Salesforce Certified Advanced Administrator Sample Questions (Q182-Q187):

NEW QUESTION # 182

Cloud Kicks needs to automate several updates to lead records and update unrelated records. Select changes should happen every time a record is created or updated, Put other changes should only happen when the record is updated.
Which two options should the administrator use to automate these updates?
Choose 2 answers

- A. Create a Process Builder that runs when a record is changed.
- B. Use a Decision element with the "Only if the record that triggered the flow to run is updated to meet the condition requirements" option.
- C. Create a flow that runs when a record is created or updated.
- D. Use "formula evaluates to true" workflow rule with the ISCHANCEO function to make changes when the record is updated.

Answer: B,C

NEW QUESTION # 183

A system administrator wants to change the field type from a lookup field to a master-detail field. What must the system administrator check in order for the change to be implemented successfully?

- A. Make sure the lookup value is required
- B. Option4
- C. Make sure that the lookup field has a related record
- D. Make sure that all lookup fields on the record are filled up

Answer: D

NEW QUESTION # 184

What would prevent a user from syncing a quote with an opportunity?

- A. The quote has already passed its expiration date.
- B. Another quote is already synced with the opportunity.
- C. The quote has a validation rule preventing it from being updated.
- D. Another quote is already synced with the opportunity and is awaiting approval.

Answer: D

Explanation:

Another quote is already synced with the opportunity will prevent a user from syncing a quote with an opportunity. Only one quote can be synced with an opportunity at a time. If a user tries to sync another quote, they will get an error message saying that the opportunity already has a synced quote.
