Reliable Exam PDI Pass4sure - PDI Test Pattern

We can resort to electronic PDI exam materials, which is now a commonplace, and the electronic materials with the highest quality

which consists of all of the key points required for the PDI exam can really be considered as the royal road to learning. Fortunately, the PDI practice test compiled by our company are the best choice for you, you just lucky enough to click into this website, since you are sure to pass the PDI Exam as well as getting the related certification under the guidance of our PDI study guide which you can find in this website easily.

Salesforce Platform Developer I (PDI) Sample Questions (Q108-Q113):

NEW QUESTION # 108

Which SOQL query successfully returns the Accounts grouped by name?

- A. **SELECT Name, Max(CreatedDate) FROM Account GROUP BY Name**
- B. SELECT Id, Type, Max(CreatedDate) FROM Account GROUP BY Name
- C. SELECT Type, Name, Max(CreatedDate) FROM Account GROUP BY Name LIMIT 5
- D. SELECT Type, Max(CreatedDate) FROM Account GROUP BY Name

Answer: A

NEW QUESTION # 109

The following code snippet is executed by a Lightning web component in an environment with more than 2,000 lead records:

```
@AuraEnabled
public void static updateLeads() {
    for(Lead thisLead : [SELECT Origin__c FROM Lead]) {
        thisLead.LeadSource = thisLead.Origin__c;
        update thisLead;
    }
}
```

Which governor limit will likely be exceeded within the Apex transaction?

- A. Total number of DML statements issued
- B. Total number of SOQL queries issued
- C. **Total number of records processed as a result of DML statements**

Answer: C

Explanation:

The provided code attempts to update all lead records in an environment with more than 2,000 records. This will likely exceed the governor limit for the total number of records processed in DML statements, which is 10,000 per transaction. To avoid this, the developer can use Database.update with batching logic.

Reference: Governor Limits for DML Rows

NEW QUESTION # 110

What should a developer use to obtain the Id and Name of all the Leads, Accounts, and Contacts that have the company name "Universal Containers"?

- A. FIND 'Universal Containers' IN Name Fields RETURNING lead(id, name), saccount(id, name), contact(id, name)
- B. SELECT lead(id, name), account(id, name), contact(id, name) FROM Lead, Account, Contact WHERE Name = 'Universal Containers'
- C. **FIND 'Universal Containers' IN CompanyName Fields RETURNING lead(id, name), sccount(ad, name), conteact(id, name)**
- D. SELECT Lead.id, Lead.Name, Account.Id, Account.Name, Contact.id, Contact.Name FROM Lead, Account, Contact WHERE CompanyName = 'Universal Containers'

Answer: C

Explanation:

- * Option A: This is the correct syntax for SOSL to retrieve data across multiple objects. It searches for "Universal Containers" in the CompanyName fields and returns the specified fields for Lead, Account, and Contact.
- * Other Options:
- * Option B and D: These are invalid SOQL statements since SOQL does not support multi-object queries.
- * Option C: Name fields are not relevant to the search term "CompanyName."

NEW QUESTION # 111

Refer to the component code 9fd requirements below:

```
<lightning:layout multipleRows="true">
  <lightning:layoutItem size="12">{!v.account.Name}
</lightning:layoutItem>

  <lightning:layoutItem size="12">{!v.account.AccountNumber}
</lightning:layoutItem>

  <lightning:layoutItem size="12">{!v.account.Industry}
</lightning:layoutItem>
</lightning:layout>
```

Requirements

- * For mobile devices, the information should display in three rows.
- * For desktops and tablets, the information should display in a single row.

Requirement 2 is not displaying as desired.

Which option has the correct component code to meet the requirements for desktops end and tablets?

• A.

```
<lightning:layout multipleRows="true">
  <lightning:layoutItem size="12" mediumDeviceSize="4">{!v.account.Name}
</lightning:layoutItem>

  <lightning:layoutItem size="12" mediumDeviceSize="4">{!v.account.AccountNumber}
</lightning:layoutItem>

  <lightning:layoutItem size="12" mediumDeviceSize="4">{!v.account.Industry}
</lightning:layoutItem>
</lightning:layout>
```

• B.

• C.

```
<lightning:layout multipleRows="true">
  <lightning:layoutItem size="12" mediumDeviceSize="4">{!v.account.Name}
</lightning:layoutItem>

  <lightning:layoutItem size="12" mediumDeviceSize="6">{!v.account.AccountNumber}
</lightning:layoutItem>

  <lightning:layoutItem size="12" mediumDeviceSize="6">{!v.account.Industry}
</lightning:layoutItem>
</lightning:layout>
```

```

<lightning:layout multipleRows="true">
  <lightning:layoutItem size="12" largeDeviceSize="6">{v.account.Name}</lightning:layoutItem>

  <lightning:layoutItem size="12" largeDeviceSize="4">{v.account.AccountNumber}</lightning:layoutItem>

  <lightning:layoutItem size="12" largeDeviceSize="4">{v.account.Industry}</lightning:layoutItem>
</lightning:layout>

```

Answer: C

NEW QUESTION # 112

A developer at AW Computing is tasked to create the supporting test class for a programmatic customization that leverages records stored within the custom object, Pricing Structure c. AW Computing has a complex pricing structure for each item on the store, spanning more than 500 records.

Which two approaches can the developer use to ensure Pricing__Structure__c records are available when the test class is executed? Choose 2 answers

- A. Use without sharing on the class declaration.
- **B. Use the @IsTest(SeeAllData=true) annotation.**
- C. Use the Test.leadtest() method.
- **D. Use a Test Data Factory class.**

Answer: B,D

Explanation:

* Option A: Using a Test Data Factory class is a recommended approach to create test records programmatically. This ensures that the test is independent of existing data and can be executed in isolation.

* Option B: The @IsTest(SeeAllData=true) annotation allows the test to access existing records in the database, including Pricing__Structure__c. However, this is less recommended as it creates a dependency on existing org data.

* Not Suitable:

* Option C: Test.loadData is used to load records from a static resource (CSV) but doesn't suit the requirement directly.

* Option D: Adding without sharing to a class impacts sharing rules but does not create or ensure the existence of test data.

:Testing Best Practices

NEW QUESTION # 113

.....

The field of Salesforce is growing rapidly and you need the Salesforce PDI certification to advance your career in it. But clearing the Platform Developer I (PDI) (PDI) test is not an easy task. Applicants often don't have enough time to study for the PDI Exam.
