### 286 Practice Test Questions

**in PDF Format with Verified Answers**

P.S. Free & New SK0-005 dumps are available on Google Drive shared by Prep4sureGuide: [https://drive.google.com/open?id=129KjobKafXAngd7I\\_-DYtNS12MfNdnq8](https://drive.google.com/open?id=129KjobKafXAngd7I_-DYtNS12MfNdnq8)

Prep4sureGuide is a learning website which provides SK0-005 latest dumps and answers, and almost covers every knowledge of SK0-005 exam questions. Using our learning textbooks to prepare SK0-005 test is your best choice. Prep4sureGuide with latest SK0-005 exam simulations will help you Pass SK0-005 Exam in a short time in a fast way. We promise that we will refund fully if the SK0-005 vce dumps and training materials have any problems or you fail the SK0-005 exam with our SK0-005 braindumps.

### **What are the Key Features of the CompTIA SK0-005 Certification Exam**

This exam will validate the skills and knowledge of the professionals. The candidate should have the basic knowledge of designing, implementing and troubleshooting the virtualization technologies.

CompTIA SK0-005 Certification Exam has following key features:

- The CompTIA SK0-005 Certification Exam will validate your ability to perform these tasks. **CompTIA SK0-005 exam dumps** will enhance your abilities.
- The CompTIA SK0-005 Certification Exam is a validating test for server administrators working in physical as well as virtualized environments. It will validate the knowledge and technical skills of the professionals to design, implement, configure, manage and maintain the data center virtualization solutions.
- Design and implement network connectivity in a data center environment
- Design and implement server hardware redundancy for high availability in a data center environment
- Install operating systems on servers based on requirements in a data center environment
- Install and configure server hardware components based on requirements in a data center environment

To prepare for the CompTIA SK0-005 Exam, candidates can take instructor-led training courses, self-study materials, and practice exams. SK0-005 exam objectives and content are available on the CompTIA website. CompTIA Server+ Certification Exam certification is valid for three years, after which candidates need to renew their certification by earning continuing education units (CEUs) or retaking the exam.

CompTIA SK0-005 (CompTIA Server+ Certification) is a vendor-neutral certification exam that validates a candidate's knowledge and skills in server hardware, software, storage, security, disaster recovery, and troubleshooting. CompTIA Server+ Certification Exam certification is ideal for IT professionals who want to advance their careers in server administration, data center management, and cloud computing. SK0-005 exam is updated every three years to reflect the latest trends and technologies in the industry.

## Free SK0-005 Exam - Accurate SK0-005 Answers

In order to be able to better grasp the proposition thesis direction, the CompTIA Server+ Certification Exam study question focus on proposition which one recent theory and published, in all kinds of academic report even if update to find effective thesis points, according to the proposition of preferences and habits, ponder proposition style of topic selection, to update our SK0-005 Exam Question, to facilitate users of online learning, better fit time development hot spot.

### CompTIA Server+ Certification Exam Sample Questions (Q409-Q414):

#### NEW QUESTION # 409

A user can successfully connect to a database server from a home office but is unable to access it from a hotel room. Which of the following authentication methods is most likely configured?

- A. Delegation
- B. Rule-based
- C. Role-based
- D. Scope-based

**Answer: D**

Explanation:

Scope-based authentication is a method of restricting access to resources based on the location, network, or device of the user. It can be used to prevent unauthorized access from outside the organization's network or from untrusted devices. In this case, the user can connect to the database server from the home office, which is likely within the scope of the authentication policy, but not from the hotel room, which is outside the scope.

CompTIA Server+: Authentication & Authorization2

#### NEW QUESTION # 410

A new company policy requires that any data loss in excess of one hour is unacceptable in the event of a disaster. Which of the following concepts is being referred to in this policy?

- A. RTO
- B. MTBF
- C. MTTR
- D. RPO

**Answer: D**

Explanation:

The Recovery Point Objective (RPO) refers to the maximum tolerable period in which data might be lost from an IT service due to a major incident. The policy mentioned in the question highlights that data loss exceeding one hour is unacceptable, directly relating to the RPO concept. RPO is critical in disaster recovery and business continuity planning, indicating the age of the files that must be recovered from backup storage for normal operations to resume without significant losses. MTTR (Mean Time To Repair), RTO (Recovery Time Objective), and MTBF (Mean Time Between Failures) are related concepts but do not specifically address the amount of data loss that can be tolerated.

#### NEW QUESTION # 411

A server administrator has received calls regarding latency and performance issues with a file server. After reviewing all logs and

server features the administrator discovers the server came with four Ethernet ports, but only one port is currently in use. Which of the following features will enable the use of all available ports using a single IP address?

- A. in-band management
- B. Network address translation
- **C. NIC teaming**
- D. Round robin

**Answer: C**

Explanation:

NIC teaming is a feature that allows the use of multiple network interface cards (NICs) as a single logical interface with a single IP address. It can improve the network performance, bandwidth, and redundancy of a server. Verified Reference: [NIC teaming], [Network interface card]

#### NEW QUESTION # 412

A remote physical server is unable to communicate to the network through the available NICs, which were misconfigured. However, the server administrator is still able to configure the server remotely. Which of the following connection types is the server administrator using to access the server?

- A. Virtual administrator console
- **B. Out-of-band management**
- C. RDP connection
- D. Crash cart access
- E. Local KVM setup

**Answer: B**

#### NEW QUESTION # 413

Which of the following techniques can be configured on a server for network redundancy?

- A. Vitalizing
- **B. Teaming**
- C. Clustering
- D. Cloning

**Answer: B**

#### NEW QUESTION # 414

.....

In the process of using the SK0-005 study materials, once users have any questions about our study materials, the user can directly by E-mail us, our products have a dedicated customer service staff to answer for the user, they are 24 hours service for you, we are very welcome to contact us by E-mail and put forward valuable opinion for us. Our SK0-005 Study Materials already have many different kinds of learning materials, users may be confused about the choice, what is the most suitable SK0-005 study materials? Believe that users will get the most satisfactory answer after consultation.
