Certified Application Developer-ServiceNow certification is recognized by ServiceNow and is a valuable asset for professionals seeking career advancement in the ITSM industry.

## ServiceNow Certified Application Developer-ServiceNow Sample Questions (Q69-Q74):

### NEW QUESTION # 69

What is the Event Registry?

- A. The Event Log which lists all Events that have been generated
- B. A table containing a record for every Event known to the ServiceNow system which allows ServiceNow to react when Events are generated

- C. The method used in server side scripts to generate Events and pass parameters
- D. A Workflow which is launched every time an Event is generated; used to debug Events

**Answer: B**

Explanation:

The Event Registry is a table that stores the definitions of all the Events that can be triggered or processed by the ServiceNow system<sup>1</sup>. The Event Registry allows ServiceNow to react when Events are generated by executing actions such as sending notifications, running scripts, or starting workflows<sup>2</sup>. The Event Registry also provides information about the Event parameters, description, and source<sup>3</sup>.

## NEW QUESTION # 70

What is a Module?

- A. A group of menus, or pages, providing related information and functionality to end-users
- B. A way of helping users quickly access information and services by filtering the items in the Application Navigator
- C. The functionality within an application menu such as opening a page in the content frame or a separate tab or window
- D. A web-based way of providing software to end-users

**Answer: C**

Explanation:

[https://docs.servicenow.com/bundle/rome-platform-user-interface/page/administer/navigation-and-ui/task/\\_t\\_CreateAModule.html](https://docs.servicenow.com/bundle/rome-platform-user-interface/page/administer/navigation-and-ui/task/_t_CreateAModule.html)

A module is the functionality within an application menu such as opening a page in the content frame or a separate tab or window. For example, Open is a module under the Problem application menu that opens a list of problem records. Modules are the second level navigation options for applications. ## NEW QUESTION # 71

Access Control rules are applied to a specific table, like the Incident table. What is the object name for a rule that applies to the entire Incident table (all rows and fields)?

- A. incident.all
- B. incident!
- C. incident'
- D. incidentNone

**Answer: C**

## NEW QUESTION # 72

If the Create module field is selected when creating a table, what is the new module's default behavior?

- A. Open a link to a wiki article with instructions on how to customize the behavior of the new module
- B. Open an empty form so new records can be created
- C. Display an empty homepage for the application
- D. Display a list of all records from the table

**Answer: D**

Explanation:

When creating a table, the Create module field allows you to automatically create a module for the table in the application menu. The default behavior of the new module is to display a list of all records from the table.

This can be changed later by editing the module properties and specifying a different link type, such as form, URL, or script.
