The 156-587 study material provided by Rea4dumps can make you enjoy a boost up in your career and help you get the 156-587 certification easily. The 99% pass rate can ensure you get high scores in the actual test. In order to benefit more candidates, we often give some promotion about our 156-587 Pdf Files. You will get the most valid and best useful 156-587 study material with a reasonable price. Besides, you will enjoy the money refund policy in case of failure.

## CheckPoint 156-587 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Advanced Gateway Troubleshooting: This section of the exam measures the skills of Check Point Network Security Engineers and addresses troubleshooting techniques specific to gateways. It includes methods for diagnosing connectivity issues and optimizing gateway performance.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Advanced Management Server Troubleshooting: This section of the exam measures the skills of Check Point System Administrators and focuses on troubleshooting management servers. It emphasizes understanding server architecture and diagnosing problems related to server performance and connectivity.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Advanced Identity Awareness Troubleshooting: This section of the exam measures the skills of Check Point Security Consultants and focuses on troubleshooting identity awareness systems.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Advanced Troubleshooting with Logs and Events: This section of the exam measures the skills of Check Point Security Administrators and covers the analysis of logs and events for troubleshooting. Candidates will learn how to interpret log data to identify issues and security threats effectively.</li> </ul>

## 156-587 Valid Test Discount | 156-587 New Exam Camp

The product is made in three different formats to help customers with different preparation styles meet their needs. One of these formats is CheckPoint 156-587 Dumps PDF file which is printable and portable. Users can take CheckPoint 156-587 PDF

Questions anywhere and use them anytime. They can print these real 156-587 questions to save them as paper notes.

## CheckPoint Check Point Certified Troubleshooting Expert - R81.20 Sample Questions (Q93-Q98):

### NEW QUESTION # 93

What function receives the AD log event information?

- A. CPD
- B. PEP
- C. FWD
- **D. ADLOG**

**Answer: D**

Explanation:

The ADLOG function receives the AD log event information from the Domain Controllers. The ADLOG function is part of the Identity Awareness feature that enables the Security Gateway to identify users and machines in the network and enforce Access Control policy rules based on their identities. The ADLOG function uses the AD Query (ADQ) method to connect to the Active Directory Domain Controllers using WMI and subscribe to receive Security Event logs that are generated when users perform login. The ADLOG function then extracts the user and machine information that maps to an IP address from the event logs and sends it to the PEP function, which enforces the policy based on the identity information.

### NEW QUESTION # 94

The management configuration stored in the Postgres database is partitioned into several relational database domains. What is the purpose of the Global Domain?

- **A. This domain is used as the global database for MDSM and contains global objects and policies.**
- B. This domain is used as the global database to back up the objects referencing the corresponding object attributes from the System Domain.
- C. Global Domains is used by the IPS software blade to map the IDs to the corresponding countries according to the IpToCountry.csv file.
- D. This domain is used as the global database to track the changes made by multiple administrators on the same objects prior to publishing.

**Answer: A**

Explanation:

The Global Domain is one of the relational database domains in the Postgres database that stores the management configuration. The purpose of the Global Domain is to serve as the global database for Multi-Domain Security Management (MDSM) and contain the global objects and policies that are shared across all domains. The Global Domain also stores the global settings, such as the administrator roles, the LDAP servers, the IPS profiles, and the SmartEvent views. The Global Domain can be managed by the Global Domain Administrator or the Super User Administrator using the SmartConsole. The Global Domain can be backed up and restored using the mds\_backup and mds\_restore commands.

### NEW QUESTION # 95

What is the proper command for allowing the system to create core files?

- A. # set core-dump enable  
# save config

- B. set core-dump enable  
>save config
- C. SFWDIR/scripts/core-dump-enable.sh
- D. service core-dump start

**Answer: B**

#### NEW QUESTION # 96

What information does the doctor-log script supply?

- A. Repair options, Logging Rates, Logging Directories
- B. Logging rates, Logging Directories, List of troubleshooting tips
- C. Logging errors, Exceptions, Repair options
- D. Current and daily average logging rates, Indexing status, Size

**Answer: D**

Explanation:

The doctor-log script is a tool that provides information about the logging system and helps to identify and troubleshoot common issues. The script runs automatically every night and generates a report that contains the following information:

\* Current and daily average logging rates: This shows how many logs are being generated and received by the log server per second. It can help to monitor the logging performance and identify any spikes or drops in the logging rate.

\* Indexing status: This shows the status of the log indexing process, which enables faster and more efficient log searches. It can help to identify any issues with the indexing system, such as delays, failures, or errors.

\* Size: This shows the size of the log files and the disk space used by the logging system. It can help to manage the disk space and plan for log rotation and backup.

The doctor-log script also provides some troubleshooting tips and repair options for common logging issues, such as corrupted log files, missing log indexes, or low disk space. The script can be run manually or scheduled to run at a specific time. The script output can be viewed in the SmartConsole or in the log server file system.

#### NEW QUESTION # 97

Where will the usermode core files located?

- A. \$CPDIR/var/log/dump/usermode
- B. /var/suroot
- C. /var/log/dump/usermode
- D. \$FWDIRVar/log/dump/usermode

**Answer: A**

Explanation:

Usermode core files are generated when a user mode process crashes. They are located in the \$CPDIR/var/log/dump/usermode directory on the Security Gateway or Security Management server. The core files can be used to analyze the cause of the crash and troubleshoot the issue. The core files are named according to the process name, date, and time of the crash. For example, cpd\_2023\_02\_03\_16\_40\_55.core is a core file for the cpd process that crashed on February 3, 2023 at 16:40:55

#### NEW QUESTION # 98

.....

You can learn 156-587 quiz torrent skills and theory at your own pace, and you are not necessary to waste your time on some useless books or materials and you will save more time and energy that you can complete other thing. We also provide every candidate who wants to get certification with free Demo to check our materials. It is time for you to realize the importance of our 156-587 Test Prep, which can help you solve these annoyance and obtain a 156-587 certificate in a more efficient and productive way.
