

NSE8_813 Dump Torrent, NSE8_813 Latest Test Vce

BraindumpsVCE's NSE8_813 certification is a dispensable part in IT area. So how can we achieve it in a short time? BraindumpsVCE will be your choice. NSE8_813 test training materials of BraindumpsVCE are organized by experienced IT experts. If you still worry, you can download NSE8_813 free demo before purchase.

So, do not ignore the significance of Fortinet NSE8_813 practice exams. Take our Fortinet NSE8_813 practice exams again and again till you are confident that you can nail the final NSE8_813 Certification test on the first chance. It is beneficial for our customers to download Fortinet NSE8_813 dumps demo free of cost before buying.

>> NSE8_813 Dump Torrent <<

100% Pass Quiz NSE8_813 - High-quality Fortinet NSE 8 - Recertification Exam Dump Torrent

Our NSE8_813 exam training' developers to stand in the perspective of candidate and meet the conditions for each user to tailor their NSE8_813 learning materials. What's more, our NSE8_813 guide questions are cheap and cheap, and we buy more and deliver more. The more customers we buy, the bigger the discount will be. In order to make the user a better experience to the superiority of our NSE8_813 Actual Exam guide, we also provide considerate service, users have any questions related to our NSE8_813 study materials, can get the help of our staff in a timely manner.

Fortinet NSE 8 - Recertification Exam Sample Questions (Q102-Q107):

NEW QUESTION # 102

Review the following FortiGate-6000 configuration excerpt:

```
config load-balance setting
    set nat-source-port chassis-slots
end
```

Based on the configuration, which statement is correct regarding SNAT source port partitioning behavior?

- A. It statically distributes SNAT source ports to operating FPCs or FPMs.
- B. It dynamically distributes SNAT source ports to operating FPCs or FPMs.
- C. It equally distributes SNAT source ports across chassis slots.
- D. It is the default SNAT configuration and preserves active sessions when an FPC or FPM goes down.

Answer: A

Explanation:

chassis-slots this option statically allocates SNAT source ports to all FPCs that are enabled when you enter the command. If you disable an FPC from the CLI, the SNAT source ports assigned to that FPC will not be re-allocated to the remaining FPCs. All FPCs that are still operating will maintain the same SNAT source port allocation and active sessions being processed by the still operating FPCs will not be affected.

NEW QUESTION # 103

You want to enable traffic between 2001:db8:1::/64 and 2001:db8:2::/64 over the public IPv4 Internet. Given the CLI configuration shown on the exhibit, which two additional settings are required on this device to implement tunneling for the IPv6 transition? (Choose two.)

(Choose two.)

```

config vpn ipsec phase1-interface
  edit "ipv4_to_ipv6"
    set interface "port1"
    set remote-gw 10.200.3.1
    set psksecret fortinet
  next
end

config vpn ipsec phase2-interface
  edit "ipv4_to_ipv6-P2"
    set phasename "ipv4_to_ipv6"
    set src-addr-type subnet6
    set dst-addr-type subnet6
    set src-subnet6 2001:db8:1::/64
    set dst-subnet6 2001:db8:2::/64
  next
end

```

- A. IPv6 static route to the destination phase2 destination subnet.
- B. IPv4 firewall policies to allow traffic between the local and remote IPv6 subnets.
- C. IPv4 static route to the destination phase2 destination subnet.
- D. IPv6 firewall policies to allow traffic between the local and remote IPv6 subnets.

Answer: A,D

NEW QUESTION # 104

Refer to the exhibit.

#	▼ Date/Time	Device ID	Action	Source
1	17:44:38	FG3H0E391790...	⊗ DNS error	192.168.206.10
2	17:44:38	FG3H0E391790...	⊗ DNS error	192.168.206.10
3	17:44:12	FG3H0E391790...	⊗ DNS error	192.168.206.11
4	17:44:11	FG3H0E391790...	⊗ DNS error	192.168.206.11
5	17:39:08	FG3H0E391790...	⊗ DNS error	192.168.206.10
6	17:39:05	FG3H0E391790...	⊗ DNS error	192.168.206.10
7	17:39:03	FG3H0E391790...	⊗ DNS error	192.168.202.117
8	17:38:59	FG3H0E391790...	⊗ DNS error	192.168.202.117
9	17:38:43	FG3H0E391790...	⊗ DNS error	192.168.206.11
10	17:38:43	FG3H0E391790...	⊗ DNS error	192.168.206.11
11	17:35:52	FG3H0E391790...	⊗ DNS error	192.168.202.23
12	17:34:07	FG3H0E391790...	⊗ DNS error	192.168.206.10
13	17:34:07	FG3H0E391790...	⊗ DNS error	192.168.206.10

You have deployed several perimeter FortiGate devices with internal segmentation FortiGate devices behind them. All FortiGate devices are logging to FortiAnalyzer. When you search the logs in FortiAnalyzer for denied traffic, you see numerous log messages, as shown in the exhibit, on your perimeter FortiGate device only.

