SAP Certified Associate - SAP S/4HANA Cloud Private Edition, Quality Management Sample Questions (Q23-Q28):

NEW QUESTION # 23

What must you do in configuration to enable defects recording during an inspection with inspection lots? Note : 2 correct answer

- A. Define the defect report type
- B. Activate reference to Existing notifications.
- C. Activate the work flow template
- D. Assign the notification type to the inspection type.

Answer: A,D

NEW QUESTION # 24

Which partner function is mandatory when creating a quality notification for the Customer Complaint notification origin?

- A. Contact person
- B. Author
- C. Interested party
- **D. Sold-to party**

Answer: D

Explanation:

For a quality notification with origin "Customer Complaint" (e.g., type Q1, transaction QM01):

* Sold-to Party (B): The sold-to party (customer) is mandatory because it identifies who raised the complaint, a key field in the notification header linked to SD data (SPRO > QM > Quality Notifications

> Notification Creation > Define Notification Types). Without this, the notification cannot be saved.

* Interested Party (A): Optional, used for additional stakeholders.

* Contact Person (C): Optional, specifies a customer contact but isn't required.

* Author (D): The creator (system user) is auto-filled, not a mandatory partner function.

Thus, "Sold-to party" is the correct answer. References: SAP Help Portal - "Customer Complaint Notifications"; SAP S/4HANA QM User Guide - "Partner Functions".

NEW QUESTION # 25

Which type of inspection point exist in the system(3 correct ans)

- A. Inspection point for incoming certificates
- **B. Inspection point for equipment**
- **C. Inspection point for functional location**
- **D. Inspection point for Physical sample**
- E. Inspection point for defects recording

Answer: B,C,D

NEW QUESTION # 26

During quality notification processing, the activities from the action box can be used. How can the activities be documented in the quality notification? Note: There are 2 correct answers to this question.

- **A. As cause**
- B. As activity
- **C. As task**
- D. As item

Answer: A,C

NEW QUESTION # 27

Which of the following sample categories can be maintained in the sample-drawing item? Note: There are 3 correct answers to this question.

- **A. Primary sample**
- B. Sample for storage condition
- **C. Pooled sample**
- D. Initial sample
- **E. Reserve sample**

Answer: A,C,E

Explanation:

Sample-drawing items in the sample-drawing procedure (transaction QPV2) define sample categories:

* Reserve Sample (A): A standard category for samples retained for future testing (e.g., stability), maintained in the procedure.

* Pooled Sample (B): Represents combined samples for collective testing, a defined category in sample management.

* Primary Sample (D): The initial sample taken for immediate inspection, a core category in the procedure.

* Initial Sample (C): Not a distinct category; overlaps with "Primary sample."

* Sample for Storage Condition (E): Not a standard category; storage conditions are attributes, not sample types.

Thus, "Reserve sample," "Pooled sample," and "Primary sample" are the correct answers. References: SAP Help Portal - "Sample Management in QM"; SAP S/4HANA QM User Guide - "Sample-Drawing Procedure".

NEW QUESTION # 28

.....

Though there are three versions of the C_TS414_2023 training braindumps: the PDF, Software and APP online. I like the Software version the most.
