The goal of a EC-COUNCIL 712-50 mock exam is to test exam readiness. TrainingDump's online EC-Council Certified CISO (CCISO) 712-50 practice test can be accessed online through all major browsers such as Chrome, Firefox, Safari, and Edge. You can also download and install the offline version of EC-Council Certified CISO (CCISO) 712-50 Practice Exam software on Windows-based PCs only. You can prepare for the EC-Council Certified CISO (CCISO) exam without an internet connection using the offline version of the mock exam.

The CCISO certification is considered to be the highest level of certification for CISO professionals. It is designed to equip candidates with the skills and knowledge required to lead and manage information security programs from a strategic and operational standpoint. 712-50 Exam is vendor-neutral and covers a wide range of topics, including information security management, regulatory compliance, risk management, and incident response.

712-50 Practice Guide | 712-50 New Soft Simulations

When we are in some kind of learning web site, often feel dazzling, because web page design is not reasonable, put too much information all rush, it will appear desultory. Believe it or not, we face the more intense society, and we should prompt our competitiveness and get a 712-50 certification to make our dreams come true. Although it is not an easy thing to achieve it, once you choose our 712-50 prepare torrent, we will send the new updates for one year long, which is new enough to deal with the exam for you and guide you through difficulties in your exam preparation.

EC-Council 712-50: Preparation Phase

EC-Council offers the comprehensive resources that the students can use to prepare for the test. Thus, the first thing that you must do after making up your mind to pursue the certification exam is to download the blueprint from the official website. It is important to go over the topics it covers in detail before starting any preparation. This is a starting point, and after that, you should proceed with the following steps:

- EC-Council also offers the official training course to help you adequately prepare for the 712-50 test. Those who want to choose the self-study route do not need to attend this option. They can proceed to purchase the CCISO Body of Knowledge for exam preparation. The applicants can also purchase only the courseware, but to choose this variant of preparation, they must possess the required experience in information security management. They should submit a filled exam eligibility application form that validates that they possess a minimum of five years of work experience in five CCISO domains.
- An alternative preparation option is the iLearn self-paced online training. It covers the same modules that are covered in the live course. The only difference is that the iLearn option is prerecorded and offered as a streaming video tutorial. It is recommended for the individuals with busy work schedules.
- To gain competence in the exam topics, the next step is to get the EC-Council CCISO BOK. It covers five domains of Information Security Management in detail and explains the concepts. Having this material will act as a reference resource throughout the preparation process and even beyond;

The learners can also opt for the in-person training, which is delivered by an expert and certified EC-Council trainer. The details of all the available resources can be found on the official site.

EC-COUNCIL 712-50, also known as the EC-Council Certified CISO (CCISO) Exam, is designed for information security professionals who aspire to become a Chief Information Security Officer (CISO). 712-50 Exam is recognized globally and provides a comprehensive understanding of the five domains of the CISO job function, including governance and risk management, information security controls and audit management, security program management and operations, information security core concepts, and strategic planning, finance, and vendor management.

EC-COUNCIL EC-Council Certified CISO (CCISO) Sample Questions (Q305-Q310):

NEW QUESTION # 305

You have been promoted to the CISO of a retail store. Which of the following compliance standards is the MOST important to the organization?

- A. Payment Card Industry (PCI) Data Security Standard (DSS)
- B. ISO 27002
- C. NIST Cybersecurity Framework
- D. The Federal Risk and Authorization Management Program (FedRAMP)

Answer: A

Explanation:

For a retail store, compliance with the Payment Card Industry (PCI) Data Security Standard (DSS) is crucial, as it governs the secure handling of cardholder data and ensures the safety of payment transactions. ISO 27002 (B) and the NIST Cybersecurity Framework (C) offer general guidelines, while FedRAMP (D) applies to government cloud services, making them less critical to retail-specific compliance needs.

NEW QUESTION # 306

When deploying an Intrusion Prevention System (IPS) the BEST way to get maximum protection from the system is to deploy it _____

- A. In promiscuous mode and block malicious traffic.
- B. In-line and turn on alert mode to stop malicious traffic.
- C. In promiscuous mode and only detect malicious traffic.
- **D. In-line and turn on blocking mode to stop malicious traffic.**

Answer: D

NEW QUESTION # 307

Which of the following is considered the MOST effective tool against social engineering?

- **A. Effective Security awareness program**
- B. Anti-phishing tools
- C. Effective Security Vulnerability Management Program
- D. Anti-malware tools

Answer: A

Explanation:

Combatting Social Engineering:

Social engineering targets human vulnerabilities rather than technological weaknesses. Awareness programs educate employees about threats, tactics, and preventative actions.

Importance of Awareness Programs:

- * Educates employees on identifying phishing, pretexting, and other tactics.
- * Reinforces secure behavior and reduces susceptibility to attacks.

Why Other Options Are Incorrect:

- * A. Anti-phishing tools: These help detect phishing but do not address the broader spectrum of social engineering.
- * B. Anti-malware tools: Focus on technical defenses, not human factors.
- * C. Security Vulnerability Management: Addresses system vulnerabilities, not human threats.

References:

EC-Council highlights security awareness as a primary defense against social engineering by improving human vigilance and understanding.

NEW QUESTION # 308

Scenario: You are the CISO and have just completed your first risk assessment for your organization. You find many risks with no security controls, and some risks with inadequate controls. You assign work to your staff to create or adjust existing security controls to ensure they are adequate for risk mitigation needs.

When formulating the remediation plan, what is a required input?

- A. Board of directors
- B. Patching history
- C. Latest virus definitions file
- **D. Risk assessment**

Answer: D

Explanation:

The risk assessment is a required input when formulating a remediation plan because it identifies the specific risks, their impacts, and prioritization for mitigation.

* Purpose of Risk Assessment:

- * Provides detailed insights into threats, vulnerabilities, and impacts on the organization.
- * Guides the formulation of an effective remediation plan.

* Irrelevance of Other Options:

- * Board of Directors: Not directly involved in formulating remediation plans.
- * Patching History and Virus Definitions: Tactical data but not essential for overall risk remediation planning.
- * Alignment with Strategic Objectives: Ensures that remediation aligns with identified risks and organizational priorities.
- * Risk Management Framework: Identifies risk assessment as the foundation for risk mitigation planning.
- * Incident and Vulnerability Management: Relies on risk assessments for structured responses.

Scenario6

NEW QUESTION # 309

An organization information security policy serves to

- A. establish acceptable systems and user behavior
- B. define security configurations for systems
- C. establish budgetary input in order to meet compliance requirements
- D. define relationships with external law enforcement agencies

Answer: A
