

SAP C-ACDET-2506 Pass Guarantee | Examcollection C-ACDET-2506 Dumps Torrent

P.S. Free & New C-ACDET-2506 dumps are available on Google Drive shared by Pass4Test: <https://drive.google.com/open?id=1mzTw4IQhMC2-In29BSeKSowCymG461Z>

It is similar to the C-ACDET-2506 desktop-based software, with all the elements of the desktop practice exam. This mock exam can be accessed from any browser and does not require installation. The SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite (C-ACDET-2506) questions in the mock test are the same as those in the real exam. And candidates will be able to take the web-based SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite (C-ACDET-2506) practice test immediately through any operating system and browsers.

SAP C-ACDET-2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.
Topic 2	<ul style="list-style-type: none"> Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.
Topic 3	<ul style="list-style-type: none"> Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.

Reliable and Accurate SAP C-ACDET-2506 Exam Questions

If you lack confidence for your exam, you can strengthen your confidence for your exam through using C-ACDET-2506 exam torrent of us. C-ACDET-2506 Soft test engine can simulate the real exam environment, so that you can know the procedure for the exam, and your confidence for the exam can also be built up. What's more, C-ACDET-2506 Exam Braindumps are famous for instant access to download, and you can receive downloading link and password within ten minutes, so you start the training right now. You can enjoy free update for 365 days for C-ACDET-2506 test materials after payment, and the update version will be sent to you automatically.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q12-Q17):

NEW QUESTION # 12

Which Activate phase is tied to performing configurations in your SAP Ariba Strategic Sourcing suite solution?

- A. Configure
- B. Deploy
- C. Setup
- **D. Realize**

Answer: D

NEW QUESTION # 13

What actions can typically be performed on existing fields? (Select 3 correct answers)

- **A. Add a Visibility, Editability, or Validity Condition**
- B. Change the internal name
- **C. Make the field mandatory**
- **D. Change the help tip**
- E. Change the field type

Answer: A,C,D

Explanation:

In SAP Ariba, existing fields can be made mandatory by setting the Required property, help tips can be edited to clarify field usage, and visibility, editability, and validity conditions can be added or modified to control when and how fields appear or accept values. However, the internal field name is immutable once the field is created, and the field data type cannot be changed post-creation. These restrictions ensure system consistency and prevent data corruption. These limitations are well documented in SAP Ariba configuration best practices.

NEW QUESTION # 14

You need to revise a published form template.

What steps do you follow?

- A. Delete and recreate
- **B. Create a new version, edit, test, and publish**
- C. Edit directly in production
- D. Clone and change ID

Answer: B

NEW QUESTION # 15

Which data elements are shared in a Suite-Integrated Environment? (Select 3 correct answers)

- A. Exception Types
- **B. Suppliers**
- **C. Users**
- D. Supplier Catalogs
- **E. User Group mapping**

Answer: B,C,E

Explanation:

In a Suite-Integrated SAP Ariba environment, master data elements such as Suppliers, Users, and User Group mappings are shared across sourcing and procurement modules, enabling unified access and data consistency. Supplier Catalogs and Exception Types are not typically shared master data in this context. This integration supports seamless workflows and consistent security roles, enhancing usability and governance.

NEW QUESTION # 16

Which of the following can be used to define relation types and establish a custom relationship? (Select 2 correct answers)

- A. A custom Enumeration such as Contracts_Contract_Type
- B. A standard class such as ariba.basic.core.CommodityCode
- C. A custom Flex Master Data Template such as vrealm_1936.fmd_58984.Hospital
- D. A custom Form Template such as vrealm_1936.formDoc_18697.LessonsLearned

Answer: B,C

Explanation:

In SAP Ariba, relation types can be defined using custom Flex Master Data (FMD) templates and standard classes such as ariba.basic.core.CommodityCode. These define valid relationships between fields, allowing dependent picklists or filtering logic in forms. Custom enumerations are static lists and are not used to establish dynamic relations, and custom form templates are for form layouts and do not define data relationships.

NEW QUESTION # 17

.....

Our C-ACDET-2506 training dumps are deemed as a highly genius invention so all exam candidates who choose our C-ACDET-2506 exam questions have analogous feeling that high quality our practice materials is different from other practice materials in the market. So our C-ACDET-2506 study braindumps are a valuable invest which cost only tens of dollars but will bring you permanent reward. So many our customers have benefited form our C-ACDET-2506 preparation quiz, so will you!
