## Latest C\_TS414\_2023 Exam Simulator, Latest C\_TS414\_2023 Exam Questions Vce

The users can instantly access the product after purchasing it from ExamsReviews, so they don't have to wait to prepare for the C\_TS414\_2023 Exams. The 24/7 support system is available for the customers, so they can contact the support whenever they face any issue, and it will provide them with the solution. Furthermore, ExamsReviews offers up to 1 year of free updates and free demos of the product.

## SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Quality Management Sample Questions (Q64-Q69):

### NEW QUESTION # 64

You must assign a certificate profile for outgoing certificates to a key combination. What key combination can be used without additional settings?

- A. Material Type
- B. Material
- C. Customer
- **D. Material/Customer**

**Answer: D**

Explanation:

In SAP S/4HANA Cloud Private Edition, Quality Management, certificate profiles for outgoing certificates (e.g., quality certificates issued to customers) are assigned to specific key combinations that define the context in which the certificate is generated. The certificate profile determines which characteristics and data are included on the certificate, typically for an outbound delivery process. The key combination "Material /Customer" is the standard option that can be used without additional configuration because it aligns with the default settings in SAP's Quality Management (QM) module for certificate processing.

\* Material/Customer: This combination links the certificate profile to a specific material and customer, allowing the system to retrieve relevant inspection results and batch data for that pairing. It is preconfigured in the standard SAP system under the certificate profile assignment in Customizing (SPRO > Quality Management > Quality Certificates > Outgoing > Define Certificate Profiles). No additional settings are required because this is a common business scenario where certificates are tailored to customer-specific requirements for a material.

\* Material: Assigning a certificate profile only to a material requires additional settings to ensure the system knows which customer or delivery context to apply it to, as certificates are typically customer-facing. This option is valid but not default without further configuration.

\* Material Type: This is too broad and not directly supported as a standalone key combination for certificate profiles without custom enhancements, as certificate profiles need more specific granularity.

\* Customer: Assigning to just a customer lacks the material context, making it incomplete for certificate generation without additional setup.

Thus, "Material/Customer" is the most straightforward and default-supported key combination. References:

SAP Help Portal - "Quality Certificates in QM" (Outgoing Certificates); SAP S/4HANA Cloud Private Edition, Quality Management Certification Guide (C\_TS414\_2023).

#### NEW QUESTION # 65

Which of the following QM business processes can require a user's digital signature?(3 Correct Ans)

- A. Manual confirmation of a physical sample drawing
- B. Approval of quality notification
- C. UD for an inspection lot
- D. Result recording in the inspection Lot
- E. Defective recording in the inspection Lot

Answer: A,C,D

#### NEW QUESTION # 66

During which of the following steps in a business process does a dynamic modification rule change severely

- A. Creation of a batch
- B. The creation of a inspection Lot
- C. The creation of a certification
- D. The creation of a notification

Answer: B

#### NEW QUESTION # 67

A buyer creates a purchase order for a material for which QM in procurement is active What does the system verify when a target QM system is assigned to the material master? Note : 3 Correct answer

- A. The defined assignments for QM systems in the implementation Guide (IMG)
- B. The purchasing info record
- C. The inspection type
- D. The QM quality info record
- E. "The vendor master

Answer: A,D,E

#### NEW QUESTION # 68

Which customizing settings are mandatory for defects recording with inspection lots? Note: There are 2 correct answers to this question.

- **A. Define the report type**
- **B. Assign a notification type to an inspection type**
- C. Activate reference to existing notifications
- D. Activate the workflow template

**Answer: A,B**

Explanation:

Defects recording for inspection lots (e.g., transaction QE51N) requires specific Customizing:

\* Assign a Notification Type to an Inspection Type (A): In Customizing (SPRO > QM > Quality Inspection > Inspection Lot Creation > Maintain Inspection Types), linking a notification type (e.g., Q3) to an inspection type (e.g., 01) enables automatic or manual notification creation for defects, a mandatory step for integration.

\* Define the Report Type (D): The report type (SPRO > QM > Quality Inspection > Defects Recording > Define Report Types) must be defined to determine the defect recording layout and process, a required setting.

\* Activate the Workflow Template (B): Workflow is optional for notifications, not mandatory for defect recording.

\* Activate Reference to Existing Notifications (C): This is an optional enhancement, not a requirement.

Thus, "Assign a notification type to an inspection type" and "Define the report type" are the correct answers.
