Using our GH-100 Study Materials can also save your time in the exam preparation for the content is all the keypoints covered.

Microsoft GitHub Administration Sample Questions (Q47-Q52):

NEW QUESTION # 47

Which of the following actions can a user with Write permissions perform in a GitHub repository?

- A. Delete the repository.
- B. Push code to non-protected branches.
- C. Configure branch protection rules.
- D. Manage repository settings, such as labels and GitHub Pages.

Answer: B

Explanation:

Users granted Write permission can push commits to non-protected branches, allowing them to update code without needing administrative rights.

NEW QUESTION # 48

What will happen if Dependabot discovers a vulnerable transitive dependency in a repository?

- A. It opens a pull request to update the affected package directly, regardless of version compatibility.
- B. It sends an email to the repository owner but does not alter code.
- C. It automatically removes the package from the repository.
- D. It creates a pull request to update the direct dependency to a version that resolves the vulnerability.

Answer: D

Explanation:

Dependabot will automatically open a pull request that updates the direct dependency to a version which, in turn, resolves (or removes) the vulnerable transitive dependency-ensuring the fix is applied via your declared dependencies.

NEW QUESTION # 49

What is the first step when sensitive data is accidentally pushed to a public GitHub repository?

- A. Force push a commit removing the data
- B. Revoke any exposed credentials immediately
- C. Open an issue to inform users
- D. Delete the repository

Answer: B

Explanation:

Revoke and/or rotate the exposed credentials immediately so they can no longer be used - this is the critical first step before you undertake any history-rewriting or cleanup.

NEW QUESTION # 50

You need to contact GitHub Premium Support. What are valid reasons for submitting a support ticket? (Each answer presents a complete solution. Choose two.)

- A. hardware setup issues or errors
- B. outages on GitHub.com affecting core Git functionality
- C. business impact from security issues within your organization
- D. license renewal

Answer: B,C

Explanation:

Business-impact security issues (for example, a critical vulnerability affecting your organization) are classified as High-priority tickets and are covered under your Premium Support SLA.

Outages on GitHub.com that disrupt core Git or web application functionality trigger Urgent-priority responses under Premium Support's SLA.

NEW QUESTION # 51

Your organization is implementing team synchronization. Which of the following should you prioritize during the setup process?

- A. Setting an infrequent sync schedule to reduce performance impact
- **B. Clearly define how identity provider groups will align with GitHub teams and roles**
- C. Disabling the audit log stream
- D. Allowing manual updates to team memberships

Answer: B

Explanation:

Before you enable team synchronization, you should clearly define how groups in your identity provider will map to GitHub teams and roles - ensuring that when the sync runs, users land in the correct teams with the right permissions.

NEW QUESTION # 52

.....
