Our services before, during and after the clients use our EX200 certification material are considerate. Before the purchase, the clients can download and try out our EX200 learning file freely. During the clients use our products they can contact our online customer service staff to consult the problems about our products. After the clients use our EX200 Prep Guide dump if they can't pass the test smoothly they can contact us to require us to refund them in full and if only they provide the failure proof we will refund them at once. Our company gives priority to the satisfaction degree of the clients and puts the quality of the service in the first place.

Preparation for EX200 exam

The most helpful type of preparation is following training courses like those disclosed below:

- **RH124 Red Hat System Administration I Course**

This is the first of two system administration courses needed to start managing Red Hat Enterprise Linux servers. It lasts for 5 days during which you will learn core skills, such as physical storage and file systems managing, software components and services installing and configuring, running processes management and monitoring, and others. The course will also provide you with in-depth coverage of areas like establishing network connections and controlling firewall restrictions, administering users and groups, troubleshooting, and remote management with SSH and the Web Console. It will cost \$3600 or 12 Training Units to enroll.

- **RH199 RHCSA Rapid Track course**

The RHCSA Rapid Track course (RH199) combines Red Hat System Administration I (RH124) and Red Hat System Administration II (RH134), teaching the objectives in a fast and efficient way. This program relates to Red Hat® Enterprise Linux® and is designed for experienced Linux system administrators. The course proves a convenient way of preparing for the EX200 exam as it is focused on all the necessary topics, such as the configuration of network services, process management, tuning, server administration, package management, and troubleshooting, among the rest.

- **RH134 Red Hat System Administration II**

This is the second part of the RHCSA training track for IT professionals and logically follows the contents of Red Hat System Administration I (RH124). This is a valuable resource for anyone interested in developing better skills in storage configuration and management, management of security features such as SELinux, installation and deployment of Red Hat® Enterprise Linux®, basic system tuning, command-line automation and productivity, control of recurring system tasks, management of the boot process, and troubleshooting.

This course is designed for Windows system administrators and network administrators desiring to boost their skills. The ideal audience also includes Linux system administrators whose duties involve using established standards and procedures for configuring, installing, maintaining, and upgrading Linux systems.

The EX200 Exam Tests the candidate's ability to perform essential system administration tasks in a Red Hat Enterprise Linux environment. EX200 exam is conducted in a live, real-world environment, making it a practical and hands-on assessment of the candidate's skills. EX200 exam is designed to test the candidate's ability to configure, manage, and troubleshoot various aspects of a Linux system, including file systems and partitioning, user and group administration, network configuration, and system security.

RedHat Red Hat Certified System Administrator - RHCSA Sample Questions (Q18-Q23):

NEW QUESTION # 18

According to the following requirements, configure autofs service and automatically mount to user's home directory in the ldap domain.

- Instructor.example.com (192.168.0.254) has shared /home/guests/ldapuserX home directory to your system by over NFS export, X is your hostname number.

- LdapuserX's home directory is exist in the instructor.example.com: /home/ guests/ldapuserX
- LdapuserX's home directory must be able to automatically mount to /home/ guests/ldapuserX in your system.
- Home directory have write permissions for the corresponding user.

However, you can log on to the ldapuser1 - ldapuser99 users after verification. But you can only get your corresponding ldapuser users. If your system's hostname is server1.example.com, you can only get ldapuser1's home directory.

Answer:

Explanation:

```
mkdir -p /home/guests
```

```
cat /etc/auto.master:
```

```
/home/guests /etc/auto.ldap
```

```
cat /etc/auto.ldap:
```

```
ldapuser1 -rw instructor.example.com/home/guests/ldapuser1
automatically mount all the user's home directory #* -rw instructor.example.com/home/guests/&
```

NEW QUESTION # 19

Which of the following commands lists the cookbooks available on a Chef server?

- A. kitchen cookbook list
- B. chef-client cookbook list
- C. knife cookbook list
- D. chef-server cookbook list
- E. chef-solo cookbook list

Answer: D

NEW QUESTION # 20

13. Create a Container Image

As the user "wallah," download the Containerfile from <http://classroom/Containerfile>.

Do not modify the content of this file. Build an image named "pdf."

Answer:

Explanation:

Solution:

```
# Install container management tools
[root@node1 ~]# dnf -y install container-tools
# Execute operations as the user wallah
[root@node1 ~]# ssh wallah@localhost
# Download the container build file
[wallah@node1 ~]# wget http://classroom/Containerfile
# Log in to the image registry
[wallah@node1 ~]# podman login -u admin -p redhat321 registry.lab.example.com
# Build the container image using the Containerfile in the current directory, with the image name "pdf"
[wallah@node1 ~]# podman build -t pdf.
# View the images
[wallah@node1 ~]$ podman images
REPOSITORY TAG IMAGE ID CREATED SIZE
localhost/pdf latest 1d6e7ea71460 31 seconds ago 300 MB
registry.lab.example.com/ubi9-beta/ubi latest 28b0a4b69d9b 2 years ago 229 MB
```

NEW QUESTION # 21

Create a 512M partition, make it as ext4 file system, mounted automatically under /mnt/data and which take effect automatically at boot-start.

Answer:

Explanation:

see explanation below.

Explanation

```
# fdisk /dev/vda
n
+512M
w
# partprobe /dev/vda
# mkfs -t ext4 /dev/vda5
# mkdir -p /data
# vim /etc/fstab
/dev/vda5 /data ext4 defaults 0 0
```

mount -a

NEW QUESTION # 22

Configure the system synchronous as 172.24.40.10.

Answer:

Explanation:

see explanation below.

Explanation

Graphical Interfaces:

System-->Administration-->Date & Time

OR

system-config-date
