# 100% Pass Quiz C\_SEC\_2405 - SAP Certified Associate - Security Administrator –Professional Lead2pass Review

Because of the unremitting effort of our professional experts, our C\_SEC\_2405 exam engine has the advantages of high quality, validity, and reliability. And the warm feedbacks from our customers all over the world prove that we are considered the most popular vendor in this career. our C\_SEC\_2405 Study Materials are undeniable excellent products full of benefits, so they can spruce up our own image. Besides, our C\_SEC\_2405 practice braindumps are priced reasonably, so we do not overcharge you at all.

## SAP Certified Associate - Security Administrator Sample Questions (Q82-Q87):

### NEW QUESTION # 82

What use cases are available for a Local Identity Directory? Note: There are 3 correct answers to this question.

- A. Proxy mode
- B. Hybrid mode
- C. Classic use case
- D. Merging attributes
- E. S/4HANA use case

**Answer: B,C,E**

### NEW QUESTION # 83

What must you do if you want to enforce an additional authorization check when a user starts an SAP transaction?

- A. Assign the authorization object to be checked to the chosen transaction code with transaction SU24 and set Default Status to "Yes".
- B. Assign the authorization object to be checked to the chosen transaction code in the SAP
- C. Assign authorization object S\_START to the chosen transaction code with transaction SU24 and specify the Program ID and Object Type.
- D. Assign the authorization object and permissions to the chosen transaction code using transaction SE93.

**Answer: C**

### NEW QUESTION # 84

An authorization based on what object is required for trusted system access to an SAP Fiori back-end server?

- A. S\_RFC
- B. S\_SERVICE
- C. S\_START
- D. S\_RFCACL

**Answer: D**

Explanation:

For trusted system access to an SAP Fiori back-end server, the authorization object S\_RFCACL is required.

S\_RFCACL (RFC Authorization for Trusted Systems) controls access in trusted RFC (Remote Function Call) connections, which are used to establish secure communication between the Fiori front-end server and the back-end server. This object ensures that only authorized systems or users can execute RFC calls in a trusted relationship, verifying the calling system's identity and the user's permissions. It is critical for securing Fiori app access, as these apps rely on RFC connections to retrieve data from the back-end. S\_START is used for starting Fiori apps, S\_SERVICE governs OData service access, and S\_RFC controls general RFC access but lacks the trusted system specificity of S\_RFCACL. By requiring S\_RFCACL, SAP ensures that trusted connections are tightly controlled, preventing unauthorized access and maintaining the integrity of Fiori back-end interactions in SAP S/4HANA systems.

### NEW QUESTION # 85

What can be assigned directly to a user when using the SAP Launchpad service in SAP BTP?

- A. Catalogs
- B. Spaces
- C. Launchpad roles
- D. **Role collections**

**Answer: D**

Explanation:

In the SAP Launchpad service within SAP Business Technology Platform (BTP), Role collections can be assigned directly to a user. Role collections are groups of roles that define access to specific applications, services, or functionalities within the Launchpad, allowing administrators to grant users the necessary permissions to access content, such as Fiori apps or custom applications. By assigning role collections directly to users in the SAP BTP subaccount, administrators ensure that users have the appropriate access rights tailored to their responsibilities. Spaces, which organize apps in the Launchpad, and Catalogs, which group apps and tiles, are assigned to roles or role collections, not directly to users. Launchpad roles are not a distinct entity in SAP BTP; roles are part of role collections. This direct assignment of role collections simplifies access management, ensuring secure and efficient user access to the SAP Launchpad service while aligning with SAP BTP's security and authorization framework.

## NEW QUESTION # 86

Which of the following services does the Identity Authentication Service provide? Note: There are 2 correct answers to this question.

- A. **Single Sign-On**
- B. Central User Repository
- C. **Authentication**
- D. Policy refinement

**Answer: A,C**

Explanation:

\* Context: Identity Authentication Service (IAS) supports secure user authentication and enables Single Sign-On (SSO) across systems.

\* Solution Descriptions:

\* Authentication: Verifies user credentials and identity.

\* Single Sign-On (SSO): Allows seamless login across SAP and third-party systems without requiring multiple authentications.

SAP Security References:

\* SAP Identity Authentication Service (IAS) Guide

\* SAP SSO Configuration Documentation

## NEW QUESTION # 87
