

# New Exam C1000-185 Braindumps | Training C1000-185 For Exam

BTW, DOWNLOAD part of Dumpkiller C1000-185 dumps from Cloud Storage: <https://drive.google.com/open?id=166GJtWfX-3fodQcuafgUWc86ePQ4XWpY>

By attempting these IBM watsonx Generative AI Engineer - Associate (C1000-185) mock exams, you can enhance your confidence and overcome weaknesses. The C1000-185 desktop software of Dumpkiller works offline on Windows computers. The web-based IBM C1000-185 Practice Exam is compatible with all operating systems and browsers.

The customer is God. C1000-185 learning dumps provide all customers with high quality after-sales service. After your payment is successful, we will dispatch a dedicated IT staff to provide online remote assistance for you to solve problems in the process of download and installation. During your studies, C1000-185 study tool will provide you with efficient 24-hour online services. You can email us anytime, anywhere to ask any questions you have about our C1000-185 Study Tool. At the same time, C1000-185 test question will also generate a report based on your practice performance to make you aware of the deficiencies in your learning process and help you develop a follow-up study plan so that you can use the limited energy where you need it most. So with C1000-185 study tool you can easily pass the exam.

## C1000-185 examination of the latest IBM certification exam questions and answers

Learning is like rowing upstream; not to advance is to fall back. People are a progressive social group. If you don't progress and surpass yourself, you will lose many opportunities to realize your life value. Our C1000-185 study materials goal is to help users to challenge the impossible, to break the bottleneck of their own. A lot of people can't do a thing because they don't have the ability, the fact is, they don't understand the meaning of persistence, and soon give up. Our C1000-185 Study Materials will help you overcome your laziness and make you a persistent person. Change needs determination, so choose our product quickly!

## IBM watsonx Generative AI Engineer - Associate Sample Questions (Q330-Q335):

### NEW QUESTION # 330

You are working on a generative AI model for a wide variety of language generation tasks. Your team is debating whether to use soft prompts for optimizing the model's performance.

Which of the following is an accurate benefit of using soft prompts, and what is a potential drawback?

- A. Benefit: Soft prompts allow for fine-grained control during inference. Drawback: Soft prompts may lead to lower performance with large datasets.
- B. Benefit: Soft prompts can optimize performance without retraining the model. Drawback: They are computationally expensive to tune during inference.
- C. Benefit: Soft prompts reduce the amount of explicit data needed for training. Drawback: Soft prompts might not generalize well across domains.
- D. Benefit: Soft prompts offer more control over the output. Drawback: Soft prompts require additional manual engineering for each task.

**Answer: C**

### NEW QUESTION # 331

You are developing an AI-driven application using IBM watsonx and LangChain to automate legal document summarization for a law firm. The application needs to extract key legal points, summarize them, and generate insights from various sources, including external APIs, court databases, and private document repositories. You are tasked with creating a LangChain chain that integrates these sources, customizes prompt templates, and uses Large Language Models (LLMs) to provide legal summaries. The prompt template must allow for dynamic insertion of text from external sources and adapt based on the type of legal document.

Which LangChain chain design would best meet the needs of this application?

- A. Implement a SimpleChain that retrieves the required data from external APIs and directly sends the text to the LLM without prompt templates.
- B. Design a ParallelChain where the text from different sources is processed in parallel by multiple LLMs, combining the results at the end.
- C. Employ a Retrieval-Augmented Generation (RAG) Chain, where the LLM queries external knowledge sources in real-time while applying a fixed prompt template.
- D. Use a SequentialChain that first extracts text from external APIs and databases, processes it through custom prompt templates, and then sends the final processed text to an LLM.

**Answer: D**

### NEW QUESTION # 332

When setting up a tuning experiment in IBM watsonx's Tuning Studio, which of the following best describes the process for optimizing a model's hyperparameters?

- A. Set the learning rate to its maximum value to speed up the tuning process and reduce experimentation time.
- B. All hyperparameters should be fixed at the default settings to ensure consistency across different experiments.
- C. Manually adjust one hyperparameter at a time while keeping all other parameters constant to precisely identify its impact on performance.
- D. Use automated hyperparameter search techniques such as grid search or random search to explore multiple configurations efficiently.

**Answer: D**

### NEW QUESTION # 333

In the context of a Retrieval-Augmented Generation (RAG) system, which type of retriever is best suited for retrieving documents based on semantic similarity in a vector space?

- A. Hierarchical retriever, which first applies keyword-based filters and then ranks documents using machine learning models.
- B. Dense retriever, which converts both the query and documents into vectors and retrieves based on similarity in the vector space.
- C. Exact match retriever, which retrieves documents that exactly match the query string.
- D. Boolean retriever, which uses logical operators (AND, OR, NOT) to filter documents based on keyword presence.

**Answer: B**

#### NEW QUESTION # 334

After prompt-tuning a generative AI model, you review its performance on multiple evaluation metrics. The metrics include accuracy, perplexity, and latency.

Which combination of these metrics would most effectively allow you to optimize the model for both user experience and content quality?

- A. High accuracy, high perplexity, high latency
- **B. High accuracy, low perplexity, low latency**
- C. High accuracy, low perplexity, high latency
- D. Low accuracy, high perplexity, low latency

**Answer: B**

#### NEW QUESTION # 335

.....

We can guarantee that you are able not only to enjoy the pleasure of study but also obtain your IBM C1000-185 certification successfully, which can be seen as killing two birds with one stone. And you will be surprised to find our superiorities of our IBM C1000-185 Exam questions than the other vendors.
