SAP C_TS414_2023 Instant Access, C_TS414_2023 Reliable Test Forum

With the rapid development of the economy, the demands of society on us are getting higher and higher. If you can have C_TS414_2023 certification, then you will be more competitive in society. We have chosen a large number of professionals to make C_TS414_2023 learning question more professional, while allowing our study materials to keep up with the times. Of course, we do it all for you to get the information you want, and you can make faster progress. You can also get help from C_TS414_2023 Exam Training professionals at any time when you encounter any problems. We can be sure that with the professional help of our C_TS414_2023 test guide you will surely get a very good experience. Good materials and methods can help you to do more with less. Choose C_TS414_2023 test guide to get you closer to success.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Quality Management Sample Questions (Q56-Q61):

NEW QUESTION # 56

During an in process inspection for production orders, such as inspection type 09, which inventory posting is possible?

- A. Blocked stock
- **B. None**
- C. Quality stock
- D. Unrestricted Stock

Answer: B

NEW QUESTION # 57

You have created a customer business partner in Sales and Distribution. What are some of the options available for an outbound quality inspection? Note: There are 2 correct answers to this question.

- A. The inspection occurs after release of the sales order
- **B. The inspection occurs before the goods issue is posted**
- C. The inspection occurs after creation of the sales order
- **D. The inspection is skipped**

Answer: B,D

Explanation:

Outbound quality inspections (e.g., inspection type 10) in Sales and Distribution (SD) occur for deliveries:

* The Inspection is Skipped (A): If no inspection type (e.g., 10) is active in the material master or quality info record: SD, the inspection can be skipped, a valid option in standard SAP.

* The Inspection Occurs Before the Goods Issue is Posted (D): For inspection type 10, the inspection lot is created with the delivery (before goods issue, transaction VL02N), allowing inspection before stock is moved (standard process).

* After Release of the Sales Order (B): Inspections are tied to deliveries, not sales order release.

* After Creation of the Sales Order (C): Inspection lots are not created at SO creation; they require a delivery.

Thus, "The inspection is skipped" and "The inspection occurs before the goods issue is posted" are the correct answers. References: SAP Help Portal - "Outbound Inspections in QM"; SAP S/4HANA QM User Guide - "SD Integration".

NEW QUESTION # 58

The IMG includes a customizing activity in which you assign object categories to a notification type? Which of the following object category already exist in standard setting? (3 Correct Ans)

- A. Purchase order item
- **B. Batch**
- C. Order(pp-pi)
- **D. Serial Number**
- **E. Material**

Answer: B,D,E

NEW QUESTION # 59

In which business object do you set whether the supplier must provide a quality certificate and the type of quality certificate that is required?

- **A. Quality info record: Procurement**
- B. Material master
- C. Purchase order
- D. Business partner

Answer: A

Explanation:

The requirement for a supplier to provide a quality certificate and its type is configured in:

* Quality Info Record: Procurement (D): In the quality info record (transaction QI01), you set the "Certificate Required" indicator and specify the "Certificate Type" (e.g., "ISO 9001") under the "Certificate Data" section. This links the requirement to a specific material-supplier combination, enforced during GR (SPRO > QM > Quality Inspection > Quality Info Record).

* Purchase Order (A): POs inherit certificate settings from the quality info record, not define them.

* Material Master (B): The QM view defines inspection types, not certificate requirements or types.

* Business Partner (C): Supplier master data lacks QM-specific certificate settings.

Thus, "Quality info record: Procurement" is the correct answer. References: SAP Help Portal - "Quality Info Record in QM"; SAP S/4HANA QM User Guide - "Certificate Management".

NEW QUESTION # 60

Which of the following are features of the clean core dashboard? Note: There are 2 correct answers to this question.

- A. It can be used in all SAP S/4HANA Cloud editions
- B. Customers can grant access to the dashboard to partners
- C. It can be accessed by using SAP For Me
- D. Customers can use the dashboard in the dev, test, and production tenants

Answer: C,D

Explanation:

The clean core dashboard in SAP S/4HANA monitors system adherence to clean core principles:

* Customers Can Use the Dashboard in the Dev, Test, and Production Tenants (B): The dashboard is available across all system tenants (development, test, production) to assess clean core status universally.

* It Can Be Accessed by Using SAP For Me (C): SAP For Me (customer portal) provides access to the clean core dashboard, a standard entry point as of 2025.

* Customers Can Grant Access to Partners (A): Partner access isn't a standard feature; it's customer- controlled.

* It Can Be Used in All SAP S/4HANA Cloud Editions (D): Primarily for Cloud Private Edition and Public Cloud, not guaranteed for all editions (e.g., on-premise specifics vary).

Thus, "Customers can use the dashboard in the dev, test, and production tenants" and "It can be accessed by using SAP For Me" are the correct answers. References: SAP Help Portal - "Clean Core Dashboard"; SAP S/4HANA Cloud User Guide - "SAP For Me".

NEW QUESTION # 61

.....

The customers can prepare from the actual C_TS414_2023 and can clear SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Quality Management exam with ease and if they failed to do it despite all of their efforts they can get a full refund of their money according to terms and conditions.
