configuration systemCorrect. The Central Business Configuration (CBC) system is the first tenant provisioned, enabling scoping and configuration of the SAP S/4HANA Cloud solution. TheSAP Central Business Configuration Guideexplains, "The Central Business Configuration system is the first tenant provisioned in SAP S/4HANA Cloud Public Edition, providing the platform for defining scope, organizational structure, and pre-configuration." Extract from Official Documentation:

* SAP Central Business Configuration Guide(SAP Help Portal,<https://help.sap.com>): "The Central Business Configuration system is the first tenant provisioned when implementing SAP S/4HANA Cloud Public Edition, enabling the initial scoping and configuration of the solution."

* SAP S/4HANA Cloud Implementation Guide(SAP Community,<https://community.sap.com>):

"Implementation begins with the provisioning of the Central Business Configuration system, which serves as the foundation for defining the SAP S/4HANA Cloud solution scope and settings." Additional Context:

The CBC system is critical for initiating the implementation, as it allows customers to define the solution scope, activate SAP Best Practices, and configure organizational structures before other systems like the Starter or Sandbox are provisioned. This ensures a standardized and efficient setup process.

:

SAP Help Portal: SAP Central Business Configuration Guide (<https://help.sap.com>).

SAP Community: SAP S/4HANA Cloud Implementation Guide (<https://community.sap.com>).

SAP S/4HANA Cloud Study Guide: Details system provisioning.

SAP Activate Methodology: Outlines implementation sequence.

NEW QUESTION # 73

.....

As for our C_S4PM_2504 exam braindump, our company masters the core technology, owns the independent intellectual property rights and strong market competitiveness. What is more, we have never satisfied our current accomplishments. Now, our company is specialized in design, development, manufacturing, marketing and retail of the C_S4PM_2504 test question, aimed to provide high quality product, solutions based on customer's needs and perfect service of the C_S4PM_2504 Exam braindump. At the same time, we have formed a group of passionate researchers and experts, which is our great motivation of improvement. Every once in a while we will release the new version study materials. You will enjoy our newest version of the C_S4PM_2504 study prep after you have purchased them. Our ability of improvement is stronger than others. New trial might change your life greatly.