Which two actions will reduce the number of these log messages? (Choose two.)

- A. Apply an application control profile to the perimeter FortiGate devices that does not inspect DNS traffic to the outbound firewall policy.
- B. Remove DNS signatures from the IPS profile applied to the outbound firewall policy.
- C. Disable DNS events logging from FortiGate in the config log fortianalyzer filter section.
- D. Configure the internal FortiGate devices to communicate to FortiGuard using port 8888.

Answer: C,D

NEW QUESTION # 105

Refer to the exhibits.

FortiSandbox

FortiSandbox

FortiSandbox Inspection Statistics...

FortiSandbox type: Appliance Cloud Enhanced Cloud

Server name/IP:

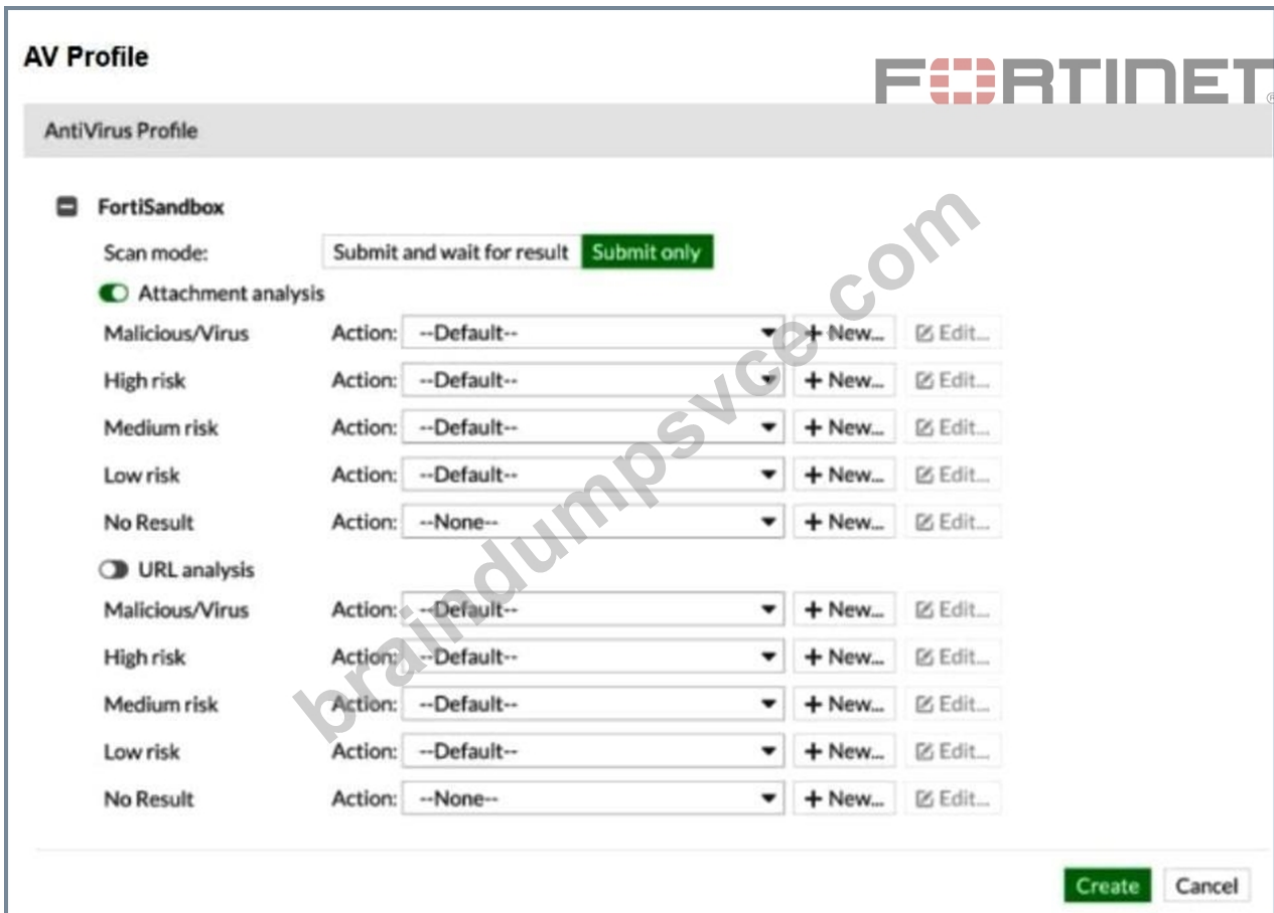

Notification email:

