## SAP C\_WME\_2506 Exam Question - C\_WME\_2506 Latest Dumps Ppt

Our test bank includes all the possible questions and answers which may appear in the real exam and the quintessence and summary of the exam papers in the past. We strive to use the simplest language to make the learners understand our C\_WME\_2506 study materials and the most intuitive method to express the complicated and obscure concepts. For the learners to fully understand our C\_WME\_2506 Study Materials, we add the instances, simulation and diagrams to explain the contents which are very hard to understand. So after you use our C\_WME\_2506 study materials you will feel that our C\_WME\_2506 study materials' name matches with the reality.

## SAP C\_WME\_2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Starting your Digital Adoption Journey: WalkMe Fundamentals: This section of the exam measures the skills of SAP project managers and covers the foundational concepts of digital adoption within SAP environments using WalkMe. Candidates are expected to understand the value of digital adoption platforms, the basic components of WalkMe, and how these tools align with business goals. The section emphasizes knowledge of the user experience within SAP and the ability to identify opportunities for improving digital workflows through in-app guidance and automation.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Advancing your Skills in Building WalkMe Solutions: This section of the exam tests the advanced competencies of functional and business analysts in designing more complex and customized WalkMe solutions within SAP platforms. It requires a deeper understanding of user segmentation, advanced rules and triggers, performance optimization, and the use of analytics to refine user experiences. Candidates are expected to demonstrate their ability to design scalable and impactful guidance that aligns with SAP business processes and drives user adoption across the enterprise.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Getting Started with Building WalkMe Solutions: This section of the exam evaluates the capabilities of WalkMe implementers and focuses on the practical aspects of creating and configuring WalkMe solutions. It includes understanding the WalkMe Editor, planning solution flows, creating Smart Walk-Thrus, Launchers, and ShoutOuts, and managing end-user guidance effectively. Candidates should be comfortable building initial WalkMe experiences that improve SAP usability and provide contextual help for users navigating SAP applications.</li></ul>

## SAP Certified Associate - WalkMe Digital Adoption Consultant Sample Questions (Q33-Q38):

### NEW QUESTION # 33

What is the purpose of using the small ghost icon in the WalkMe Editor when customizing an invisible Launcher?

- A. To adjust the size of the Launcher
- B. To automatically make all colors of the Launcher transparent
- C. To change the Launcher's shape
- D. To add animations to the Launcher

Answer: B

### NEW QUESTION # 34

Which components should we consider mandatory for all Smart Walk-Thrus? Note: There are 2 correct answers to this question.

- A. Start Points
- B. Goals
- C. Splits
- D. Automation

Answer: A,B

### NEW QUESTION # 35

Which is the most preferred Unique User ID setting and the one you should explore first for UUID setup?

- A. Cookie
- B. WalkMe ID
- C. Variable
- D. jQuery

**Answer: C**

Explanation:

The Unique User ID (UUID) in WalkMe is used to track individual users for analytics and personalization.

The most preferred setting to explore first is a Variable, as it allows Builders to leverage an existing user identifier from the application (e.g., a user ID stored in a JavaScript variable), ensuring accurate and reliable user tracking. Variables are typically provided by the application's authentication system and are more robust than other methods, which may be less consistent or require additional configuration.

The other options are less preferred:

\* WalkMe ID(A) is a fallback generated by WalkMe but may not align with the application's user data.

\* Cookie(B) can be unreliable due to browser restrictions or clearing of cookies.

\* jQuery(D) is not a standard method for UUID setup; it's used for element selection, not user identification.

Extract from Official WalkMe Documentation:

Per the WalkMe Admin Center User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.10: User Identification):

"For UUID setup, the Variable method is the most preferred, as it uses an application-provided user identifier (e.g., a JavaScript variable) for accurate tracking. Explore this option first before fallback methods like WalkMe ID or cookies." The course Advancing Your Skills in Building WalkMe Solutions explains:

"Start with the Variable setting for UUID configuration, as it integrates with the application's user data, providing the most reliable and consistent user tracking for Insights analytics." Option C, Variable, is the most preferred UUID setting.

References:

SAP WalkMe Digital Adoption Consultant Study Guide, Section 2.10: User Identification.

WalkMe Admin Center User Guide, "UUID Configuration" Section.

Course: Advancing Your Skills in Building WalkMe Solutions, Module 16: User Tracking and Analytics Setup.

#### NEW QUESTION # 36

The Dynamic Layout of a ShoutOut in the Editor consists of which three layers? Note: There are 3 correct answers to this question.

- A. Player
- B. Z-index
- C. Frame
- D. Canvas
- E. Widget

**Answer: C,D,E**

#### NEW QUESTION # 37

Which two types of WalkMe content can make up an Onboarding Task?

- A. Resources and Shuttles
- B. SmartTips and Launchers
- C. Smart Walk-Thrus and Shuttles
- D. Smart Walk-Thrus and Resources

**Answer: D**

Explanation:

An Onboarding Task in WalkMe is a collection of steps or content designed to guide users through a set of actions to complete an onboarding process. The two types of WalkMe content that can be included in an Onboarding Task are Smart Walk-Thrus, which provide step-by-step guidance through processes, and Resources, which link to help articles or external documentation to support onboarding. These content types are versatile and align with the goal of guiding users through critical tasks.

The other options are incorrect:

\* SmartTips and Launchers(A) are not part of Onboarding Tasks; SmartTips are field-specific, and Launchers trigger other content.

\* Resources and Shuttles(C) are partially correct, but Shuttles only navigate to pages, not guide through tasks.

\* Smart Walk-Thrus and Shuttles(D) are also partially correct, but Shuttles are not task components.

Extract from Official WalkMe Documentation:

According to the WalkMe Editor User Guide (SAP WalkMe Digital Adoption Consultant Study Guide, Section 1.8: Onboarding Tasks):

"Onboarding Tasks consist of Smart Walk-Thrus, which guide users through processes, and Resources, which provide

supplementary help content to complete onboarding." The course Getting Started with Building WalkMe Solutions states: "Build Onboarding Tasks using Smart Walk-Thrus for process guidance and Resources for additional support, ensuring users have the tools to complete onboarding." Option B, Smart Walk-Thrus and Resources, is the correct answer.
