C_TS414_2023 Exam Questions And Answers & C_TS414_2023 Intereactive Testing Engine

Our C_TS414_2023 Test Braindumps are by no means limited to only one group of people. Whether you are trying this exam for the first time or have extensive experience in taking exams, our C_TS414_2023 latest exam torrent can satisfy you. This is due to the fact that our C_TS414_2023 test braindumps are humanized designed and express complex information in an easy-to-understand language. You will never have language barriers, and the learning process is very easy for you. What are you waiting for? If you are preparing to take the test, you can rely on our learning materials. You will also be the next beneficiary. After you get SAP certification, you can get boosted and high salary to enjoy a good life.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Quality Management Sample Questions (Q24-Q29):

NEW QUESTION # 24
Which valuation mode can be used for a quantitative inspection characteristic? Note: There are 3 correct answers to this question.

- A. Manual valuation
- B. Mean value within tolerance range
- C. Valuation according to characteristic attribute code
- D. Attributive inspection nonconforming units
- E. Attributive inspection number of defects

Answer: A,B,E

Explanation:
Valuation modes in SAP QM (defined in the sampling procedure, transaction QDV1) determine how quantitative characteristics are evaluated:
* Manual Valuation (B): Allows manual acceptance/rejection of quantitative results (e.g., based on measured values), a standard option for flexibility.
* Attributive Inspection Number of Defects (D): Used for quantitative characteristics when counting defects (e.g., scratches), treating it as an attribute-like valuation for nonconformities.
* Mean Value Within Tolerance Range (E): The system valuates based on whether the mean of recorded values falls within tolerances, a common quantitative mode.
* Attributive Inspection Nonconforming Units (A): Specific to qualitative attributes, not quantitative measurements.
* Valuation According to Characteristic Attribute Code (C): Applies to qualitative characteristics with predefined codes, not quantitative ones.
Thus, "Manual valuation," "Attributive inspection number of defects," and "Mean value within tolerance range" are the correct answers.References: SAP Help Portal - "Valuation Modes in QM"; SAP S/4HANA QM User Guide - "Sampling Procedures".

NEW QUESTION # 25
You are using quantitative inspection characteristics during a production results recording. What are some of the results confirmation control indicators available for quantitative results? Note: There are 3 correct answers to this question.

- A. Mean value and standard deviation
- B. Single result
- C. Mean value
- D. Classed recording
- E. Summarized recording

Answer: B,D,E

Explanation:
For quantitative characteristics in results recording (transaction QE51N), control indicators in the MIC (transaction QS23) define how results are confirmed:
* Summarized Recording (B): Records a single aggregated value (e.g., average) for the sample, a standard option for efficiency.
* Classed Recording (C): Results are grouped into classes (e.g., ranges like 10-15 mm), common for statistical analysis.
* Single Result (D): Each individual result is recorded separately, ideal for detailed tracking.
* Mean Value and Standard Deviation (A): These are calculated outputs, not control indicators for recording type.
* Mean Value (E): This is a result, not a control indicator for how data is entered.
Thus, "Summarized recording," "Classed recording," and "Single result" are the correct answers.References:
SAP Help Portal - "Results Recording for Quantitative Characteristics"; SAP S/4HANA QM User Guide - "Control Indicators".

NEW QUESTION # 26
Which of the following documents can you use as a reference document when creation a customer claim?(2 correct ans)

- A. Sales order
- B. Material document
- C. Delivery
- D. Quotation
- E. QM order

Answer: A,C

NEW QUESTION # 27
Which partner function is mandatory when creating a quality notification for the Customer Complaint notification origin?

- A. Author
- B. Sold-to party

- C. Interested party
- D. Contact person

Answer: B

Explanation:
For a quality notification with origin "Customer Complaint" (e.g., type Q1, transaction QM01):
* Sold-to Party (B): The sold-to party (customer) is mandatory because it identifies who raised the complaint, a key field in the notification header linked to SD data (SPRO > QM > Quality Notifications
> Notification Creation > Define Notification Types). Without this, the notification cannot be saved.
* Interested Party (A): Optional, used for additional stakeholders.
* Contact Person (C): Optional, specifies a customer contact but isn't required.
* Author (D): The creator (system user) is auto-filled, not a mandatory partner function.
Thus, "Sold-to party" is the correct answer.References: SAP Help Portal - "Customer Complaint Notifications"; SAP S/4HANA QM User Guide - "Partner Functions".

NEW QUESTION # 28
During the production inspection, which elements does the system use to determine the layout of results and defects recordings?
Note : 3 correct answer

- A. Status profiles
- B. Report type
- C. Partner profiles
- D. Code groups
- E. Confirmation profiles

Answer: B,D,E

NEW QUESTION # 29
