## Salesforce AP-222 Certification Training - Reliable AP-222 Test Topics

Good news comes that our company has successfully launched the new version of the AP-222 Guide tests. Perhaps you are deeply bothered by preparing the exam; perhaps you have wanted to give it up. Now, you can totally feel relaxed with the assistance of our AP-222 actual test. That is to say, if you decide to choose our study materials, you will pass your exam at your first attempt. Not only that, we also provide all candidates with free demo to check our product, it is believed that our free demo will completely conquer you after trying.

## Salesforce Public Sector Solutions Accredited Professional Sample Questions (Q22-Q27):

### NEW QUESTION # 22

A government agency is planning for a project Implementation. The project has to comply with regulations for storing protected health information (PHI). What are two different Salesforce security tools that can be used to meet this requirement?

- A. Field Audit Trail

- B. Event Monitoring
- **C. Platform Encryption**
- D. Setup Audit Trail

**Answer: A,C**

Explanation:

Field Audit Trail and Platform Encryption are two different Salesforce security tools that can be used to meet the requirement of storing protected health information (PHI). Field Audit Trail allows government agencies to track changes to sensitive data fields over time and set retention policies for field history data. Platform Encryption allows government agencies to encrypt sensitive data at rest while preserving critical platform functionality. Reference: <https://trailhead.salesforce.com/content/learn/modules/public-sector-solutions-design/secure-data-with-platform-encryption>

### NEW QUESTION # 23

A government agency would like to ensure that the calculation for ..... Correctly; the System Administrator needs to ensure that the ...  
Where in the Expression Sets can the Administrator set the data ...

- A. Under Add Resource in Expression Sets
- B. Under OmniScripts and while setting options
- C. Entry Criteria for Process builder
- **D. Under the Decision Table**

**Answer: D**

Explanation:

In Salesforce Public Sector Solutions, the calculation logic and data processing rules are often managed using Expression Sets and Decision Tables. These tools allow administrators to define complex business rules and logic without needing extensive code. For a government agency looking to ensure correct calculations, the appropriate place to configure these rules is within the Decision Table. Here's how it works:

\* Decision Tables:

\* Decision Tables are used to define a set of rules that determine the output based on different input conditions. They provide a structured way to manage complex logic and can be easily updated as business requirements change.

\* In the context of the calculation, the System Administrator can set up the necessary conditions and corresponding actions within a Decision Table to ensure accurate outcomes. For example, if the agency needs to calculate eligibility or benefits based on various criteria, these rules can be comprehensively defined within the Decision Table.

\* Setting Data in Expression Sets:

\* Within the Decision Table, administrators can specify the inputs (data points) and the corresponding expressions to perform the desired calculations. This ensures that the logic is applied consistently across all relevant processes.

By using Decision Tables, administrators have a flexible and scalable method to handle complex decision logic, ensuring that calculations are performed correctly based on predefined rules.

### NEW QUESTION # 24

Bobahaven has previously implemented Salesforce Service Cloud to...

Constituent self-service digital experience. This was implemented previously ..... now ready to implement the public sector Solutions License, Permits...

What is the right solution for this requirement that minimizes customization and site....

- A. Create new pages and deploy components such as OmniScripts and FlexCard within the ...
- B. Create OmniOut components and deploy them to the existing Help Center experience site.
- **C. Create a new Application digital experience using the Licenses and Permits Expression ...as OmniScripts and FlexCards to the new experience site.**
- D. Create a new Applications digital experience using the licenses and permits Experience ... components to the experience site.

**Answer: C**

**Explanation:**

For Bobahaven to implement Salesforce Public Sector Solutions for licenses and permits while minimizing customization and leveraging existing components, the best approach is to create a new digital experience specifically for applications. Here's why:

**\* New Digital Experience:**

\* Creating a new digital experience tailored for licenses and permits ensures that the specific needs of this functionality are met without interfering with the existing self-service site.

\* This allows for a focused and optimized user experience.

**\* Licenses and Permits Expression:**

\* Utilizing the Licenses and Permits Expression simplifies the implementation as it is designed specifically for these processes, reducing the need for extensive customization.

**\* OmniScripts and FlexCards:**

\* Deploying OmniScripts and FlexCards within the new experience site ensures a seamless and interactive user interface. These tools are designed to handle complex workflows and data displays efficiently.

\* OmniScripts can guide users through the application process step-by-step, while FlexCards provide quick-glance information and actionable widgets.

