The clients can firstly be familiar with our products in detail and then make their decisions to buy it or not.

Salesforce Certified Platform App Builder Sample Questions (Q214-Q219):

NEW QUESTION # 214

A recently refreshed partial sandbox at Cloud Kicks has no data in the custom object Shipping. Checking in production, there are two million rows of data in the object.

What could be the reason the data is missing?

- A. The Partial sandbox is at capacity.
- **B. The selected objects in the sandbox template.**
- C. The sandbox was refreshed too early.
- D. The sandbox is still populating data.

Answer: B

Explanation:

The selected objects in the sandbox template. This is correct because a partial sandbox only copies a subset of data from production, and the data to be copied is determined by the sandbox template. If the Shipping object was not selected in the template, then its data would not be copied to the sandbox.

NEW QUESTION # 215

Which statement is true about field update actions from workflow rules and approval processes? Choose 2 answers

- **A. Field update with "re-evaluate workflow rules" selected can cause a recursive loop if the updated field is included in a workflow.**
- B. Field update are not available on currency field if the organization uses multi-currency.
- **C. Field updates to records based on workflow rules and approval processes do not trigger validation rules**
- D. Field updates are tracked in the history related list of a record regardless of whether or not History tracking is set for those fields.

Answer: A,C

NEW QUESTION # 216

An app builder wants to add the option to 'Send New Email' from Leads, Contacts and Accounts for users on mobile. What is the benefit of using global actions to accomplish this?

- A. Salesforce Lightning Component Library houses existing global actions prebuilt for use.
- B. The global action's layout automatically clones the default page layout.
- **C. Global actions can be accessed anywhere actions are pages, feed and Chatter groups,**
- D. Global actions are record-specific and are available when searching that particular

Answer: C

NEW QUESTION # 217

The VP of marketing wants to broadcast an email to 10,000 contacts in Salesforce on a regular basis, but realizes Salesforce's mass email functionality has a limitation on the number of emails that can be sent each day

- A. Develop apex code and Visualforce pages to send the emails

- B. Download all contacts to a CSV file and use an email client to send the emails
- C. Request salesforce increase the number of maximum daily emails
- D. Research and evaluate products available on appExchange to send mass emails Explanation: Tabular, Summary, or Matrix to Joined The existing report becomes the first block in the joined report, and the report type becomes the principle report type for the joined report. Joined report blocks are formatted as summary reports, so if you switch from a summary to a joined report, your groupings stay the same. If you switch from a matrix to a joined report, groupings are converted the same way as when you switch from a matrix to a summary report. The following items aren't supported in joined reports, and aren't converted: Bucket fields Cross filters The Rows to Display filter https://help.salesforce.com/htviewhelpdoc?id=reports_changing_format.htm&siteLang=en_US

Answer: D

NEW QUESTION # 218

What is a key consideration when using unmanaged packages? Choose 2 answers

- A. The person who created the unmanaged package can change or update installed components
- B. The person who created the unmanaged package has no control over the installed components
- C. A namespace is required to create an unmanaged package.
- D. A namespace is not required to create an unmanaged package.

Answer: B,D

Explanation:

Explanation - Namespaces are not used in unmanaged packages. In fact, even if your organization is namespace, the namespace is removed from all components when it is uploaded as an unmanaged package.

https://developer.salesforce.com/page/An_Introduction_to_Packaging

Once the components are installed from an unmanaged package, the components can be edited in the organization they are installed in. The developer who created and uploaded the unmanaged package has no control over the installed components, and can't change or upgrade them. https://help.salesforce.com/apex/HTViewHelpDoc?id=sharing_apps.htm