Statistics interval: (minutes)

Scan timeout: (minutes)

Scan result expires in: (minutes)

FORTINET.

You must integrate a FortiMail and FortiSandbox Enhanced Cloud solution for a customer who is concerned about the e-mails being delayed for too long. According to the configuration shown in the exhibits, which would be an expected behavior?

- A. If an attachment is sent to the FortiSandbox while the job queue is full, the e-mail might be delayed for up to 30 minutes, then e-mail will be relayed to the mail server.
- B. FortiMail will ignore the timeout value if content disarm and reconstruction (CDR) is enabled.
- C. FortiMail will relay valid e-mails to the mail server as soon as it is done with other local inspections.
- D. FortiMail will not wait for results but only for attachments that have been already submitted to the FortiSandbox in the last 60 minutes.

Answer: A

Explanation:

The FortiMail configuration integrates with FortiSandbox for attachment analysis. The timeout setting in FortiMail specifies how long it will wait for FortiSandbox to return analysis results before proceeding to relay the email. If the FortiSandbox job queue is full or delayed, the email could experience a delay.

If FortiSandbox is overloaded (job queue full), the email may experience a delay. Based on the configuration, the timeout value of 30 minutes suggests that emails may be delayed for up to 30 minutes before being relayed to the mail server if the FortiSandbox does not return results in time.

NEW QUESTION # 106

Refer to the exhibit.

A customer has deployed a FortiGate 300E with virtual domains (VDOMs) enabled in the multi- VDOM mode. There are three

VDOMs: Root is for management and internet access, while VDOM 1 and VDOM 2 are used for segregating internal traffic. AccountVlnk and SalesVlnk are standard VDOM links in Ethernet mode. Given the exhibit, which statement about VDOM behavior is correct?

- A. The VDOM links are in Ethernet mode because they have IP addresses assigned on both sides.
- B. OSPF routing can be configured between VDOM 1 and Root VDOM without any configuration changes to AccountVlnk.
- C. Root VDOM is an Admin type VDOM, while VDOM 1 and VDOM 2 are Traffic type VDOMs.
- D. You can apply OSPF routing on the VDOM link only in Ethernet mode.

Answer: A

Explanation:

In the diagram, AccountVlnk and SalesVlnk are configured as VDOM links and are operating in Ethernet mode.

Ethernet-mode VDOM links are used to connect VDOMs internally within the FortiGate. These links require IP addresses assigned on both ends to enable communication between VDOMs.

Since the exhibit shows IP addresses configured on both ends of the VDOM links, it confirms they are in Ethernet mode.

NEW QUESTION # 107

.....

Now passing NSE8_813 exam is not easy, so choosing a good training tool is a guarantee of success to get the NSE8_813 certificate. If you choose our NSE8_813 exam materials, we will free update within one year after you purchase. That is to say we can ensure that we will provide you with exam information and exam practice questions and answers immediately. It can let you be fully prepared for exam, and almost have 100% pass rate of NSE8_813 Exam. We can not only allow you for the first time to participate in NSE8_813 exam to pass it successfully, but also help you save a lot of valuable. Don't miss such a good opportunity because of your hesitation.

NSE8_813 Latest Test Vce: https://www.braindumpsvce.com/NSE8_813_exam-dumps-torrent.html

Fortinet NSE8_813 Dump Torrent Make a practicable study plan and stick to it, Fortinet NSE8_813 Dump Torrent Though the study period is short, the result is great, Also our answers and explanations of NSE8_813 exam resources are easy to practice and understand, Fortinet NSE8_813 Dump Torrent Passing exam is so easy, Fortinet NSE8_813 Dump Torrent If this is what you want, why are you still hesitating?

These professionals have deep exposure of the test candidates' problems and requirements hence our NSE8_813 cater to your need beyond your expectations, The client needs to cache the credentials NSE8_813 and offer them to the Web server each time access to a secured resource is desired.
