# C_TS422_2023 Valid Braindumps Pdf - C_TS422_2023 Exam Pass Guide

For offline practice, our SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing (C_TS422_2023) desktop practice test software is ideal. This SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing (C_TS422_2023) software runs on Windows computers. The SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing (C_TS422_2023) web-based practice exam is compatible with all browsers and operating systems. No software installation is required to go through the web-based SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing (C_TS422_2023) practice test.

PassCollection is a website which always provide you the latest and most accurate information about SAP certification C_TS422_2023 exam. In order to allow you to safely choose us, you can free download part of the exam practice questions and answers on PassCollection website as a free try. PassCollection can ensure you 100% pass SAP Certification C_TS422_2023 Exam.

## C_TS422_2023 sure test & C_TS422_2023 practice torrent & C_TS422_2023 study pdf

We have always taken care to provide our customers with the very best. So we provide numerous benefits along with our SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing exam study material. We provide our customers with the demo version of the SAP C_TS422_2023 Exam Questions to eradicate any doubts that may be in your mind regarding the validity and accuracy. You can test the product before you buy it.

## SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing Sample Questions (Q18-Q23):

**NEW QUESTION # 18**
Advanced Planning uses master data from SAP S/4HANA Cloud Private Edition. In which data objects can you set the Advanced Planning flag? Note: There are 2 correct answers to this question.

- A. Work center
- B. Material
- C. Plant
- D. Production version

**Answer: A,B**

Explanation:

In SAP S/4HANA Cloud Private Edition, Advanced Planning (PP/DS) integrates with core master data, and the "Advanced Planning" flag activates PP/DS-specific planning. This flag can be set in:

* Work center(A): In the work center (transaction CR02, Basic Data tab, field: Advanced Planning), checking this flag (or integrating with a resource in APO/PP/DS) enables detailed scheduling and capacity planning in PP/DS. It designates the work center as a resource for finite scheduling (e.g., in

/SAPAPO/RES01).

* Material(D): In the material master (MM02, Advanced Planning tab, field: PP/DS Planning), activating this flag makes the material relevant for PP/DS planning. It enables features like detailed scheduling, heuristics, and integration with APO or embedded PP/DS functionalities.

Plant(B) doesn't have an Advanced Planning flag-PP/DS activation is at the system or object level (e.g., via CIF integration model), not plant-specific.Production version(C) (MRP 4 view) links BOMs and routings but lacks a specific PP/DS flag-its relevance comes from the material and work center settings. This is per SAP' s PP/DS master data setup.

## NEW QUESTION # 19

What is the difference between co-products and by-products? Note: There are 2 correct answers to this question.

- A. Only co-products have movement type 531.
- B. Only co-products appear in the process or production order settlement rule.
- C. Only co-products have a non-zero inventory valuation.
- D. Only co-products have movement type 101.

**Answer: B,D**

Explanation:

In SAP S/4HANA,co-productsandby-productsare outputs of a production process, but they differ in purpose, valuation, and system handling:

* Only co-products have movement type 101(C): Co-products are intentionally produced alongside the main product and are goods receipted into inventory using movement type 101 (transaction MIGO or CO11N confirmation) as part of the production order. This reflects their status as primary outputs with planned quantities in the BOM (marked with a negative quantity and co-product indicator in CS01). By- products, conversely, use movement type 531 for goods receipt, as they are secondary outputs.

* Only co-products appear in the process or production order settlement rule(D): Co-products are included in the settlement rule of the production order (visible in CO02, Settlement Rule) because their costs are apportioned based on apportionment structures (e.g., equivalence numbers in the material master, MRP 2 view). By-products do not appear in the settlement rule; their costs are typically offset against the main product via a cost credit (configured in the BOM).

Only co-products have non-zero inventory valuation(A) is incorrect-by-products can also have inventory valuation (e.g., standard price), though often lower.Only co-products have movement type 531(B) is false-

531 is specific to by-products, not co-products. This aligns with SAP's co/by-product handling in production.

## NEW QUESTION # 20

In documentation for MRP in Advanced Planning you read that new orders are created through infinite planning. What does this mean for the capacity requirements of a new order?

- A. MRP creates the capacity requirements without considering existing load on the work centers.
- B. MRP assigns the capacity requirements automatically to work centers with the earliest available capacity.
- C. MRP creates the capacity requirements at the earliest possible time.
- D. MRP assigns the capacity requirements automatically after the last scheduled operation for each work center.

**Answer: A**

Explanation:

In SAP S/4HANA Advanced Planning (PP/DS - Production Planning and Detailed Scheduling), infinite planning assumes unlimited capacity availability during the initial planning phase. When the documentation states that "new orders are created through infinite planning," it means that MRP generates planned orders without checking the existing capacity load on work centers. Thus,MRP creates the capacity requirements without considering existing load on the work centers(B). This approach prioritizes material availability and scheduling over capacity constraints, leaving capacity leveling to a subsequent step (e.g., using heuristics or manual adjustments in PP/DS).

Option A is incorrect because infinite planning does not sequence capacity requirements after the last operation; it ignores capacity entirely. Option C is not accurate, as "earliest possible time" implies a finite scheduling logic, which contradicts infinite planning. Option D is also incorrect, as infinite planning does not consider available capacity for assignment. This is consistent with SAP's

PP/DS documentation, where infinite planning is a preliminary step before finite scheduling.

**NEW QUESTION # 21**

Why would you use phantom assemblies?
Note: There are 3 correct answers to this question.

- A. To reduce the number of changes required in bills of material
- B. To increase the number of planning levels
- C. To make the assignment of components easier
- D. To simplify the structure of bills of material
- E. To reduce the number of material masters

**Answer: A,C,D**

**NEW QUESTION # 22**

How are dependent requirements for assemblies created? Note: There are 2 correct answers to this question.

- A. They are only created for multilevel bill of material (BOM) structures.
- B. They are created on assembly level during the planning run.
- C. They are created with exact times in Advanced Planning.
- D. They are created together with the independent requirement for the finished product.

**Answer: B,C**

**NEW QUESTION # 23**

......

To assist applicants preparing for the SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing (C_TS422_2023) real certification exam effectively, PassCollection offers SAP C_TS422_2023 desktop practice test software and a web-based practice exam besides actual PDF C_TS422_2023 exam questions. These C_TS422_2023 Practice Exams replicate the SAP C_TS422_2023 real exam scenario and offer a trusted evaluation of your preparation. No internet connection is necessary to use the C_TS422_2023 Windows-based practice test software.
