Valid Test I27001F Format - I27001F Reliable Exam Simulations

A lot of office workers in their own professional development encounter bottleneck and begin to choose to continue to get the test I27001F certification to the school for further study. We all understand the importance of education, and it is essential to get the I27001F certification. Our I27001F study tools not only provide all candidates with high pass rate study materials, but also provide them with good service. If you have some question or doubt about us or our products, you can contact us to solve it. The thoughtfulness of our I27001F Study Guide services is insuperable. What we do surly contribute to the success of I27001F practice materials.

CertiProf Certified ISO/IEC 27001:2022 Foundation Sample Questions (Q19-Q24):

NEW QUESTION # 19

What does ISO/IEC 27001:2022 require for internal audits?

- A. Conducting internal audits at planned intervals to provide information on whether the Information Security Management System conforms to the organization's own requirements and to the requirements of ISO/IEC 27001:2022
- B. A person designated by top management who can perform internal audits in all areas within the system scope
- C. A consultancy to perform second-party internal audits accurately
- D. Acquisition of a set of information security tools to document internal audits

Answer: A

Explanation:

ISO/IEC 27001:2022 requires the organization to conduct internal audits at planned intervals. These audits must determine whether the ISMS conforms to the organization's own requirements for its ISMS and to the requirements of the standard, and whether the ISMS is effectively implemented and maintained. The standard does not require a specific tool, consultant, or one designated person to audit every area. Therefore, option C is correct.

NEW QUESTION # 20

What are the phases of the PDCA cycle?

- A. Propose, Do, Validate, Act
- B. Plan, Do, Verify, Assure
- C. Plan, Do, Check, Act
- D. Plan, Validate, Verify, Act

Answer: C

Explanation:

The PDCA cycle stands for Plan, Do, Check, Act. It is a management model commonly associated with management systems, including the implementation and continual improvement of an ISMS. In the context of ISO/IEC 27001:2022, this logic supports planning the ISMS, implementing and operating it, monitoring and reviewing performance, and taking actions for continual improvement. Therefore, option B is correct.

NEW QUESTION # 21

Within the ISMS, ensuring the integration of information security management system requirements into the organization's processes is a responsibility of:

- A. The quality management representative
- **B. Top management**
- C. The IT Security Manager
- D. The Operations Manager

Answer: B

Explanation:

ISO/IEC 27001:2022 assigns leadership and accountability for the ISMS to top management. One of the specific responsibilities of top management is to ensure that the ISMS requirements are integrated into the organization's processes. This demonstrates that information security is not treated as an isolated activity, but as part of the overall governance and operation of the organization. Therefore, option D is correct.

NEW QUESTION # 22

In the context of clause 6.1 actions to address risks and opportunities, what is defined as residual risk?

- A. Effect of uncertainty on objectives
- B. None of the above
- C. Informed decision to take a particular risk
- **D. Risk remaining after risk treatment**

Answer: D

Explanation:

Residual risk is the risk that remains after risk treatment has been applied. In an ISMS, organizations assess risks, select treatment options, and implement controls or other measures to reduce risk to an acceptable level. Even after treatment, some level of risk may still remain, and that remaining portion is called residual risk. Therefore, option C is correct.

NEW QUESTION # 23

How should top management provide evidence of its commitment to the Information Security Management System?

- A. By defining a risk assessment approach
- **B. By communicating the importance of meeting ISMS requirements**
- C. By operating the Information Security Management System once it has been established
- D. By conducting an annual internal audit of the Information Security Management System

Answer: B

Explanation:

One of the explicit leadership responsibilities in ISO/IEC 27001:2022 is for top management to communicate the importance of effective information security management and of conforming to the ISMS requirements. This communication helps demonstrate visible commitment and organizational direction. Conducting internal audits and defining the risk assessment approach are important activities within the ISMS, but they are not the best direct expression of top management's evidence of commitment among the options listed. Therefore, option A is correct.

NEW QUESTION # 24

.....

To save resources of our customers, we offer real Certified ISO/IEC 27001:2022 Foundation (I27001F) exam questions that are enough to master for I27001F certification exam. Our CertiProf I27001F Exam Dumps are designed by experienced industry professionals and are regularly updated to reflect the latest changes in the Building Certified ISO/IEC 27001:2022 Foundation
