Valid C_TS414_2023 Exam Pattern - New C_TS414_2023 Exam Papers

The Certified Production and C_TS414_2023 certification is a valuable credential earned by individuals to validate their skills and competence to perform certain job tasks. Your SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Quality Management C_TS414_2023 Certification is usually displayed as proof that you've been trained, educated, and prepared to meet the specific requirement for your professional role.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Quality Management Sample Questions (Q43-Q48):

NEW QUESTION # 43

Which partner role is available in a standard vendor notification

- A. coordinator
- B. shipping point
- C. sold to party
- D. work center

Answer: A

NEW QUESTION # 44

Which catalogue types require the use of selection sets? Correct 2

- A. Tasks
- **B. Usage decision**
- C. Defect type
- **D. Characteristic**
- E. Actions

Answer: B,D

NEW QUESTION # 45

A buyer wants to quality management department to approve a new vendor material combination.

After activating the QM in procurement process, what the quality management department ensure in.....
Correct 2

- A. The material master has a relevant QM Control key assigned to it
- **B. A quality agreement for vendor master exists**
- C. The material master has an active inspection type
- D. The inspection plan includes a relevant control key at operation level
- **E. A valid release quality info record exists**

Answer: B,E

NEW QUESTION # 46

You create a complaint against a supplier with reference to the material document year, number, and item.

You create it from a goods receipt for the purchasing document. What information is copied to the notification? Note: There are 3 correct answers to this question.

- A. Reference quantity and unit
- **B. Purchasing document number and item**
- **C. Material number**
- **D. Inspection lot number**
- E. Advanced shipping number

Answer: B,C,D

Explanation:

When creating a supplier complaint notification (e.g., Q2) from a goods receipt material document (transaction QM01):

* Purchasing Document Number and Item (A): The PO number and item are copied from the material document (linked via MIGO), providing the procurement context.

* Material Number (B): The material number is transferred to identify the affected product.

* Inspection Lot Number (C): If an inspection lot (e.g., type 01) was created during GR, its number is copied to link quality data (SPRO > QM > Quality Notifications > Integration with Inspection Lots).

* Reference Quantity and Unit (D): Quantity is referenced but not automatically copied to the notification header/item in standard SAP.

* Advanced Shipping Number (E): ASN is logistics-related (e.g., inbound delivery), not typically copied from a material document.

Thus, "Purchasing document number and item," "Material number," and "Inspection lot number" are the correct answers. References: SAP Help Portal - "Notification Creation from Goods Receipt"; SAP S/4HANA QM User Guide - "Supplier Complaints".

NEW QUESTION # 47

The catalog profile contains a subset of code groups and codes from different catalog types. Where can you assign the catalog profile? Note: There are 3 correct answers to this question.

- **A. In the quality management view of the material master**

- B. In the customizing settings for the notification type
- C. In the customizing settings for the report type
- D. In the customizing settings for the inspection type
- E. In the master inspection characteristic

Answer: A,B,D

Explanation:

A catalog profile in SAP S/4HANA QM defines a collection of code groups and codes from various catalog types (e.g., defects, usage decisions) for use in quality processes. It can be assigned at multiple levels:

* In the Quality Management View of the Material Master (A): The catalog profile is assigned in the QM view of the material master (transaction MM01/MM02, field QMAT-PROF) at the plant level. This links it to inspection lots for that material, controlling defect recording or UD codes.

* In the Customizing Settings for the Notification Type (B): In Customizing (SPRO > Quality Management > Quality Notifications > Notification Creation > Define Notification Types), you can assign a catalog profile to a notification type (e.g., Q1 for customer complaints). This determines the codes available during notification processing.

* In the Customizing Settings for the Inspection Type (C): In Customizing (SPRO > Quality Management > Quality Inspection > Inspection Lot Creation > Maintain Inspection Types), a catalog profile can be linked to an inspection type (e.g., 01 for goods receipt). This governs the codes used in inspection lots of that type.

* In the Master Inspection Characteristic (D): MICs (transaction QS21) use individual code groups or selected sets, not catalog profiles directly.

* In the Customizing Settings for the Report Type (E): Report types (used in defect recording layouts) reference catalog profiles indirectly via other objects, not as a direct assignment.

Thus, the correct answers are "A, B, C," as these are the standard assignment points. References: SAP Help Portal - "Catalog Profiles in QM"; SAP S/4HANA QM Customizing Guide - "Notification and Inspection Types".

NEW QUESTION # 48

.....

Pass the SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Quality Management C_TS414_2023 certification exam which is a challenging task.