**Steps to implement this solution:**

**\* Create New Experience Site:**

\* Go to Setup > Digital Experiences > All Sites.

\* Click New to create a new site and choose a template that fits the application process.

**\* Add Components:**

\* Use OmniStudio tools to create and configure OmniScripts and FlexCards.

\* Deploy these components to the new experience site.

This approach provides a structured and scalable solution, aligning with Salesforce best practices and leveraging out-of-the-box functionalities to minimize customization.

**NEW QUESTION # 25**

When configuring an inspection, the administrator wants a violation record to be automatically generated when an inspector indicates that a standard requirement failed or an issue was identified.

What is the recommended approach for configuring the inspection to achieve this requirement?

- A. In the AP Template, xxxxx
- **B. Build an auto-launched Flow that will get all the assessment questions in an inspection. For each question that has a result marked as "Issue" or "Fail", generate a V record.**
- C. Create a new violation type record and associate it with an appropriate Assessment Indicator Definition. Select the "Auto-generate" checkbox so it will generate a V record whenever the AID fails.
- D. In the "Results" picklist field of the Inspection Assessment Indicator Object, edit the "Fail" and "issue" picklist values and select the "Violations" checkbox for the values to generate a V record when selected.

**Answer: B**

**Explanation:**

In Salesforce Public Sector Solutions, automating the creation of violation records when certain conditions are met during an inspection can be efficiently achieved using Salesforce Flow. Building an auto-launched Flow allows for detailed customization and control over the logic and actions performed based on the inspection results. Here's how to set it up:

**\* Create the Flow:**

\* Navigate to Setup > Process Automation > Flows.

\* Create a new Auto-launched Flow.

**\* Define the Trigger:**

\* Use a Record-Triggered Flow if you want the flow to be triggered automatically when an inspection record is created or updated.

**\* Get Assessment Questions:**

\* Use a Get Records element to retrieve all assessment questions related to the inspection.

**\* Decision Element:**

\* Add a Decision element to check each question's result. If the result is marked as "Issue" or "Fail", proceed to create a violation record.

**\* Create Records:**

- \* Use the Create Records element to generate a violation record for each failed or problematic assessment indicator.
- \* Activate the Flow.
- \* Save and activate the Flow.

This method ensures that the logic is flexible and can be modified without changing the underlying data model. It leverages Salesforce's powerful Flow Builder to create sophisticated automation rules.

### NEW QUESTION # 26

A Consultant supports the City of Snaxboro in setting up a new Licensing & Permitting system. The City is already using Public Sector Solutions for Emergency Response Management capabilities and is planning to use the Licensing & Permitting capabilities available in the same Salesforce instance.

Which of the following configurations directly impacts the City's Salesforce licensing cost?

- A. Configuring multiple record types for the Individual Application and the Business License Application for both License & Permit Management and Emergency Response Management.
- B. Configuring an Application Object Usage Record to track the number of applications processed for License & Permit Management and Emergency Response Management.
- C. Configuring Business Regulatory Authorization Type Dependencies for external users to view on the Experience site when searching for a specific Permit to apply for.
- **D. Configuring more than ten different OmniScript Application forms and making them available on an Experience Site for external users to apply.**

**Answer: D**

Explanation:

Configuring more than ten different OmniScript Application forms and making them available on an Experience Site for external users to apply is a configuration that directly impacts the City's Salesforce licensing cost. OmniScript Application forms are guided digital forms that can be used to capture data from external users, such as license or permit applicants. Experience Site is a digital experience site that can be used to communicate with external users and provide access to Salesforce data and functionality. Configuring more than ten different OmniScript Application forms and making them available on an Experience Site requires Customer Community Plus licenses, which are based on user counts and have higher costs than Customer Community licenses, which are based on logins or page views. Reference: [https://help.salesforce.com/s/articleView?id=sf.networks\\_license\\_types.htm&type=5](https://help.salesforce.com/s/articleView?id=sf.networks_license_types.htm&type=5)

### NEW QUESTION # 27

.....

The AP-222 study questions included in the different versions of the PDF, Software and APP online which are all complete and cover up the entire syllabus of the exam. And every detail of these three versions are perfect for you to practice and prepare for the exam. If you want to have a try before you pay for the AP-222 Exam Braindumps, you can free download the demos which contain a small part of questions from the AP-222 practice materials. And you can test the functions as well.
