The companies do not want to lose them and they offer a good package to convince the candidate to become a part of their organization. So, to fit in the game, you must go for the Pass4guide Network Appliance NS0-185 Practice Exam that will show you where you stand and how hard you need to work to get the NetApp Storage Installation Engineer, ONTAP Professional Exam (NS0-185) certification exam.

Are you ready to accept this challenge? Looking for the simple, quick, and easiest way to pass the career advancement NetApp Storage Installation Engineer, ONTAP Professional Exam (NS0-185) certification exam? If your answer is yes then you do not need to worry about it. Just visit the Pass4guide and explore the top features of NetApp Storage Installation Engineer, ONTAP Professional Exam (NS0-185) exam practice test questions offered by the trusted platform Pass4guide. With Pass4guide NS0-185 Dumps questions you can easily prepare well and feel confident to pass the final NetApp Storage Installation Engineer, ONTAP Professional Exam exam easily.

Network Appliance NS0-185 Latest Test Questions, Latest NS0-185 Exam Bootcamp

The second format Pass4guide also has a product support team available every time to help you out in any terms. And they will fix all of your problems on time. provides its users to study for Prepare for your NetApp Storage Installation Engineer, ONTAP Professional Exam (NS0-185) exam is web-based practice exam. This format has all the features of desktop practice exam software for Network Appliance NS0-185 exam preparation.

Network Appliance NetApp Storage Installation Engineer, ONTAP Professional Exam Sample Questions (Q32-Q37):

NEW QUESTION # 32

You are preparing to install a new 2-node AFF A250 system at a customer site with an existing cluster that uses NetApp CN1610 cluster interconnect switches.

In this scenario, what are two valid actions for this installation? (Choose two.)

- A. Add the new nodes to the existing cluster and switches.
- B. Create a new 2-node switched cluster that uses the CN1610 cluster switches.
- C. Migrate the existing cluster to new switches and add the new nodes.
- D. Create a new 2-node switchless cluster.

Answer: B,D

Explanation:

AFF A250 systems are not supported on CN1610 cluster switches. Therefore, they cannot be added to an existing cluster that uses those switches. Valid options are to either create a new switched cluster using the CN1610 switches (if supported for that configuration) or deploy the AFF A250 as a switchless 2-node cluster.

NEW QUESTION # 33

What is a valid failover policy for a SAN LIF?

- A. disabled
- B. system-defined
- C. broadcast-domain-wide
- D. local-only

Answer: A

Explanation:

In ONTAP SAN concepts, SAN LIFs (used for iSCSI, FC, NVMe/FC) behave differently from NAS LIFs.

SAN access relies on multipathing at the host level, not LIF failover within the storage system. Because of this architectural design, SAN LIFs are configured with a failover policy of disabled.

When a SAN LIF goes offline, ONTAP does not move the LIF to another port. Instead, the host multipathing software (such as ALUA for iSCSI or FC multipath drivers) redirects I/O to another available path. This design ensures predictable path behavior and avoids unexpected changes that could confuse host multipathing logic.

Failover policies such as broadcast-domain-wide or local-only are valid only for NAS or management LIFs.

The system-defined option is not a valid failover policy value.

Therefore, the only valid failover policy for a SAN LIF is disabled, making A the correct answer.

NEW QUESTION # 34

You need to create a configuration spreadsheet template for a new ONTAP 9.8 deployment.

Which NetApp tool should you use?

- A. Active IQ Config Advisor
- B. Active IQ Unified Manager
- C. ConfigBuilder
- D. Interoperability Matrix Tool

Answer: C

NEW QUESTION # 35

A customer is asked to install a new AFF ASA A700 system. During the installation, the customer asks if ONTAP 9.8 is supported with their host's OS version running Windows 2016.

In this scenario, which NetApp tool would verify supportability?

- A. Active IQ Unified Manager
- B. ONTAP System Manager
- C. Interoperability Matrix Tool
- D. Active IQ OneCollect

Answer: C

Explanation:

Verifying interoperability between ONTAP versions, storage platforms, host operating systems, protocols, and host utilities is a mandatory step in NetApp solution assessment and installation planning. The Interoperability Matrix Tool (IMT) is the authoritative NetApp resource used to confirm whether a specific combination of components is supported.

In this scenario, the customer needs to verify that ONTAP 9.8 is supported with Windows Server 2016 on an AFF ASA A700 system. IMT allows administrators to search by storage OS version, platform model, host OS, protocol (iSCSI, FC, NVMe), and host utilities to ensure the configuration is supported.

ONTAP System Manager is used for system administration, not supportability validation. Active IQ Unified Manager focuses on monitoring and performance. Active IQ OneCollect is used for data collection, not compatibility verification.

Therefore, the correct tool is the Interoperability Matrix Tool.

NEW QUESTION # 36

A customer wants to enable SnapMirror Synchronous across their environment. The customer must ensure that SnapMirror Synchronous will work across the environment.

In this scenario, which two statements are true? (Choose two.)

- A. A SnapMirror Synchronous license is required on both the source and destination clusters.
- **B. A SnapMirror license is required on both the source cluster and the destination cluster.**
- C. A SnapMirror license is not required on both the source cluster and the destination cluster.
- **D. A SnapMirror Synchronous license is required on the source cluster.**

Answer: B,D

Explanation:

SnapMirror Synchronous requires the base SnapMirror license on both source and destination clusters to enable replication functionality. In addition, the SnapMirror Synchronous license is required on the source cluster, which initiates and controls synchronous replication operations.

NEW QUESTION # 37

.....

It is convenient for the user to read. The NS0-185 test materials have a biggest advantage that is different from some online learning platform which has using terminal number limitation, the NS0-185 quiz torrent can meet the client to log in to learn more, at the same time, the user can be conducted on multiple computers online learning, greatly reducing the time, and people can use the machine online of NS0-185 Test Prep more conveniently at the same time. As far as concerned, the online mode for mobile phone clients has the same function.

NS0-185 Latest Test Questions: <https://www.pass4guide.com/NS0-185-exam-guide-torrent.html>

There are thousands of candidates attend exam every year so it is necessary to know how to pass NS0-185 actual test among competitor in a short time, For example, the PDF version is convenient for you to download and print our NS0-185 test questions and is suitable for browsing learning, Network Appliance NS0-185 Practice Test So customer orientation is the beliefs we honor, The NS0-185 method is adopted to make the process of learning more convenient for the learner with other advantages of extra NS0-185 questions and answers.

Web app testing, The Motion Presets Panel, There are thousands of candidates attend exam every year so it is necessary to know how to pass NS0-185 Actual Test among competitor in a short time.

2026 The Best Network Appliance NS0-185: NetApp Storage Installation Engineer, ONTAP Professional Exam Practice Test

For example, the PDF version is convenient for you to download and print our NS0-185 test questions and is suitable for browsing learning, So customer orientation is the beliefs we honor.
