For as long as you study with our C\_THR92\_2505 exam questions, then you will find that the content of our C\_THR92\_2505 preparation braindumps is all the hot hit of the newest knowledge and keypoints of the subject, you will learn so much to master the skills which will help you solve your problems in your work. And besides, you can achieve the certification for sure with our C\_THR92\_2505 study guide.

### SAP Certified Associate - SAP SuccessFactors People Analytics: Reporting Sample Questions (Q62-Q67):

#### NEW QUESTION # 62

How do you give an analyst permission to build tiles?

- A. Add the analyst to the role-based permission group Dashboard Administrators.
- **B. Assign the role-based permission in the Manage Dashboards/Reports RBP Category.**
- C. Assign the role-based permission in the Analytics RBP Category.
- D. Assign the analyst as a dashboard administrator in Provisioning.

**Answer: B**

Explanation:

\* Granting Tile Creation Permissions

\* To enable an analyst to build tiles, you need to assign the appropriate Role-Based Permission (RBP) in the Manage Dashboards/Reports category.

\* Why Other Options are Incorrect

\* A. Analytics RBP Category: This does not provide permissions specific to tiles.

\* B. Dashboard administrator in Provisioning: Provisioning is not required for this task.

\* C. Dashboard Administrators Group: Adding to this group is not sufficient for tile creation.

References

\* SAP SuccessFactors Role-Based Permissions Documentation

#### NEW QUESTION # 63

You are using a pivot table in your canvas report but the report does NOT display the most recent data. What could be the reason?

- A. You are using the percent of total option.
- B. You are using a wrong People Scope.
- C. You are NOT using a template.
- **D. You are using a query with a static date filter.**

**Answer: D**

Explanation:

\* Issue with Static Date Filters:

\* If the query uses a static date filter (e.g., a specific range like "January 1, 2023, to March 31, 2023"), the report will not reflect the most recent data as the filter restricts results to the defined date range.

\* Resolution:

\* Update the query to use dynamic date filters (e.g., "Last 30 Days" or "Current Year") to ensure the pivot table includes the latest data.

#### NEW QUESTION # 64

In a live data query, what are user-prompted filter types? Note: There are 2 correct answers to this question.

- A. People Scope
- B. Runtime
- C. Filter Groups
- D. Dynamic

**Answer: A,B**

Explanation:

- \* Runtime Filters (A):
- \* These are filters that the user is prompted to set when executing a report. The user can define filter criteria dynamically at runtime.
- \* People Scope (D):
- \* This filter type allows reports to be filtered based on groups or populations defined in the user's permissions, such as specific departments or locations.

#### NEW QUESTION # 65

Why is it important to consider the People step of the report definition when you share a table report with another user?

- A. The user may NOT have the same line of sight.
- B. The user may NOT have access to the fields in the report.
- C. The user may NOT have access to run reports.
- D. The user may NOT have access to the relevant report domain.

**Answer: A**

Explanation:

- \* People Step in Report Definition:
- \* The People step in a report determines the population (target group) of employees included in the report.
- \* When you share the report, the recipient's line of sight (determined by their Role-Based Permissions) will affect their ability to view the data.
- \* Example Scenario:
- \* If the report is configured to include data for a specific department, but the user does not have permission to view data for that department, they may see limited or no data.

#### NEW QUESTION # 66

What happens when you enable inline translation of a Story as it relates to future edits of the Story report?

Note: There are 2 correct answers to this question.

- A. The source language is chosen from enabled locales on the instance when enabling translation.
- B. The source language is set to the current locale of the individual who enabled translation.
- C. The report can be edited in any language.
- D. The report can be edited only in the source language.

**Answer: A,D**

Explanation:

- \* Inline Translation Overview Inline translation in SAP SuccessFactors Stories allows users to translate report text and components into multiple languages. This feature is particularly useful in multi-locale environments to ensure users view reports in their preferred language.
- \* Source Language Setting
- \* When inline translation is enabled, the source language is selected from the list of locales enabled on the instance. This ensures that translation aligns with existing localization settings.
- \* The report can only be edited in the source language to maintain consistency across translations.
- \* Explanation of Correct Answers
- \* Option A: Correct, as the source language must be chosen from the available locales when inline translation is activated.
- \* Option B: Correct, as any edits to the report must be made in the source language to avoid inconsistencies.
- \* Explanation of Incorrect Options
- \* Option C: Incorrect, because the source language is not dynamically set to the current locale of the individual enabling translation.
- \* Option D: Incorrect, because editing in any language is not allowed once inline translation is enabled-only the source language can be edited.
